Subject Index 1994

Ab initio calculation
Ab initio studies of electronic structures and quasi-aromaticity in $M_3S_{4-n}O_n^{4+}$ (M = Mo, W; n = 0–4) clusters, 39
Experimental and theoretical study of the reaction $Fe + O_2 + N_2 \rightarrow FeO_2 + N_2$, 395
Configuration interaction studies on the S_2 surface of H_2CO: $2\,^1A'(\sigma, \pi^*/\pi, \pi^*)$ as perturber of $1\,^1B_2(n, 3s)$, 683
Structures and vibrational spectra of $CH_3OCH_2CH_2OH$: The hydrogen-bonded conformers, 689
Model calculations of chemical interactions. Part 7.—Role of vicinal delocalization in the regiochemical control of the cycloaddition of diazomethane and formonitrile oxide to methyl vinyl ether, 1077
Molecular conformations and rotation barriers of 2-halogenoethanethiols and 2-halogenoethanols: An _ab initio_ study, 1211
Prediction of whole reaction paths for large molecular systems, 1575
Ab initio MC-SCF study of thermal and photochemical [2 + 2] cycloadditions, 1617
Transition states, avoided crossing states and valence-bond mixing: Fundamental reactivity paradigms, 1631
Investigation of solvent effects on pericyclic reactions by computer simulations, 1727
Phosphate ester hydrolysis: Calculation of gas-phase reaction paths and solvation effects, 1763
Ab initio quantum chemistry study of the gas-phase reaction of ClO with HO_2, 1811
Effect of preferential solvation on Gibbs energies of ionic transfer, 2037
Hydroxylamine–water: Intermolecular potential function and simulation of hydrated NH_2OH, 2337
Spectroscopic investigations on iminophosphanes and methylenephosphanes, 2611
Ab initio study of the molecular structure, polarizability and first hyperpolarizability of 6-hydroxy-1-formylfulvene, 2873
Reaction of H_2S with OH and a study of the HSO and SOH isomers. High-level _ab initio_ calculations, 3051
Gas-phase IR spectrum of 7-azaindole. Scaled quantum mechanical force field and complete spectrum assignment, 3213
Theoretical study of the electroreduction of halogenated aromatic compounds. Part 3.—_o_-, _m_- and _p_-dibromobenzenes studied by AM1 and PM3 methods, 3241
EPR study of $NaCl:CO_2^-$ and $NaCl:SO_2^-$, 3261
Molecular structures of _cis_- and _trans_-_S_-ethyl thiocrotonate. A combined vibrational spectroscopic and _ab initio_ SCF-MO study, 3491
Classical and non-classical silicon radical cations: $H_nSiX^{\cdot+}$ species (X = N, O, F, P, S and Cl), 3505
Equilibrium geometry and vibrational frequencies of the 1:2 van der Waals complexes between methyl chloride and hydrogen chloride, 3601

Acid–base equilibrium
Influence of the cetyltrimethylammonium chloride micellar pseudophase on the protolytic equilibria of oxyxanthene dyes at high bulk phase ionic strength, 629
Conductance studies of acid–base equilibria between 4-methoxy-2, 6-dimethylpyridine _N_-oxide and trifluoroacetic acid in nitrobenzene, 2489

Acidity
Influence of preparation method on the acidity of $MoO_3(WO_3)/ZrO_2$ catalysts, 193
Far-IR study of the hydrogen-bond vibration of intramolecular bonds in substituted 2-diethylaminomethylphenol _N_-oxides, as a function of the pK_a of the phenolic group, 843
Characterization of acidity of pillared clays by proton affinity distribution and DRIFT spectroscopy, 3573

Acoustic effect
Response kinetics of polymer-coated bulk acoustic wave devices on exposure to gases and vapours, 751
Acoustic effects on catalytic activities of Cu and Pd thin films combined with piezoelectric lead strontium zirconium titanate activated by low-frequency voltage, 815

Activated carbon
Adsorption of binary mixtures of heptane and alkanols by activated carbon, 649
Water adsorption in active carbons described by the Dubinin–Astakhov equation, 783

Activation energy
Introductory Lecture: Electrostatic acceleration of the 1,5-H shifts in cyclopentadiene and in penta-1,3-diene by Li^+ complexation: Aromaticity of the transition structures, 1559
Corrigendum to Introductory Lecture: Electrostatic acceleration of the 1,5-H shifts in cyclopentadiene and in penta-1,3-diene by Li^+ complexation: Aromaticity of the transition structures, 3471

Activity coefficient
Mean activity coefficients of NaCl in glucose–water and sucrose–water mixtures at 298.15 K, 3281

***N*-acylglycine salts**
Vibrational spectroscopic study of _N_-acylglycine monomeric and dimeric salts: The long acyl chain effect on the NH (ND) stretch, amide I, amide II and CH_2-Wag modes, 3483

Adenine
Entropy change in the two-dimensional phase transition of adenine adsorbed at the Hg electrode/aqueous solution interface, 2925

Adsorption
Simulation study of nitrogen adsorption in parallel-sided micropores with corrugated potential functions, 181
FTIR spectroscopic study of the effects of the sulfur poisons on CO adsorption on Cu/SiO_2 catalysts, 203
Heat of water chemisorption on α-Al_2O_3 at 200–400 °C, 363
Brønsted acid strength in US-Y: FTIR study of CO adsorption, 383
Kinetic model for serum albumin adsorption: Experimental verification, 587
Adsorption of binary mixtures of heptane and alkanols by activated carbon, 649
Water adsorption in active carbons described by the Dubinin–Astakhov equation, 783
Theory of monolayers of non-Gaussian polymer chains grafted on to a surface. Part 1.—General theory, 889
FTIR spectroscopic study of the zeolitic adsorption of hydrogen cyanide on acidic sites, 919
Adsorption and decomposition of methanol on TiO_2, $SrTiO_3$ and SrO, 1015
FTIR study of carbon monoxide adsorption on ceria: CO_2^{2-} carbonite dianion absorbed species, 1023
FTIR study of adsorption and transformation of methanethiol and dimethyl sulfide on zirconia, 1029
CoAPO molecular sieve acidity investigated by adsorption calorimetry and IR spectroscopy, 1033
Adsorption in energetically heterogeneous slit-like pores: Comparison of density functional theory and computer simulations, 1153
Evanescent wave spectroscopy: Application to the study of the spatial distribution of charged groups on an adsorbed polyelectrolyte at the silica/water interface, 1251
Zinc-exchanged Y zeolites studied with carbon monoxide and xenon as probes, 1345
Grand canonical Monte Carlo study of Lennard-Jones mixtures in slit pores. Part 3.—Mixtures of two molecular fluids: Ethane and propane, 1487
Electroanalytical/X-ray photoelectron spectroscopy investigation on **glucose** oxidase adsorbed on platinum, 1495
Quartz crystal microbalance study of the adsorption of ions onto gold from non-aqueous solvents, 1533
Scanning tunnelling microscopy of various alkanols and an alkanethiol adsorbed onto graphite, 2551
Calculation of the adsorption potential energy of water vapour on α-cristobalite, 2555
Intracrystalline diffusion of benzene in microporous gallosilicate with MFI structure, 2585
FTIR study of the influence of sulfate species on the adsorption of NO, CO and NH_3 on CuO/Al_2O_3 catalysts, 2815
Adsorption of MCM-14 mesoporous molecular sieves. Part 1.—Nitrogen isotherms and parameters of the porous structure, 2821
Physisorption of argon, nitrogen and oxygen by MCM-41, a model mesoporous adsorbent, 2965
Rotating-disc electrode voltammetry as a probe of adsorption rates on solid particles in liquids. Application to Zn^{II} adsorption at the hydroxyapatite/aqueous interface, 3109
Comparative IR spectroscopic study of low-temperature H_2 and CO adsorption on Na zeolites, 3367
Adsorption of dialkyl derivatives of thiourea from an ethanol solution at a mercury electrode, 3545
Hydrogen adsorption–desorption and oxide formation–reduction on polycrystalline platinum in unbuffered aqueous solutions, 3663
Water adsorption in carbons described by the Dubinin–Astakhov and Dubinin–Serpinski equations, 3689

Aerosil silica
^{29}Si Solid-state NMR study of the surface structure of aerosil silica, 2961

Aggregation
Aggregation, hydrogen bonding and thermodynamic studies on tetrapeptide micelles, 161
Determination of aggregate structures by combined light-scattering and rheological studies, 2085
Aggregation, hydrogen bonding and thermodynamic studies on Boc-Val-Val-Ile-OMe tripeptide micelles in chloroform, 2725

Albumin
Kinetic model for serum albumin adsorption: Experimental verification, 587

Alcohol
Optical Kerr effect in a series of _n_-alcohols, 2455

Aldol condensation reactions
Importance of water in aldol condensation reactions of acetaldehyde, 1745

Alkali-metal halide
Limiting partial molar volumes of electrolytes in dimethylformamide–water mixtures at 298.15 K, 575
Rotational excitations of NH_4^+ ions in dilute solutions in alkali-metal halide lattices, 1149

Alkaline-earth-metal complex
Alkaline-earth-metal(II) complexes with hydroxide and fluoride in molten $NH_4NO_3 \cdot 1.5H_2O$ at 50 °C, 3539

Alkane
Use of a neural network to determine the boiling point of alkanes, 97

Alkanethiols
Scanning tunnelling microscopy of various alkanols and an alkanethiol adsorbed onto graphite, 2551

Alkanols
Scanning tunnelling microscopy of various

alkanols and an alkanethiol adsorbed onto graphite, 2551
Alkene
Reaction of atomic oxygen with some simple alkenes. Part 1.—Low pressure studies on reactions involving ethene, propene and (*E*)-but-2-ene, 3617
Reaction of atomic oxygen with some simple alkenes. Part 2.—Reaction pathways involving ethene, propene and (*E*)-but-2-ene at atmospheric pressure, 3625
***n*-Alkyloligo(oxyethylene)**
Molecular conformation of *n*-alkyloligo(oxyethylene)s in the solid state studied by Raman spectroscopy. Effect of the end group, 2769
Alkyl sulfide
Characterization of transients formed in aqueous solutions of substituted alkyl sulfides: A pulse radiolysis study, 703
Alloy
Solutions of aluminium in liquid lithium: Electrical resistivity of liquid alloys, 2753
Allyl radical
Luminescence from irradiated butadiene solutions: Fluorescence of allyl radicals?, 2897
^{27}Al NMR
Direct observation of aluminium guest ions in the silicate phases of cement minerals by ^{27}Al MAS NMR spectroscopy, 2095
EPR and NMR studies of amorphous aluminium borates, 2663
Effects of dry-air calcination on the physico-chemical and catalytic properties of HZSM-5 zeolite, 3191
^{27}Al and ^{29}Si solid-state NMR studies of dealuminated mordenite, 3719
$AlPO_4$–Al_2O_3 catalysts
$AlPO_4$–Al_2O_3 catalysts with low alumina content. Part IV.—Effect of fluoride ion addition on texture, surface acidity and catalytic performance in cyclohexane and cumene conversions, 2265
Alumina
Characterization of several γ-alumina-supported nickel catalysts and activity for selective hydrogenation of hexanedinitrile, 1455
Surface distribution and heteroatom removal activity of equilibrium adsorption prepared, doubly promoted (Zn,CO) Mo/Al_2O_3 catalysts, 2125
Corrigendum to Surface distribution and heteroatom removal activity of equilibrium adsorption prepared, doubly promoted (Zn, CO) Mo/Al_2O_3 catalysts, 3203
Alumina aerogel
High surface area alumina aerogel at elevated temperatures, 2573
Alumina film
Nickel incorporated into anodic porous alumina formed on an aluminium wire, 1279
Aluminium borate
EPR and NMR studies of amorphous aluminium borates, 2663
Aluminium complex
Characterization of the intermediates formed in the reaction of Al atoms with H_2O, H_2S and H_2Se by EPR spectroscopy, 3145
Aluminium solution
Solutions of aluminium in liquid lithium: Electrical resistivity of liquid alloys, 2753
Aluminophosphate
Comparison of thermal stability, acidity, catalytic properties and deactivation behaviour of novel aluminophosphate-based molecular sieves of type 36, 1041
Group behaviour of SAPO-11 molecular sieves containing various metals (Mg, Zn, Mn or Cd, Ni, Cr), 2141
Derivation of interatomic potentials for microporous aluminophosphates from the structure and properties of berlinite, 3175
Aluminosilicate
Dissolution of amorphous aluminosilicate zeolite precursors in alkaline solutions. Part 2.—Mechanism of the dissolution, 1973
Mechanistic study of *sec*-butyl alcohol dehydration on zeolite H-ZSM-5 and amorphous aluminosilicate, 2147
Physisorption of argon, nitrogen and oxygen by MCM-41, a model mesoporous adsorbent, 2965
Amperometry
Dual-cylinder microelectrodes. Part 2.—Steady-state generator and collector electrode currents, 605
Anisotropy
Optically induced Kerr constants for a homologous series of alk-1-enes and three alkadienes, 55
Anthraquinone
Pulse radiolytic one-electron reduction of 2-hydroxy- and 2,6-dihydroxy-9,10-anthraquinones, 711
AOT
Electron processes in AOT reverse micelles. Part 1.—Absorption spectra and lifetimes of hydrated electrons as studied by pulse radiolysis, 3411
Appearance energy
Appearance energies of small cluster ions and their fragments, 935
Aqueous amino acid system
Some thermodynamic properties of aqueous amino acid systems at 288.15, 298.15, 313.15 and 328.15 K; group additivity analyses of standard-state volumes and heat capacities, 2027
Aqueous micellar solution
Effects of alkyl-substituted ureas on the binding of the chloropentaamminecobalt(III) cation to sodium dodecyl sulfate micelles: A kinetic investigation, 2505
Aqueous solution
Pulse radiolysis of iodate in aqueous solution, 831
Thermodynamic properties of 0–6 mol kg^{-1} aqueous sulfuric acid from 273.15 to 328.15 K, 1875
Dielectric relaxation of aqueous NaF and KF solutions, 2475
Arc evaporation
High-resolution electron microscopy studies of a microporous carbon produced by arc-evaporation, 2799
Arene radical anion
Dissociative electron transfer between arene radical anions and halogenoalkanes: A pulse radiolysis study, 75
Aromaticity
Introductory Lecture: Electrostatic acceleration of the 1,5-H shifts in cyclopentadiene and in penta-1,3-diene by Li^+ complexation: Aromaticity of the transition structures, 1559
Corrigendum to Introductory Lecture: Electrostatic acceleration of the 1,5-H shifts in cyclopentadiene and in penta-1,3-diene by Li^+ complexation: Aromaticity of the transition structures, 3471
Aromatic character of graphite intercalation compounds, 3513
Ascorbic acid
Voltammetric and subtractively normalized interfacial FTIR study of the adsorption and oxidation of L(+)-ascorbic acid on Pt electrodes in acid medium: Effect of Bi adatoms, 609
Aspirin
Solid-state hydrolysis of aspirin, 997
Associating liquids
Integral equation theory for associating liquids: Highly asymmetric electrolytes, 1245
Association constant
Conductometric study of association phenomena of some metal(II) complexes in water at different temperatures, 3401
Asymmetric electrolyte
Integral equation theory for associating liquids: Highly asymmetric electrolytes, 1245
Atmospheric chemistry
Kinetic study of the reaction between Fe and O_3 under mesospheric conditions, 31
Reactions of N(2 ^{2}D) and N(2 ^{2}P) with O_2, 549
Chemiluminescent reaction of oxygen atoms with dimethyl disulfide and dimethyl sulfide, 825
Investigation into the kinetics and mechanism of the reaction of NO_3 with CH_3 and CH_3O at 298 K between 0.6 and 8.5 Torr: Is there a chain decomposition mechanism in operation?, 1197
Investigation into the kinetics and mechanism of the reaction of NO_3 with CH_3O_2 at 298 K and 2.5 Torr: A potential source of OH in the night-time troposphere?, 1205
Atmospheric lifetime, its application and its determination: CFC-substitutes as a case study, 2159
Atmospheric lifetime, its application and its determination: CFC-substitutes as a case study, 2159
Atmospheric oxidation
Mechanism of atmospheric oxidation of 1,1,1,2-tetrafluoroethane (HFC 134a), 1819
Atomic force microscopy
Electrosteric stabilisation of colloidal zirconia with low-molecular-weight polyacrylic acid. An atomic force microscopy study, 3415
Atomic oxygen
Reaction of atomic oxygen with some simple alkenes. Part 1.—Low-pressure studies on reactions involving ethene, propene and (*E*)-but-2-ene, 3617
Reaction of atomic oxygen with some simple alkenes. Part 2.—Reaction pathways involving ethene, propene and (*E*)-but-2-ene at atmospheric pressure, 3625
Auger electron spectroscopy
Growth and structure of ZnO_x overlayers on Cu(100), 3443
Auramine O
Internal rotation in Auramine O, 697
Autocatalysis
Kinetics of self-replicating micelles, 1953
Autoxidation
Reaction of peroxomonosulfate radical with manganese(II) in acidic aqueous solution. A pulse radiolysis study, 3309
Azaindole
Gas-phase IR spectrum of 7-azaindole. Scaled quantum mechanical force field and complete spectrum assignment, 3213
Bacteriorhodopsin
Active site of bacteriorhodopsin. FTIR and ^{1}H NMR studies using a model molecule, 1095
Barium tetratitanate
Photocatalysts with tunnel structures for decomposition of water. Part 1.—$BaTi_4O_9$ and its combination with various promoters, 797
Barley protein
^{1}H NMR relaxation time studies of the hydration of the barley protein C-hordein, 1099
Base hydrolysis
Effect of solvent on the reaction of coordination complexes. Part 19.—Base hydrolysis of (αβ*S*)-(*o*-methoxybenzoato)-(tetraethylenepentamine) cobalt(III) in aquo-organic solvent media, 3293
Benzene
Intracrystalline diffusion of benzene in microporous gallosilicate with MFI structure, 2585
Benzenoids
Fractal properties of homologous series of structures, 2201
Bilayer
Bilayer phases in aqueous mixtures of dodecylpentaoxyethylene glycol monoether ($C_{12}E_5$) and sodium decyl sulfonate ($C_{10}SO_3Na$), 471
Phase transitions in the bilayers in vesicles formed from binary mixtures of symmetric di-*n*-alkylphosphates in aqueous solutions, 2703
Bimetallic catalyst
Hydrogenation behaviour over SiO_2-supported lanthanide–palladium bimetallic catalysts with considerable hydrogen uptake, 2119
Ru–Cu/SiO_2 catalysts: Characterization by FTIR spectroscopy, 2809
Bimolecular reaction
Electron transfer from aromatic compounds to phenyliodinium and diphenylsulfinium radical cations, 287
The Polanyi Lecture. The colourful world of complex-forming bimolecular reactions, 2303
High sensitivity in reaction cross-section measurements by optical methods: The $Ca(^1D_2) + C_2H_5OH \rightarrow CaOH^* + C_2H_5$ reaction, 3731
Binary system
Study of preferential solvation in binary solvent

mixtures by the fluorescence-detected magnetic field effect, 109
Thermodynamics of liquid binary (alkanenitrile–alkane) mixtures. Part 1.—Experimental excess molar volume at 298.15 K and its interpretation with the Prigogine–Flory–Patterson theory, 113
Volumetric properties of steam–carbon dioxide mixtures derived from excess molar enthalpy measurements, 445
Effect of preferential solvation on reactivity of a free radical in binary solvent mixtures, 571
Transport and compressibility studies of some copper(I) perchlorates in binary mixtures of benzonitrile and acetonitrile, 583
Adsorption of binary mixtures of heptane and alkanols by activated carbon, 649
Transfer Gibbs Energies for ClO_3^-, BrO_3^-, IO_3^-, ClO_4^- and IO_4^- anions for water–acetonitrile and water–*tert*-butyl alcohol mixtures, 855
2-Methoxyethanol–water solvent system: Static relative permittivity from −10 to +80 °C, 859
Preferential solvation of a β-sensitive dye in binary mixtures of a non-protic and a hydroxylic solvent, 865
Crossover behaviour and critical amplitude of the viscosity of binary liquid mixtures of critical composition, 2215
Hydroxylamine–water: Intermolecular potential function and simulation of hydrated NH_2OH, 2337
Excess molar enthalpies of nitrous oxide–toluene in the liquid and supercritical regions, 2677
Enthalpies of transfer of tetrabutylammonium bromide from water to highly aqueous water–methanol, –ethanol, –propan-1-ol and –acetonitrile mixtures at 298 K: Consideration of the extended coordination model solvation parameters, 2691
Phase transitions in the bilayers in vesicles formed from binary mixtures of symmetric di-*n*-alkylphosphates in aqueous solutions, 2703
Electrical properties of an ethanol–dodecane mixture near the upper critical solution point, 2757
Thermodynamics of liquid binary (alkanenitrile–alkane) mixtures. Part 2.—Experimental excess molar heat capacity at 298.15 K and structure in solution, 2913
Preferential solvation in acetonitrile–water mixtures. Relationship between solvatochromic parameters and standard pH values, 3287

Biological Redox reaction
Mechanistic aspects of biological redox reactions involving NADH Part 5.—AM1 transition-state studies for the pyruvate–L-lactate interconversion in L-lactate dehydrogenase, 2047

Biomineral
Computer modelling of phosphate biominerals. Transfer of parameters for interatomic potentials for different polymorphs of divalent metal diphosphates, 641

Biophysical chemistry
Kinetic model for serum albumin adsorption: Experimental verification, 587
Comparison of DNA duplexes with and without O^4-methylthymine: Nanosecond molecular dynamics simulations, 1415
Kinetic study of double-helix formation and double-helix dissociation of polyadenylic acid, 2359

1,2-Bis(cyanimido)cyclobutene-3,4-dione dianion
Physicochemical characterization of the 1,2-bis(cyanimido)cyclobutene-3,4-dione dianion and its twin radical anions, 137

Bisketene
Conformation properties of buta-1,3-diene-1,4-diones (bisketenes): Computational and photoelectron spectroscopic studies, 3383

Bismuth–molybdenum oxide catalyst
Raman band shifts of γ-Bi_2MoO_6 and α-$Bi_2Mo_3O_{12}$ exchanged with ^{18}O tracer at active sites for reoxidation, 2113

Bis-oxonol
Photoinduced and thermal isomerization processes for bis-oxonols: Rotor volume, stereochemical and viscosity effects, 2627

Bleaching
Mechanism of bleaching by peroxides. Part 3.—Kinetics of the bleaching of phenolphthalein by transition-metal salts in high pH peroxide solutions, 1105

Boiling point
Use of a neural network to determine the boiling point of alkanes, 97
Use of a neural network to determine the normal boiling points of acyclic ethers, peroxides, acetals and their sulfur analogues, 2015

Born model
Derivation of interatomic potentials for microporous aluminophosphates from the structure and properties of berlinite, 3175

Born–Oppenheimer approximation
What Woodward and Hoffmann didn't tell us: The failure of the Born–Oppenheimer approximation in competing reaction pathways, 1581

Boron trichloride
Excimer-laser photofragmentation of boron trichloride and its implications for laser vapour deposition and doping processes, 3633

Bromobenzene
Theoretical study of the electroreduction of halogenated aromatic compounds. Part 3.—*o*-, *m*- and *p*-dibromobenzenes studied by AM1 and PM3 methods, 3241

Brønsted activity
Brønsted acid strength in US-Y: FTIR study of CO adsorption, 383
Brønsted acid sites in zeolites. FTIR study of molecular hydrogen as a probe for acidity testing, 1047
Acid properties of a ZSM-20-type zeolite, 2837
IR spectroscopic study of CD_3CN adsorbed on ALPO-18 molecular sieve and the solid acid catalysts SAPO-18 and MeAPO-18, 3455

Brownian dynamics
Computer simulation of particle gel formation, 173
Brownian dynamics simulations of concentrated dispersions: Viscoelasticity and near-Newtonian behaviour, 1133
Self-diffusion and viscoelasticity of dense hard-sphere colloids, 1931
Brownian dynamics simulation of a multi-subunit deformable particle in simple shear flow, 2737

Butadiene solution
Luminescence from irradiated butadiene solutions: Fluorescence of allyl radicals?, 2897

Butene
Ultra-low temperature kinetics of neutral–neutral reactions: Rate constants for the reactions of OH radicals with butenes between 295 and 23 K, 1473

Butyl alcohol
Mechanistic study of *sec*-butyl alcohol dehydration on zeolite H-ZSM-5 and amorphous aluminosilicate, 2147

C_{60}
Reaction of molecular oxygen with C_{60}: Spectroscopic studies, 403
Formation and structure of Langmuir–Blodgett films of C_{60} and arachidic acid, 969
Intrinsically unpolarized fluorescence of C_{60}, 2623
Single-crystal structure of C_{60} at 300 K. Evidence for the presence of oxygen in a statically disordered model, 2791

C_{70}
Pulse radiolytically induced redox and alkylation processes of C_{70}, 1391

Caesium–ammonia solution
Electronic states and the metal–insulator transition in caesium–ammonia solutions, 2009

Caesium-doped catalyst
EPR studies of caesium-doped V_2O_5–Fe_2O_3 catalysts: New evidence for active centres, 3159

Calcination
Characterisation of iron/titanium oxide photocatalysts. Part 2.—Surface studies, 2257

Calcium silicate
Direct observation of aluminium guest ions in the silicate phases of cement minerals by ^{27}Al MAS NMR spectroscopy, 2095

Calix[4]arenediquinones
Electrochemical studies of the conformational and sodium cation complexation properties of calix[4]arenediquinones, 2931

Calorimetry
Volumetric properties of steam–carbon dioxide mixtures derived from excess molar enthalpy measurements, 445
Enthalpies of interaction between dimethyldioctadecylammonium bromide vesicles in aqueous solution and either dipicolinate or sulfate anions, 727
Enthalpies of mixing a non-ionic surfactant with water at 303.15 K studied by calorimetry, 733
Self-diffusion, thermal effects and viscosity of a monodisperse associative polymer: Self-association and interaction with surfactants, 3555

ε-Caprolactam
NMR study of ε-caprolactam in various solvents. Graphical determination of monomer shift, dimer shift and dimerization constant from the dilution shift data, 717

Capture collision
Transition-state theory treatment of capture collisions between ions and symmetric top dipolar molecules, 3061

Carbamic acid
Protonated carbamic acid. Collisional activation and unimolecular dissociation of $CH_4NO_2^+$, 941

Carbon
Characterization of carbon-supported ruthenium–tin catalysts by high-resolution electron microscopy, 2803
Water adsorption in carbons described by the Dubinin–Astakhov and Dubinin–Serpinski equations, 3689

Carbon cluster structures
Carbon cluster structures and stabilities predicted from solid-state potentials, 3029

Carbon dioxide
Electrochemical reduction of CO_2 on hydrogen-enriched and hydrogen-depleted surfaces, 155
Growth and electrochemical behaviour of a poly[tricarbonyl(vinylbipyridyl)rhenium chloride] film. Heterogeneous reduction of CO_2, 459

Carbon monoxide
Mechanism of branched carbon-chain formation from CO and H_2 over oxide catalysts. Part 1.—Adsorbed species on ZrO_2 and CeO_2 during CO hydrogenation, 911
Enhancement in the optical CO sensitivity of NiO film by the deposition of ultrafine gold particles, 1011
Activation of surface lattice oxygen in the oxidation of carbon monoxide on silica, 1177
Addition of manganese to iron catalysts supported on silicalite-1 and its effect on CO hydrogenation, 1993
Hydrogenation of carbon monoxide and ethene over Ni-doped supported Pt catalysts, 2977

Catalysis
Acoustic effects on catalytic activities of Cu and Pd thin films combined with piezoelectric lead strontium zirconium titanate activated by low-frequency voltage, 815
Mechanism of branched carbon-chain formation from CO and H_2 over oxide catalysts. Part 1.—Adsorbed species on ZrO_2 and CeO_2 during CO hydrogenation, 911
Conversion of isopropyl alcohol to acetone catalysed by Cr_2O_3 at 473 K: Role of molecular oxygen, 2413
Reaction mechanism of methane oxidation to synthesis gas over an activated PdY zeolite, 3001

Catalyst characterisation
Surface characterization and catalytic activity of $Co_xMg_{1-x}Al_2O_4$ solid solutions. Oxidation of carbon monoxide by oxygen, 905
Characterization of several γ-alumina-supported nickel catalysts and activity for selective hydrogenation of hexanedinitrile, 1455
Ternary V–Ti–Si catalysts and their behaviour in the CO + NO reaction, 3711

Catalyst preparation
Nickel incorporated into anodic porous alumina

formed on an aluminium wire, 1279
Preparation and characterization of multiple ion-exchanged Pt/TiO_2 catalysts, 2277
Nature of vanadium species on SnO_2–V_2O_5-based catalysts. Chemistry of preparation, characterization, thermal stability and reactivity in ethane oxidative dehydrogenation over V–Sn mixed oxides, 2981
Oxidative coupling of methane over La_2O_3. Influence of catalyst preparation on surface properties and steady and oscillating reaction behaviour, 3357
Room-temperature catalytic fluorination of C_1 and C_2 chlorocarbons and chlorohydrocarbons on fluorinated Fe_3O_4 and Co_3O_4, 3585

Catalyst promoter
EPR investigation of paramagnetic species on palladium-promoted yttria and lanthana, 219
Tunnelling mode of superoxide radical anion decay on palladium-promoted yttria, 227
Formation of C_2 oxygenates on rhodium-containing catalysts during CO + H_2 reactions. FTIR study of acetaldehyde adsorption, 501
Photocatalysts with tunnel structures for decomposition of water. Part 1.—$BaTi_4O_9$ and its combination with various promoters, 797
Manganese-promoted rhodium/NaY zeolite catalysts. An IR spectroscopic study, 1335
Surface distribution and heteroatom removal activity of equilibrium adsorption prepared, doubly promoted (Zn,CO) Mo/Al_2O_3 catalysts, 2125
Corrigendum to Surface distribution and heteroatom removal activity of equilibrium adsorption prepared, doubly promoted (Zn, CO) Mo/Al_2O_3 catalysts, 3203

Catalyst properties
Comparison of thermal stability, acidity, catalytic properties and deactivation behaviour of novel aluminophosphate-based molecular sieves of type 36, 1041
$AlPO_4$–Al_2O_3 catalysts with low alumina content. Part IV.—Effect of fluoride ion addition on texture, surface acidity and catalytic performance in cyclohexane and cumene conversions, 2265
Effects of dry-air calcination on the physico-chemical and catalytic properties of HZSM-5 zeolite, 3191

Catalytic oxidation
Oxidation of carbon monoxide on $LaMn_{1-x}Cu_xO_3$ perovskite-type mixed oxides, 1183
^{18}O tracer studies of CO oxidation with O_2 on MoO_3. Part 1.—Diffusion of ^{18}O atoms from active sites during the catalysis and the determination of the number of active sites, 1301
^{18}O tracer studies of CO oxidation with O_2 on MoO_3. Part 2.—Active sites for CO oxidation with O_2 and for oxygen isotope exchange between CO_2 and MoO_3, 1307
Raman band shifts of γ-Bi_2MoO_6 and α-$Bi_2Mo_3O_{12}$ exchanged with ^{18}O tracer at active sites for reoxidation, 2113

Cationic polymer
Preparation, structure and vibrational spectrum of the dimethylmethyleniminium ion, including the role of cationic polymers in its formation, 3139

Ce^{III} ions
Kinetics of reductive dissolution of sodium bismuthate by Ce^{III} and Mn^{II} ions, 2939

Cell membrane
Fourier-transform detection of singlet oxygen and fluorescence from cell membrane bound porphyrins, 2453

Cement
Direct observation of aluminium guest ions in the silicate phases of cement minerals by ^{27}Al MAS NMR spectroscopy, 2095

Ceria
IR studies of cerium dioxide: Influence of impurities and defects, 653
Reduction of cerias with different textures by hydrogen and their reoxidation by oxygen, 773
FTIR study of carbon monoxide adsorption on ceria: CO_2^{2-} carbonite dianion absorbed species, 1023
Raman spectroscopic study of the Pt–CeO_2 interaction in the Pt/Al_2O_3–CeO_2 catalyst, 1461

Chain-branching mechanism
Explosive decomposition of gaseous chlorine dioxide, 3391

Charge transfer
Singlet quenching of polycyclic aromatic hydrocarbons by polychlorobenzenes in acetonitrile, 69
Synthesis, structures and electrical properties of the charge-transfer salts of 4,5-ethylenedithio-4′,5′-(2-oxatrimethylenedithio)diselena-dithiafulvalene (EOST) with linear anions $[I_3^-, IBr_2^-, ICl_2^-, I_2Br^-, AuBr_2^-, Au(CN)_2^-]$, 763
Effects of fluorine substitution on the solvatochromic behaviour of an iron(II)–cyanide Schiff base complex, 3071
Non-reactive interaction of ammonia and molecular chlorine: Rotational spectrum of the 'charge-transfer' complex $H_3N\cdots Cl_2$, 3205

Chemical potential
Statistical thermodynamics of hard spheres in a narrow cylindrical pore, 973

Chemical shift
Determination of the NMR monomer shift and dimerization constant in a self-associating system by direct application of the least-squares method, 3521

Chemiluminescence
Chemiluminescent reaction of oxygen atoms with dimethyl disulfide and dimethyl sulfide, 825
High sensitivity in reaction cross-section measurements by optical methods: The $Ca(^1D_2) + C_2H_5OH \rightarrow CaOH^* + C_2H_5$ reaction, 3731

Chemisorption
IR spectra and the structures of the chemisorbed species resulting from the adsorption of the linear butenes on a Pt/SiO_2 catalyst. Part 1.—Temperature dependence of the spectra, 507
IR spectra and the structures of the chemisorbed species resulting from the adsorption of the linear butenes on a Pt/SiO_2 catalyst. Part 2.—Spectra of the hydrogenated surface species as a function of temperature, 513
Modification of the electronic structure of Pd by U films: Chemisorption of CO, 1285
$[(\eta^2\text{-}C_2H_4)Os(CO)_4]$ as a vibrational model for type I′ ethene chemisorbed as a metallacyclopropane on metal surfaces, 1449
Chemisorption of H_2 and H_2–O_2 on polymorphic zirconia, 2969

Chlorine dioxide
Explosive decomposition of gaseous chlorine dioxide, 3391

Chlorine monoxide
Ab initio quantum chemistry study of the gas-phase reaction of ClO with HO_2, 1811

Chlorocarbon
Room-temperature catalytic fluorination of C_1 and C_2 chlorocarbons and chlorohydrocarbons on fluorinated Fe_3O_4 and Co_3O_4, 3585

Chlorofluorocarbon
Atmospheric lifetime, its application and its determination: CFC-substitutes as a case study, 2159

Chlorohydrocarbon
Room-temperature catalytic fluorination of C_1 and C_2 chlorocarbons and chlorohydrocarbons on fluorinated Fe_3O_4 and Co_3O_4, 3585

Chromium (III) oxide
Conversion of isopropyl alcohol to acetone catalysed by Cr_2O_3 at 473 K: Role of molecular oxygen, 2413

Chromophore
Intramolecular excimer formation in 1,5-di(9-anthryl)-*n*-pentane, 2845

Circular dichroism
Micellar aggregates of sodium glycocholate and sodium taurocholate and their interaction complexes with bilirubin-1Xα. Structural models and crystal structure, 1523
Photoinduced electron transfer in α-helical poly(L-lysine) carrying randomly distributed donor–acceptor pairs. A kinetic and conformational statistics investigation, 1857

Clar polyhedra
Leapfrog transformations and polyhedra of Clar type, 2865

Clathrate
Raman spectroscopic monitoring of oxygen clathrate hydrate formation from microporous amorphous solid water, 293

Clay
Corrigendum to Sorption of organic solvents into dense silicone membranes. Part 1.—Validity and limitations of Flory–Huggins and related theories, 2001
Determination of aggregate structures by combined light-scattering and rheological studies, 2085

Cluster
Ab initio studies of electronic structures and quasi-aromaticity in $M_3S_{4-n}O_n^{4+}$ (M = Mo, W; n = 0–4) clusters, 39
Ab initio studies of electronic structures and quasi-aromaticity in $M_3S_{4-n}O_n^{4+}$ (M = Mo, W; n = 0–4) clusters, 39
Collisional activation of large ions. Energy losses and an impulsive collision theory of energy transfer, 239
DRIFT and mass spectrometric experiments on the chemistry and catalytic properties of small Ir clusters at the surfaces of polycrystalline α-Al_2O_3, 787
Appearance energies of small cluster ions and their fragments, 935
Appearance energies of small cluster ions and their fragments, 935
Clusters of C_{60} molecules, 1061
Chemistry of NO_2^+ in association with water clusters, 3469

Cluster stabilities
Carbon cluster structures and stabilities predicted from solid-state potentials, 3029

^{13}C NMR spectroscopy
Carbon–halogen second-order quadrupolar and indirect spin–spin coupling effects in high-resolution ^{13}C NMR spectra of halobenzenes, 3729

CO_2^-
EPR study of $NaCl:CO_2^-$ and $NaCl:SO_2^-$, 3261

Cobalt(III) complex
Rate constants of the positronium oxidation reaction promoted by several caged and open Co^{III} complexes, 423

Collision reaction
Collisional activation of large ions. Energy losses and an impulsive collision theory of energy transfer, 239
Proton transfer to the fluorine atom in fluorobenzene. Temperature and pressure dependence, 1373
Collisional behaviour with Ar of the Λ doublets of $CH(X\,^2\Pi)$ $N'' = 15$ produced in the two-photon dissociation of CH_2CO at 279.3 nm, 1467
Configuration interaction study of the O_2–C_2H_4 exciplex: Collision-induced probabilities of spin-forbidden radiative and non-radiative transitions, 1479
High sensitivity in reaction cross-section measurements by optical methods: The $Ca(^1D_2) + C_2H_5OH \rightarrow CaOH^* + C_2H_5$ reaction, 3731

Colloid
Self-diffusion and viscoelasticity of dense hard-sphere colloids, 1931
Microwave synthesis of the colloidal poly(*N*-isopropylacrylamide) microgel system, 1999
Formation of two-dimensional structures from colloidal particles on fluorinated oil substrate, 2077
Monte Carlo simulations of a single poly(oxyethylene) $C_{12}E_2$ chain headgroup fixed on a bilayer surface in water, 2375
Thermodynamics and kinetics of the reaction of copper(II) and iron(III) with ultra-small colloidal chalcopyrite ($CuFeS_2$), 3301
Electrosteric stabilisation of colloidal zirconia with low-molecular-weight polyacrylic acid.

An atomic force microscopy study, 3415
Colour centre
Surface colour centres on magnesium oxide generated by magnesium and alkali-metal doping, 3167
Time-resolved EPR study of spin polarization and dynamics of F^+ centres in additively coloured CaO crystals, 3267
Combustion
Catalytic combustion of methane: Copper oxide supported on high-specific-area spinels synthesized by a sol–gel process, 1541
FTIR studies on the selective oxidation and combustion of light hydrocarbons at metal oxide surfaces. Propane and propene oxidation on $MgCr_2O_4$, 3347
Complex formation
Tracer diffusion of some metal ions and metal–EDTA complexes in aqueous sodium chloride solutions, 133
Cyclodextrin–monosaccharide interactions in water, 845
Complexation and precipitation equilibria in the system Ni^{II}—Cr^{VI}—H_2O, 1227
The Polayni Lecture, The colourful world of complex-forming bimolecular reactions, 2303
Formation and structure of mono- and di-bismuth hydroxide and fluoride complexes in molten $NH_4NO_3 \cdot 1.5H_2O$ at 50 °C, 2401
Formation and structure of mono- and di-lead hydroxide and fluoride complexes in molten $NH_4NO_3 \cdot 1.5H_2O$ at 50 °C, 2531
Ligand-controlled oxidation state ambivalence in copper–quinone complexes. Replacement of N-donor by S-donor ligands favours the copper(I)–semiquinone over the copper(II)–catecholate form, 2905
Complex formation between naphthalene and dimethyl-β-cyclodextrin by heating in a sealed ampoule, 3117
Microcalorimetric titration of α-cyclodextrin with some straight-chain α,ω-dicarboxylates in aqueous solution at different temperatures, 3397
Compressibility
Application of simple expressions for the high-pressure volumetric behaviour of liquid mesitylene, 553
Ultrasonic velocities and isentropic compressibilities of some tetraalkylammonium and copper(I) salts in acetonitrile and benzonitrile, 579
Transport and compressibility studies of some copper(I) perchlorates in binary mixtures of benzonitrile and acetonitrile, 583
Equation of state of liquid *o*-xylene at low temperatures and high pressures, 3527
Computer modelling
Computer modelling of phosphate biominerals. Transfer of parameters for interatomic potentials for different polymorphs of divalent metal diphosphates, 641
Computer simulation
Computer simulation of particle gel formation, 173
Simulation study of nitrogen adsorption in parallel-sided micropores with corrugated potential functions, 181
Concentrated dispersion
Brownian dynamics simulations of concentrated dispersions: Viscoelasticity and near-Newtonian behaviour, 1133
Concentration-dependent
Evaluation of concentration-dependent diffusivity with uptake curve, 3007
Conductance
Conductance studies of acid–base equilibria between 4-methoxy-2, 6-dimethylpyridine *N*-oxide and trifluoroacetic acid in nitrobenzene, 2489
Conducting polymer
Electrochemical synthesis of soluble poly(9-hexylfluorene) and poly(1-hexylindene), 321
Hydrogen evolution reaction on electrodes coated with conducting-polymer films, 745
Dual transmission line with charge-transfer resistance for conducting polymers, 1115
Influence of immobilising anions on the redox switching of polyaniline, 2061
Conductivity
Synthesis, structures and electrical properties of the charge-transfer salts of 4,5-ethylenedithio-4′-5′-(2-oxatrimethylenedithio)diselena-dithiafulvalene (EOST) with linear anions $[I_3^-, IBr_2^-, ICl_2^-, I_2Br^-, AuBr_2^-, Au(CN)_2^-]$, 763
Very large thermal separations for polyelectrolytes in salt solutions, 1909
Conductivity and dielectric relaxation in hydrated fused salts, 2065
Time-resolved microwave conductivity. Part 1.—TiO_2 photoreactivity and size quantization, 3315
Time-resolved microwave conductivity. Part 2.—Quantum-sized TiO_2 and the effect of adsorbates and light intensity on charge-carrier dynamics, 3323
Conductometric study of association phenomena of some metal(II) complexes in water at different temperatures, 3401
Configuration interaction
Configuration interaction studies on the S_2 surface of H_2CO: $2\,^1A'(\sigma, \pi^*/\pi, \pi^*)$ as perturber of $1\,^1B_2(n, 3s)$, 683
Configuration interaction study of the O_2–C_2H_4 exciplex: Collision-induced probabilities of spin-forbidden radiative and non-radiative transitions, 1479
Conformation
Molecular conformations and rotation barriers of 2-halogenoethanethiols and 2-halogenoethanols: An *ab initio* study, 1211
Introductory Lecture: Electrostatic acceleration of the 1,5-H shifts in cyclopentadiene and in penta-1,3-diene by Li^+ complexation: Aromaticity of the transition structures, 1559
Photoinduced electron transfer in α-helical poly(L-lysine) carrying randomly distributed donor–acceptor pairs. A kinetic and conformational statistics investigation, 1857
Study of the conformational equilibrium of 1-chlorobutane by free-jets and conventional microwave spectroscopy, 2183
Theoretical studies of the electronic structure, conformations, spectra and hyperpolarisabilities of squarates and related molecules, 2319
Molecular conformation of *n*-alkyloligo(oxyethylene)s in the solid state studied by Raman spectroscopy. Effect of the end group, 2769
Microwave spectrum and conformation of 5,6-dihydro-2*H*-thiopyran, 2849
Electrochemical studies of the conformational and sodium cation complexation properties of calix[4]arenediquinones, 2931
Conformation properties of buta-1,3-diene-1,4-diones (bisketenes): Computational and photoelectron spectroscopic studies, 3383
Corrigendum to Introductory Lecture: Electrostatic acceleration of the 1,5-H shifts in cyclopentadiene and in penta-1,3-diene by Li^+ complexation: Aromaticity of the transition structures, 3471
π-Conjugated polymer
Electrochemical synthesis of soluble poly(9-hexylfluorene) and poly(1-hexylindene), 321
Coordination
Oxotungsten(V) and (VI) complexes of 1,3-dimethyllumazine as models for the tungstopterin cofactor, 2909
Effect of solvent on the reaction of coordination complexes. Part 19.—Base hydrolysis of (αβS)-(*o*-methoxybenzoato)-(tetraethylene-pentamine) cobalt(III) in aquo-organic solvent media, 3293
Alkaline-earth-metal(II) complexes with hydroxide and fluoride in molten $NH_4NO_3 \cdot 1.5H_2O$ at 50 °C, 3539
Copolymer
Micellisation and gelation of triblock copolymer of ethylene oxide and ε-caprolactone, $CL_nE_mCL_n$, in aqueous solution, 1961
Copper
Thermogravimetry–FTIR study of the surface formate decomposition on Cu, CuCl, Cu_2O and CuO. Correlations between reaction selectivity and structural properties, 355
Copper(II) carboxylate
Investigation of the structure of the columnar liquid-crystalline phase of copper(II) carboxylates. An FTIR spectroscopic study, 2953
Copper complex
Ligand-controlled oxidation state ambivalence in copper–quinone complexes. Replacement of N-donor by S-donor ligands favours the copper(I)–semiquinone over the copper(II)–catecholate form, 2905
Characterisation behaviour of the complexation of copper(II) with polymer-bound vinylimidazole ligands, 3563
Copper oxide
Thermogravimetry–FTIR study of the surface formate decomposition on Cu, CuCl, Cu_2O and CuO. Correlations between reaction selectivity and structural properties, 355
Copper perchlorates
Transport and compressibility studies of some copper(I) perchlorates in binary mixtures of benzonitrile and acetonitrile, 583
α-Cristobalite
Calculation of the adsorption potential energy of water vapour on α-cristobalite, 2555
Crossover behaviour
Crossover behaviour and critical amplitude of the viscosity of binary liquid mixtures of critical composition, 2215
18-Crown-6 complexation
Thermodynamics of complexation of 18-Crown-6 with sodium, potassium, rubidium, caesium and ammonium ions in *N*,*N*-dimethylformamide, 127
Crystal-field theory
Influence of structure on the optical spectra of Eu^{3+} in $Pb(PO_3)_2$ glass: Molecular dynamics simulation and crystal-field theory, 755
Crystal growth
Non-isothermal crystallization from liquid solutions: Effect of heat of crystallization on growth rate, 2945
Crystallization
Raman spectroscopic monitoring of oxygen clathrate hydrate formation from microporous amorphous solid water, 293
Relaxation and crystallisation of water in a hydrogel, 1143
Synthesis of SAPO-34: High silicon incorporation in the presence of morpholine as template, 2291
Textures of tetradecahedron δ-FeOOH particles and their thermal decomposition products, 2567
Non-isothermal crystallization from liquid solutions: Effect of heat of crystallization on growth rate, 2945
Non-isothermal crystallization from liquid solutions: Effect of heat of crystallization on growth rate, 2945
Crystal structure
New families of triply periodic minimal surfaces, 263
Synthesis, structures and electrical properties of the charge-transfer salts of 4,5-ethylenedithio-4′-5′-(2-oxatrimethylenedithio)diselena-dithiafulvalene (EOST) with linear anions $[I_3^-, IBr_2^-, ICl_2^-, I_2Br^-, AuBr_2^-, Au(CN)_2^-]$, 763
Morphology and polymorphism in molecular crystals: Terephthalic acid, 1003
Micellar aggregates of sodium glycocholate and sodium taurocholate and their interaction complexes with bilirubin-1Xα. Structural models and crystal structure, 1523
Cucurbituril
Host–guest complexes of cucurbituril with the 4-methylbenzylammonium ion; alkali-metal cations and NH_4^+, 1507
CuO/Al_2O_3 catalyst
FTIR study of the influence of sulfate species on the adsorption of NO, CO and NH_3 on CuO/Al_2O_3 catalysts, 2815
Cyanine dye
Light stability of β-cyclodextrin inclusion complex of a cyanine dye, 3517
Cyclic voltammetry
Physicochemical characterization of the 1,2-bis(cyanimido)cyclobutene-3,4-dione dianion and its twin radical anions, 137
Wide pH range microelectrode study of the electrochemical behaviour of polyaniline

films in buffered solutions, 149
Electropolymerisation of indole-5-carboxylic acid, 1121
Profiles of adsorption during the oxidation of small organic molecules: Oxidation of formic acid at polycrystalline Pt in acid solutions, 1233
Direct observation of native and unfolded glucose oxidase structures by scanning tunnelling microscopy, 2057
Photoelectrochemistry using quinone radical anions, 2249
Hydrogen adsorption–desorption and oxide formation–reduction on polycrystalline platinum in unbuffered aqueous solutions, 3663

Cycloaddition
Model calculations of chemical interactions. Part 7.—Role of vicinal delocalization in the regiochemical control of the cycloaddition of diazomethane and formonitrile oxide to methyl vinyl ether, 1077
Concerted and stepwise mechanisms in cycloaddition reactions: Potential surfaces and isotope effects, 1599
Ab initio MC-SCF study of thermal and photochemical [2 + 2] cycloadditions, 1617

Cyclodextrin
Metallocyclodextrins of 6^A-(3-aminopropylamino) -6^A-deoxy-β-cyclodextrin: Their formation and enantioselective complexation of (*R*)- and (*S*)-tryptophan anions in aqueous solution, 739
Cyclodextrin–monosaccharide interactions in water, 845
Effects of complexation by cyclodextrins on the photoreactivity of Rose Bengal and Erythrosin B. A laser flash photolysis investigation, 2331
Complex formation between naphthalene and dimethyl-β-cyclodextrin by heating in a sealed ampoule, 3117

Cyclodextrin
Microcalorimetric titration of α-cyclodextrin with some straight-chain α,ω-dicarboxylates in aqueous solution at different temperatures, 3397
Light stability of β-cyclodextrin inclusion complex of a cyanine dye, 3517

Cyclooctatetraene
Triplet of cyclooctatetraene: Reactivity and properties, 963

Cyclopropane
Potential surfaces for cyclopropane stereomutations: What a difference geminal fluorines make, 1689

Cylindrical pore
Statistical thermodynamics of hard spheres in a narrow cylindrical pore, 973

Defect crystals
Surface colour centres on magnesium oxide generated by magnesium and alkali-metal doping, 3167

Deformable particle
Brownian dynamics simulation of a multi-subunit deformable particle in simple shear flow, 2737

Dehydration
Mechanistic study of *sec*-butyl alcohol dehydration on zeolite H-ZSM-5 and amorphous aluminosilicate, 2147

Dehydrochlorination
Room-temperature catalytic fluorination of C_1 and C_2 chlorocarbons and chlorohydrocarbons on fluorinated Fe_3O_4 and Co_3O_4, 3585

Delft molecular mechanics
Delft molecular mechanics: A new approach to hydrocarbon force fields. Inclusion of a geometry-dependent charge calculation, 2881

Density
Thermodynamics of liquid binary (alkanenitrile–alkane) mixtures. Part 1.—Experimental excess molar volume at 298.15 K and its interpretation with the Prigogine–Flory–Patterson theory, 113
Application of simple expressions for the high-pressure volumetric behaviour of liquid mesitylene, 553

Density functional theory
Adsorption in energetically heterogeneous slit-like pores: Comparison of density functional theory and computer simulations, 1153
Theoretical vibrational energies of $[CrO_4]^{2-}$, $[MnO_4]^{2-}$ and $[FeO_4]^{2-}$, 3237

Desorption
Hydrogen adsorption–desorption and oxide formation–reduction on polycrystalline platinum in unbuffered aqueous solutions, 3663

***Desulfovibrio gigas* hydrogenase**
Studies of light-induced nickel EPR signals in *desulfovibrio gigas* hydrogenase, 2921

Deuteriation
Catalytic reactions of *o*-xylene and *m*-xylene with deuterium on metal films, 659

Dialkylcadmium
Electron-loss centres from methylmercury hydride, dimethylcadmium and diethylcadmium: An EPR study, 3153

Diamminecopper(I)
Structure of the diamminecopper(I) ion in solution. An X-ray absorption spectroscopic study, 2211

Dicarboximide
Spectroscopic properties of aromatic dicarboximides. Part 1.—N—H and *N*-methyl-substituted naphthalimides, 411

Dielectric electronegativity scale
Underpotential deposition and dielectric electronegativity scale, 2395

Dielectric property
Distribution of electrolytes between membraneous and bulk phases, and the dielectric properties of membraneous water, studied by impedance spectroscopy measurements on dense cellulose acetate membranes, 2381

Dielectric relaxation
Conductivity and dielectric relaxation in hydrated fused salts, 2065
Dielectric relaxation of aqueous NaF and KF solutions, 2475

Dielectric spectroscopy
Relaxation and crystallisation of water in a hydrogel, 1143

Diels–Alder reaction
Stereoselectivity and regioselectivity in Diels–Alder reactions studied by intermolecular perturbation theory, 1663

Differential capacitance
Differential capacitance of liquid/liquid interfaces: Effect of electrolytes present in each phase, 143

Differential heat
Heat of water chemisorption on α-Al_2O_3 at 200–400 °C, 363

Differential refractometry
Tracer diffusion of some metal ions and metal–EDTA complexes in aqueous sodium chloride solutions, 133

Differential scanning calorimetry
Differential scanning microcalorimetric study of sodium di-*n*-dodecylphosphate vesicles in aqueous solution, 1905
Gel to liquid crystal transitions for vesicles in aqueous solutions prepared using mixtures of sodium dialkylphosphates $(R^1O)(R^2O)PO_2^-Na^+$ and $(R^3O)_2PO_2^-Na^+$, where $R^1 = C_{10}H_{21}$, $R^2 = C_{14}H_{29}$ or $C_{18}H_{37}$ and $R^3 = C_{12}H_{25}$, $C_{14}H_{29}$, $C_{16}H_{33}$ or $C_{18}H_{37}$, 2709

Diffuse reflectance
Characterization of acidity of pillared clays by proton affinity distribution and DRIFT spectroscopy, 3573

Diffusion
Tracer diffusion of some metal ions and metal–EDTA complexes in aqueous sodium chloride solutions, 133
Frequency response analysis for multicomponent diffusion in adsorbents, 369
High-temperature diffusion of hydrogen and deuterium in palladium, 899
Effects of hydrogen and deuterium concentration on measurements of the solubility and diffusivity of hydrogen isotopes in yttrium, 1979
Diffusion of hydrogen in Ti_3Al, 2423
Evaluation of concentration-dependent diffusivity with uptake curve, 3007
Frequency response study of single-file diffusion in theta-1, 3017

5,6-Dihydro-2*H*-thiopyran
Microwave spectrum and conformation of 5,6-dihydro-2*H*-thiopyran, 2849

Dimerization constant
NMR study of ε-caprolactam in various solvents. Graphical determination of monomer shift, dimer shift and dimerization constant from the dilution shift data, 717

Dimethylformamide
Limiting partial molar volumes of electrolytes in dimethylformamide–water mixtures at 298.15 K, 575

Dimethylmethyleniminium ion
Preparation, structure and vibrational spectrum of the dimethylmethyleniminium ion, including the role of cationic polymers in its formation, 3139

Dinitrogen oxide
Photocatalytic decomposition of dinitrogen oxide on Cu-containing ZSM-5 catalyst, 377

Disaccharide
Interaction of water with α,α-trehalose in solution: Molecular dynamics simulation approach, 2731

Dispersions
Corrigendum to Sorption of organic solvents into dense silicone membranes. Part 1.—Validity and limitations of Flory–Huggins and related theories, 2001

Disproportionation
Catalytic studies with dealuminated Y zeolite. Part 2.—Disproportionation of toluene, 809
Kinetics of disproportionation of hypoiodous acid, 3639

Dissociation
Collisional behaviour with Ar of the A doublets of $CH(X\,^2\Pi)$ $N'' = 15$ produced in the two-photon dissociation of CH_2CO at 279.3 nm, 1467

Dissolution
Unsteady state, non-isothermal dissolution of a solid particle in liquid, 1435
General thermodynamic analysis of the dissolution of non-polar molecules into water. Origin of hydrophobicity, 1513
Dissolution of amorphous aluminosilicate zeolite precursors in alkaline solutions. Part 2.—Mechanism of the dissolution, 1973
Dissolution of synthetic hydroxyapatite in the presence of lanthanum ions, 3405
Dissolution of amorphous aluminosilicate zeolite precursors in alkaline solutions. Part 3.—Influence of temperature on the dissolution process, 3725

Distonic radical cation
Classical and non-classical silicon radical cations: $H_nSiX^{\cdot+}$ species (X = N, O, F, P, S and Cl), 3505

Dithionite
Two-step reduction of Indigo Carmine by dithionite: A stopped-flow study, 2525

Divalent-metal perchlorate–acetonitrile solution
ATR-FTIR studies of ion–solvent and ion–ion interactions in divalent-metal perchlorate–acetonitrile solutions, 2697

DNA duplex
Comparison of DNA duplexes with and without O^4-methylthymine: Nanosecond molecular dynamics simulations, 1415

Donor–acceptor pairs
Marcus inverted region: Nature of donor–acceptor pairs and free ion yields, 2481

Double-helix formation
Kinetic study of double-helix formation and double-helix dissociation of polyadenylic acid, 2359

Double-layer capacity
Adsorption of dialkyl derivatives of thiourea from an ethanol solution at a mercury electrode, 3545

DRIFT spectroscopy
Structural studies on paracyanogen and paraisocyanogen, 327
DRIFT and mass spectrometric experiments on the chemistry and catalytic properties of small Ir clusters at the surfaces of polycrystalline α-Al_2O_3, 787

Corrigendum to Structural studies on paracyanogen and paraisocyanogen, 1363

Dubinin–Astakhov equation
Water adsorption in active carbons described by the Dubinin–Astakhov equation, 783

Dye
Non-linear optical properties of organic molecules. Part 13.—Calculation of the structure and frequency-dependent hyperpolarisability of a blue azothiophene dye, 1849
Photoinduced and thermal isomerization processes for bis-oxonols: Rotor volume, stereochemical and viscosity effects, 2627

Dynamics calculations
Dynamics calculations and isotopic effect in O + OH(D) → O_2 + H(D) at low energies, 2189

Electrical conductivity
Electrical properties of an ethanol–dodecane mixture near the upper critical solution point, 2757

Electrical properties
Electrical properties of pure vanadium phosphate phases and of VPO catalysts used in the partial oxidation of *n*-butane to maleic anhydride, 1441

Electrical resistivity
Solutions of aluminium in liquid lithium: Electrical resistivity of liquid alloys, 2753

Electric permittivity
Electrical properties of an ethanol–dodecane mixture near the upper critical solution point, 2757

Electrocatalysis
Voltammetric and subtractively normalized interfacial FTIR study of the adsorption and oxidation of L(+)-ascorbic acid on Pt electrodes in acid medium: Effect of Bi adatoms, 609
Electrochemical study of the heterogeneously catalysed reaction between *N*,*N*-dimethyl-*p*-phenylenediamine and $Co^{III}(NH_3)_5Cl^{2+}$ at monometallic and bimetallic surfaces of silver and gold, 617
Redox electrocatalysis by tetracyanoquinodimethane in phospholipid monolayers adsorbed at a liquid/liquid interface, 2517

Electrochemical deposition
Controlling the morphology of electrochemically deposited poly(3-methylthiophene) films by electrode rotation, 3097
Apparently viscoelastic responses in a quartz crystal microbalance study of an electrodeposited non-aqueous colloid film, 3657

Electrochemical reduction
Electrochemical reduction of CO_2 on hydrogen-enriched and hydrogen-depleted surfaces, 155

Electrochemical synthesis
Electrochemical synthesis of soluble poly(9-hexylfluorene) and poly(1-hexylindene), 321

Electrochemistry
Differential capacitance of liquid/liquid interfaces: Effect of electrolytes present in each phase, 143
Wide pH range microelectrode study of the electrochemical behaviour of polyaniline films in buffered solutions, 149
Photothermal imaging of electrochemical reaction dynamics, 345
Growth and electrochemical behaviour of a poly[tricarbonyl(vinylbipyridyl)rhenium chloride] film. Heterogeneous reduction of CO_2, 459
Dual-cylinder microelectrodes. Part 2.—Steady-state generator and collector electrode currents, 605
Voltammetric and subtractively normalized interfacial FTIR study of the adsorption and oxidation of L(+)-ascorbic acid on Pt electrodes in acid medium: Effect of Bi adatoms, 609
Electrochemical study of the heterogeneously catalysed reaction between *N*,*N*-dimethyl-*p*-phenylenediamine and $Co^{III}(NH_3)_5Cl^{2+}$ at monometallic and bimetallic surfaces of silver and gold, 617
Hydrogen evolution reaction on electrodes coated with conducting-polymer films, 745
Profiles of adsorption during the oxidation of small organic molecules: Oxidation of formic acid at polycrystalline Pt in acid solutions, 1233
Influence of polymer structure on the electrochemistry of phenothiazine dyes incorporated into Nafion films, 1241
Kinetics of reduction of hexacyanoferrate(III) by thiosulfate ions mediated by ruthenium dioxide hydrate, 1429
Electroanalytical/X-ray photoelectron spectroscopy investigation on glucose oxidase adsorbed on platinum, 1495
Redox properties of ubiquinone (UQ_{10}) adsorbed on a mercury electrode, 1913
Studies of silver electronucleation onto carbon microelectrodes, 1923
Influence of immobilising anions on the redox switching of polyaniline, 2061
Underpotential deposition and dielectric electronegativity scale, 2395
Entropy change in the two-dimensional phase transition of adenine adsorbed at the Hg electrode/aqueous solution interface, 2925
Electrochemical studies of the conformational and sodium cation complexation properties of calix[4]arenediquinones, 2931
Co-deposited Pt–WO_3 electrodes. Part 1.—Methanol oxidation and *in situ* FTIR studies, 3089
Determination of some electrical parameters for $UO_2(O_3PC_6H_5)$ films deposited on a porous support, 3103
Hydrogen adsorption–desorption and oxide formation–reduction on polycrystalline platinum in unbuffered aqueous solutions, 3663
Relation between the surface states of oxide films at Rh electrodes and kinetics of the oxygen evolution reaction, 3669

Electrokinetics
Comparison of the electrokinetic properties of the silica surface, 1261

Electrolyte
Differential capacitance of liquid/liquid interfaces: Effect of electrolytes present in each phase, 143
Distribution of electrolytes between membraneous and bulk phases, and the dielectric properties of membraneous water, studied by impedance spectroscopy measurements on dense cellulose acetate membranes, 2381

Electronic state
Electronic states and the metal–insulator transition in caesium–ammonia solutions, 2009

Electronic structure
Ab initio studies of electronic structures and quasi-aromaticity in $M_3S_{4-n}O_n^{4+}$ (M = Mo, W; n = 0–4) clusters, 39
Synthesis, structures and electrical properties of the charge-transfer salts of 4,5-ethylenedithio-4′-5′-(2-oxatrimethylenedithio)diselena-dithiafulvalene (EOST) with linear anions [I_3^-, IBr_2^-, ICl_2^-, I_2Br^-, $AuBr_2^-$, $Au(CN)_2^-$], 763
Modification of the electronic structure of Pd by U films: Chemisorption of CO, 1285
Theoretical studies of the electronic structure, conformations, spectra and hyperpolarisabilities of squarates and related molecules, 2319
Classical and non-classical silicon radical cations: $H_nSiX^{\cdot+}$ species (X = N, O, F, P, S and Cl), 3505

Electron magnetic resonance imaging
Effects encountered in EPR spectroscopy and imaging at small magnetic fields, 2671

Electron transfer
Dissociative electron transfer between arene radical anions and halogenoalkanes: A pulse radiolysis study, 75
Electron transfer from aromatic compounds to phenyliodinium and diphenylsulfinium radical cations, 287
Chiral discrimination in the formation of diastereomeric pairs. A thermodynamic and conformational investigation, 435
Characterization of transients formed in aqueous solutions of substituted alkyl sulfides: A pulse radiolysis study, 703
Quartz crystal microbalance study of the adsorption of ions onto gold from non-aqueous solvents, 1533
Molecular orbital studies of electron-transfer reactions, 1783
Redox electrocatalysis by tetracyanoquinodimethane in phospholipid monolayers adsorbed at a liquid/liquid interface, 2517

Electronucleation
Studies of silver electronucleation onto carbon microelectrodes, 1923

Electrophoresis
Comparison of the electrokinetic properties of the silica surface, 1261

Electrophoretis
Heats of transport of aqueous tetraalkylammonium hydroxides and the electrophoretic effect, 1223

Electropolymerisation
Electropolymerisation of indole-5-carboxylic acid, 1121

Electroreduction
Theoretical study of the electroreduction of halogenated aromatic compounds. Part 3.—*o*-, *m*- and *p*-dibromobenzenes studied by AM1 and PM3 methods, 3241

Electrostatic potential map
Theoretical investigation of steroidal inhibitors of glucose-6-phosphate dehydrogenase, 3533

Electrosteric stabilisation
Electrosteric stabilisation of colloidal zirconia with low-molecular-weight polyacrylic acid. An atomic force microscopy study, 3415

Ellipsometry
Growth and electrochemical behaviour of a poly[tricarbonyl(vinylbipyridyl)rhenium chloride] film. Heterogeneous reduction of CO_2, 459

Emission spectroscopy
Effects of protolytic interactions on the photophysics of phenyl pyridyl ketones, 279

Emulsion
Time-resolved fluorescence probing of oil-in-water microemulsions stabilised by non-ionic surfactants, 3567

Enantioselective complexation
Metallocyclodextrins of 6^A-(3-aminopropylamino)-6^A-deoxy-β-cyclodextrin: Their formation and enantioselective complexation of (*R*)- and (*S*)-tryptophan anions in aqueous solution, 739

ENDOR
EPR/ENDOR characterization of radicals produced in the photopolymerization of a dimethacrylate monomer, 1967
ENDOR study of RbCl: S_2^-, 2541
^{31}P and ^1H powder ENDOR and molecular orbital study of a CO_3^{3-} ion in X-irradiated carbonate containing hydroxyapatites, 2653
Proton ENDOR from randomly oriented NO-ligated haemoglobin: Approaching the structural basis for the R–T transition, 3077
EPR, ENDOR and TRIPLE resonance characterization of three paramagnetic redox stages of 5-methyl-5*H*-dibenzo[*a*,*d*]cycloheptene, 3273

Energetics
Mechanistic aspects of biological redox reactions involving NADH Part 5.—AM1 transition-state studies for the pyruvate–L-lactate interconversion in L-lactate dehydrogenase, 2047

Energy barrier
Ring–chain rearrangements of phosphirane, 1771

Energy loss
Collisional activation of large ions. Energy losses and an impulsive collision theory of energy transfer, 239

Energy-optimized tree branch method
Comparison of complete conformational searching and the energy-optimized tree branch method in molecular mechanics calculations, 47

Enthalpy
Single-ion enthalpies of transfer for conjugate-base anions of imides in acetonitrile–methanol mixtures. Empirical

correlation with semi-empirical molecular orbital calculations, 121
Enthalpies of interaction between dimethyldioctadecylammonium bromide vesicles in aqueous solution and either dipicolinate or sulfate anions, 727
Enthalpies of mixing a non-ionic surfactant with water at 303.15 K studied by calorimetry, 733
Differential scanning microcalorimetric study of sodium di-*n*-dodecylphosphate vesicles in aqueous solution, 1905
Enthalpies of transfer of tetrabutylammonium bromide from water to highly aqueous water–methanol, –ethanol, –propan-1-ol and –acetonitrile mixtures at 298 K: Consideration of the extended coordination model solvation parameters, 2691

Entropy
Grand canonical Monte Carlo study of Lennard-Jones mixtures in slit pores. Part 3.—Mixtures of two molecular fluids: Ethane and propane, 1487
Entropy change in the two-dimensional phase transition of adenine adsorbed at the Hg electrode/aqueous solution interface, 2925

Enzyme
Direct observation of native and unfolded glucose oxidase structures by scanning tunnelling microscopy, 2057
Studies of light-induced nickel EPR signals in *desulfovibrio gigas* hydrogenase, 2921
Application of iodine-laser temperature jump to an irreversible enzyme reaction. Reaction of ascorbic acid with hydrogen peroxide catalysed by peroxidase, 3201

Enzyme catalysis
Enzyme catalysis at hydrogel-modified electrodes with soluble redox mediator, 987
Enzyme catalysis and transition structures *in vacuo*. Transition structures for the enolization, carboxylation and oxygenation reactions in ribulose-1,5-bisphosphate carboxylase/oxygenase enzyme (Rubisco), 2365

Enzyme electrode
Enzyme catalysis at hydrogel-modified electrodes with soluble redox mediator, 987

Enzyme kinetics
Application of iodine-laser temperature jump to an irreversible enzyme reaction. Reaction of ascorbic acid with hydrogen peroxide catalysed by peroxidase, 3201

EPR
Physicochemical characterization of the 1,2-bis(cyanimido)cyclobutene-3,4-dione dianion and its twin radical anions, 137
Structure of Cr^{V} species on the surface of various oxides: Reactivity with NH_3 and H_2O, as investigated by EPR spectroscopy, 207
One-electron donor sites and their strength distribution on some hydrotalcite and MgO surfaces as studied by EPR spectroscopy, 213
EPR investigation of paramagnetic species on palladium-promoted yttria and lanthana, 219
Effect of glycerol on the translational and rotational motions in lipid bilayers studied by pulsed-field gradient ^1H NMR, EPR and time-resolved fluorescence spectroscopy, 305
Structural studies on paracyanogen and paraisocyanogen, 327
Spin trapping of radicals formed upon irradiation of organobromine compounds with low-energy X-rays, 721
Corrigendum to Structural studies on paracyanogen and paraisocyanogen, 1363
EPR/ENDOR characterization of radicals produced in the photopolymerization of a dimethacrylate monomer, 1967
Pd^{I} location and absorbate interactions in PdH-SAPO-34 studied by EPR and electron spin–echo modulation spectroscopies, 2283
NMR determination of EPR hyperfine coupling constants of some 5-(*n*-alkyl)-1,1,3,3-tetrakis(trideuteriomethyl)-isoindolin-2-yloxyls, 2345
ENDOR study of RbCl: S_2^-, 2541
Application of matched spin probes to the investigation of the overall motion of model lubricant molecules, 2547
EPR spin-labelling and spin-trapping study of proteins in reverse micelles, 2643
EPR data do not support the P=O representation for triakyl phosphates and phosphine oxides or sulfides, 2649
^{31}P and ^1H powder ENDOR and molecular orbital study of a CO_3^{3-} ion in X-irradiated carbonate containing hydroxyapatites, 2653
EPR and NMR studies of amorphous aluminium borates, 2663
Effects encountered in EPR spectroscopy and imaging at small magnetic fields, 2671
EPR studies of the formation of alkene cations due to ion–molecule reactions in the 77 K radiolysis of pentane and hexane containing additives, 2901
Ligand-controlled oxidation state ambivalence in copper–quinone complexes. Replacement of N-donor by S-donor ligands favours the copper(I)–semiquinone over the copper(II)–catechoiate form, 2905
Oxotungsten(v) and (vi) complexes of 1,3-dimethyliumazine as models for the tungstopterin cofactor, 2909
Studies of light-induced nickel EPR signals in *desulfovibrio gigas* hydrogenase, 2921
Proton ENDOR from randomly oriented NO-ligated haemoglobin: Approaching the structural basis for the R–T transition, 3077
Characterization of the intermediates formed in the reaction of Al atoms with H_2O, H_2S and H_2Se by EPR spectroscopy, 3145
Electron-loss centres from methylmercury hydride, dimethylcadmium and diethylcadmium: An EPR study, 3153
EPR studies of caesium-doped V_2O_5–Fe_2O_3 catalysts: New evidence for active centres, 3159
Surface colour centres on magnesium oxide generated by magnesium and alkali-metal doping, 3167
EPR study of NaCl: CO_2^- and NaCl: SO_2^-, 3261
Time-resolved EPR study of spin polarization and dynamics of F^+ centres in additively coloured CaO crystals, 3267
EPR, ENDOR and TRIPLE resonance characterization of three paramagnetic redox stages of 5-methyl-5*H*-dibenzo[*a*,*d*]cycloheptene, 3273
Applications of EPR to a study of the hydrogenation of ethene and benzene over a supported Pd catalyst: Detection of free radicals on a catalyst surface, 3341
EPR spectroscopic studies of haemoglobin breakdown in malarial parasite-infected erythrocytes, 3409

Equation of state
Thermophysical properties of liquid *m*-xylene at high pressures, 1217
Equation of state of liquid *o*-xylene at low temperatures and high pressures, 3527

Erythrosin B
Effects of complexation by cyclodextrins on the photoreactivity of Rose Bengal and Erythrosin B. A laser flash photolysis investigation, 2331

ESEM spectroscopy
Pd^{I} location and absorbate interactions in PdH-SAPO-34 studied by EPR and electron spin–echo modulation spectroscopies, 2283

Ethene
Spin-coupled description of organic reaction pathways: The cycloaddition reaction of two ethene molecules, 1643
Hydrogenation of carbon monoxide and ethene over Ni-doped supported Pt catalysts, 2977
Nature of vanadium species on SnO_2–V_2O_5-based catalysts. Chemistry of preparation, characterization, thermal stability and reactivity in ethane oxidative dehydrogenation over V–Sn mixed oxides, 2981

Evanescent wave spectroscopy
Evanescent wave spectroscopy: Application to the study of the spatial distribution of charged groups on an adsorbed polyelectrolyte at the silica/water interface, 1251

EXAFS
EXAFS studies of molecular geometries of some Co^{II} and Co^{III} porphyrins, 2775
EXAFS data analysis for lanthanide sesquioxides, 2783
Reaction mechanism of methane oxidation to synthesis gas over an activated PdY zeolite, 3001
Comparison of the cation environment in polymer electrolytes based on poly(ethylene oxide) and transition-metal bromides, 3549

Excess property
Volumetric properties of steam–carbon dioxide mixtures derived from excess molar enthalpy measurements, 445
Excess volumes of the ternary mixtures butylamine–cyclohexane–benzene and tributylamine–cyclohexane–benzene, 1083
Dielectric behaviour of the *N*,*N*-dimethylformamide–2-methoxyethanol–1,2-dimethoxyethane ternary solvent system from −10 to +20 °C, 1089
Excess molar enthalpies of nitrous oxide–toluene in the liquid and supercritical regions, 2677
Thermodynamics of liquid binary (alkanenitrile–alkane) mixtures. Part 2.—Experimental excess molar heat capacity at 298.15 K and structure in solution, 2913

Excimer formation
Intramolecular excimer formation in 1,5-di-(9-anthryl)-*n*-pentane, 2845

Exciplex
Configuration interaction study of the O_2–C_2H_4 exciplex: Collision-induced probabilities of spin-forbidden radiative and non-radiative transitions, 1479

Excited state
Theoretical potential-energy functions and the rovibronic spectrum of the SiH_2^+ ion, 517
Production of $CH(X\,^2\Pi)$ from the multiphoton dissociation of CH_2CO at wavelengths of 279.3 and 308 nm, 523
Ligand exchanges between ethanol and some amines in excited mercury complexes in the gas phase, 2021

Excluded-volume effect
Modified interpenetration function accounting for the excluded-volume effects in ternary polymer systems, 339

Extended coordination
Enthalpies of transfer of tetrabutylammonium bromide from water to highly aqueous water–methanol, –ethanol, –propan-1-ol and –acetonitrile mixtures at 298 K: Consideration of the extended coordination model solvation parameters, 2691

Far-IR spectroscopy
Far-IR study of the hydrogen-bond vibration of intramolecular bonds in substituted 2-diethylaminomethylphenol *N*-oxides, as a function of the pK_a of the phenolic group, 843

Fast diffusion
Study of fast diffusion in zeolites using a higher harmonic frequency response method, 3011

Fast reaction kinetics
Application of iodine-laser temperature jump to an irreversible enzyme reaction. Reaction of ascorbic acid with hydrogen peroxide catalysed by peroxidase, 3201

$FeCl_3$
Investigation of the nature of the active oxygen intermediate at graphite-supported $SmCl_3$ and $FeCl_3$ working as a cathode for the partial oxidation of alkanes and aromatics, 451

FeOOH
Textures of tetradecahedron δ-FeOOH particles and their thermal decomposition products, 2567

Ferrisilicate
Hydroxy groups in ferrisilicates studied by IR spectroscopy, 2417

Ferrite
Mössbauer study of oxygen-deficient Zn^{II}-bearing ferrites ($Zn_xFe_{3-x}O_{4-d}$, $0 \leqslant x \leqslant 1$) and their reactivity toward CO_2 decomposition to carbon, 1171

$Fe + O_3$ reaction
Kinetic study of the reaction between Fe and O_3 under mesospheric conditions, 31

Film

Growth and electrochemical behaviour of a poly[tricarbonyl(vinylbipyridyl)rhenium chloride] film. Heterogeneous reduction of CO_2, 459
Stability of thin polar films on non-wettable substrates, 625
Acoustic effects on catalytic activities of Cu and Pd thin films combined with piezoelectric lead strontium zirconium titanate activated by low-frequency voltage, 815
Enhancement in the optical CO sensitivity of NiO film by the deposition of ultrafine gold particles, 1011
Valence and core photoemission of the films formed electrochemically on nickel in sulfuric acid, 1271
Growth of a well oriented layer of *p*-nitroaniline on the (100) plane of a *p*-cyanoaniline single crystal, studied by polarized absorption and second-harmonic generation, 3685

Flash photolysis
Effects of protolytic interactions on the photophysics of phenyl pyridyl ketones, 279
Electron transfer from aromatic compounds to phenyliodinium and diphenylsulfinium radical cations, 287
Effects of complexation by cyclodextrins on the photoreactivity of Rose Bengal and Erythrosin B. A laser flash photolysis investigation, 2331
Complexing effects on the excited state of uranyl β-diketonato complexes: Application of the energy gap law, 3253

Flory–Huggins theory
Corrigendum to Sorption of organic solvents into dense silicone membranes. Part 1.—Validity and limitations of Flory–Huggins and related theories, 2001

Flow pattern
Theoretical and experimental study of the flow of condensed molecular monolayers on a Langmuir trough, 493

Fluorescein
Influence of the cetyltrimethylammonium chloride micellar pseudophase on the protolytic equilibria of oxyxanthene dyes at high bulk phase ionic strength, 629

Fluorescence
Role of twisted intramolecular charge-transfer states in the decay of 2-(2′-hydroxyphenyl) benzothiazole following excited-state intramolecular proton transfer, 59
Study of preferential solvation in binary solvent mixtures by the fluorescence-detected magnetic field effect, 109
Fluorescence anisotropy decays and viscous behaviour of 2-methyltetrahydrofuran, 271
Spectroscopic properties of aromatic dicarboximides. Part 1.—N—H and *N*-methyl-substituted naphthalimides, 411
Internal rotation in Auramine O, 697
Photoinduced electron transfer in α-helical poly(L-lysine) carrying randomly distributed donor–acceptor pairs. A kinetic and conformational statistics investigation, 1857
Corrigendum to Sorption of organic solvents into dense silicone membranes. Part 1.—Validity and limitations of Flory–Huggins and related theories, 2001
Fourier-transform detection of singlet oxygen and fluorescence from cell membrane bound porphyrins, 2453
Intrinsically unpolarized fluorescence of C_{60}, 2623
Photoinduced and thermal isomerization processes for bis-oxonols: Rotor volume, stereochemical and viscosity effects, 2627
Spectroscopic properties of aromatic dicarboximides. Part 2.—Substituent effect on the photophysical properties of *N*-phenyl-1,2-naphthalimide, 2635
Luminescence from irradiated butadiene solutions: Fluorescence of allyl radicals?, 2897
Excimer-laser photofragmentation of boron trichloride and its implications for laser vapour deposition and doping processes, 3633

Fluorescence quenching
Singlet quenching of polycyclic aromatic hydrocarbons by polychlorobenzenes in acetonitrile, 69

Fluorescence spectroscopy
Effect of glycerol on the translational and rotational motions in lipid bilayers studied by pulsed-field gradient ^1H NMR, EPR and time-resolved fluorescence spectroscopy, 305
Intramolecular photodimerization of 2-naphthoates: Successful application of hydrophobic forces in the preparation of large-ring compounds, 947
Photophysical studies of substituted porphyrins, 1073
Spectroscopic properties of aromatic dicarboximides. Part 2.—Substituent effect on the photophysical properties of *N*-phenyl-1,2-naphthalimide, 2635

Fluoride ion
$AlPO_4$–Al_2O_3 catalysts with low alumina content. Part IV.—Effect of fluoride ion addition on texture, surface acidity and catalytic performance in cyclohexane and cumene conversions, 2265

Fluorination
Room-temperature catalytic fluorination of C_1 and C_2 chlorocarbons and chlorohydrocarbons on fluorinated Fe_3O_4 and Co_3O_4, 3585

Fluorobenzene
Proton transfer to the fluorine atom in fluorobenzene. Temperature and pressure dependence, 1373

Formation constant
Characterisation behaviour of the complexation of copper(II) with polymer-bound vinylimidazole ligands, 3563

Fractals
Fractal properties of homologous series of structures, 2201

Fragmentation dynamics
Interaction potentials and fragmentation dynamics of the $Ne\cdots Br_2$ complex in the ground and electronically excited states, 3229

Framework substitution
Influence of framework substitution of Al^{3+} by Fe^{3+} on the sorption characteristics of β zeolite, 387

Free-jet microwave spectroscopy
Study of the conformational equilibrium of 1-chlorobutane by free-jets and conventional microwave spectroscopy, 2183

Free radical
Kinetics of thermal decomposition of the diazines: Shock-tube pyrolysis of pyrimidine, 541
Effect of preferential solvation on reactivity of a free radical in binary solvent mixtures, 571
EPR data do not support the P═O representation for triakyl phosphates and phosphine oxides or sulfides, 2649
Luminescence from irradiated butadiene solutions: Fluorescence of allyl radicals?, 2897
Low-temperature kinetics of reactions between neutral free radicals. Rate constants for the reactions of OH radicals with N atoms ($103 \leqslant T/K \leqslant 294$) and with O atoms ($158 \leqslant T/K \leqslant 294$), 3221
Reaction of atomic oxygen with some simple alkenes. Part 1.—Low pressure studies on reactions involving ethene, propene and (*E*)-but-2-ene, 3617

Freezing pressure
Thermodynamic behaviour of liquid *p*-xylene near freezing, 3645

Freon
High-resolution FTIR–jet spectroscopy of CCl_2F_2, 1055

Frequency response
Frequency response analysis for multicomponent diffusion in adsorbents, 369
Frequency response study of single-file diffusion in theta-1, 3017

Friedel–Crafts reaction
Transition structures of the Friedel–Crafts reaction in solution, 1757

FTIR
Intramolecular hydrogen bond and molecular conformation. Part 2.—Effect of pressure and temperature on the IR spectra of some hydroxy ketones, 103
FTIR spectroscopic study of the effects of the sulfur poisons on CO adsorption on Cu/SiO_2 catalysts, 203
Identification of isolated Pt atoms in H-mordenite, 233
Thermogravimetry–FTIR study of the surface formate decomposition on Cu, CuCl, Cu_2O and CuO. Correlations between reaction selectivity and structural properties, 355
Brønsted acid strength in US-Y: FTIR study of CO adsorption, 383
Formation of C_2 oxygenates on rhodium-containing catalysts during CO + H_2 reactions. FTIR study of acetaldehyde adsorption, 501
Voltammetric and subtractively normalized interfacial FTIR study of the adsorption and oxidation of L(+)-ascorbic acid on Pt electrodes in acid medium: Effect of Bi adatoms, 609
FTIR spectroscopic study of the zeolitic adsorption of hydrogen cyanide on acidic sites, 919
FTIR study of the interaction of hydrogen cyanide with alkali-metal ion, silver(I) and nickel(II) ion-exchanged near-faujasite zeolites, 931
FTIR study of carbon monoxide adsorption on ceria: CO_2^{2-} carbonite dianion absorbed species, 1023
FTIR study of adsorption and transformation of methanethiol and dimethyl sulfide on zirconia, 1029
Brønsted acid sites in zeolites. FTIR study of molecular hydrogen as a probe for acidity testing, 1047
Spectroscopic characterization of magnesium vanadate catalysts. Part 2.—FTIR study of the surface properties of pure and mixed-phase powders, 1293
$[(\eta^2\text{-}C_2H_4)Os(CO)_4]$ as a vibrational model for type I′ ethene chemisorbed as a metallacyclopropane on metal surfaces, 1449
ATR-FTIR studies of ion–solvent and ion–ion interactions in divalent-metal perchlorate–acetonitrile solutions, 2697
Ru–Cu/SiO_2 catalysts: Characterization by FTIR spectroscopy, 2809
FTIR study of the influence of sulfate species on the adsorption of NO, CO and NH_3 on CuO/Al_2O_3 catalysts, 2815
IR study of ethene and propene oligomerization on H-ZSM-5: Hydrogen-bonded precursor formation, initiation and propagation mechanisms and structure of the entrapped oligomers, 2827
Investigation of the structure of the columnar liquid-crystalline phase of copper(II) carboxylates. An FTIR spectroscopic study, 2953
Chemisorption of H_2 and H_2–O_2 on polymorphic zirconia, 2969
Nature of vanadium species on SnO_2–V_2O_5-based catalysts. Chemistry of preparation, characterization, thermal stability and reactivity in ethane oxidative dehydrogenation over V–Sn mixed oxides, 2981
Co-deposited Pt–WO_3 electrodes. Part 1.—Methanol oxidation and *in situ* FTIR studies, 3089
FT Raman and FTIR studies of titanias and metatitanate powders, 3181
FTIR studies on the selective oxidation and combustion of light hydrocarbons at metal oxide surfaces. Propane and propene oxidation on $MgCr_2O_4$, 3347
Comparative IR spectroscopic study of low-temperature H_2 and CO adsorption on Na zeolites, 3367
Vibrational spectroscopic study of *N*-acylglycine monomeric and dimeric salts: The long acyl chain effect on the NH (ND) stretch, amide I, amide II and CH_2-Wag modes, 3483
In situ FTIR study of CO–H_2 reactions over Rh/TiO_2 catalysts at high pressure and temperature, 3699

FTIR–jet spectroscopy
High-resolution FTIR–jet spectroscopy of CCl_2F_2, 1055

FT luminescence spectroscopy
Fourier-transform luminescence spectroscopy of solvated singlet oxygen, 1065
FT Raman spectroscopy
FT Raman and FTIR studies of titanias and metatitanate powders, 3181
Fullerenes
Orientational ordering in the solid fullerene oxide: $C_{60}O$, 253
Reaction of molecular oxygen with C_{60}: Spectroscopic studies, 403
Clusters of C_{60} molecules, 1061
Leapfrog transformations and polyhedra of Clar type, 2865
Gas/liquid interface
Irreversible thermodynamic coupling between heat and matter fluxes across a gas/liquid interface, 1865
Gas-phase kinetics
Kinetic study of the reaction between Fe and O_3 under mesospheric conditions, 31
Chemiluminescent reaction of oxygen atoms with dimethyl disulfide and dimethyl sulfide, 825
Ultra-low temperature kinetics of neutral–neutral reactions: Rate constants for the reactions of OH radicals with butenes between 295 and 23 K, 1473
Kinetic study in a microwave-induced plasma afterglow of the Cu($4\,^2$S) atom reaction with N_2O from 458 to 980 K and with NO_2 from 303 to 762 K, 2003
The Polayni Lecture, The colourful world of complex-forming bimolecular reactions, 2303
Pressure and temperature dependence of the rate constants for the association reaction of OH radicals with NO between 301 and 23 K, 3609
Reaction of atomic oxygen with some simple alkenes. Part 1.—Low pressure studies on reactions involving ethene, propene and (*E*)-but-2-ene, 3617
Reaction of atomic oxygen with some simple alkenes. Part 2.—Reaction pathways involving ethene, propene and (*E*)-but-2-ene at atmospheric pressure, 3625
Gas-phase reaction
Phosphate ester hydrolysis: Calculation of gas-phase reaction paths and solvation effects, 1763
Ab initio quantum chemistry study of the gas-phase reaction of ClO with HO_2, 1811
Gas-phase spectroscopy
Gas-phase IR spectrum of 7-azaindole. Scaled quantum mechanical force field and complete spectrum assignment, 3213
Gel
Computer simulation of particle gel formation, 173
Forces of inertia acting on the aqueous pore fluid of anionic polyelectrolyte gels, 875
Micellisation and gelation of triblock copolymer of ethylene oxide and ε-caprolactone, $CL_nE_mCL_n$, in aqueous solution, 1961
Gel to liquid crystal transition
Gel to liquid crystal transitions for vesicles in aqueous solutions prepared using mixtures of sodium dialkylphosphates $(R^1O)(R^2O)PO_2^-Na^+$ and $(R^2O)_2PO_2^-Na^+$, where $R^1 = C_{10}H_{21}$, $R^2 = C_{14}H_{29}$ or $C_{18}H_{37}$ and $R^3 = C_{12}H_{25}$, $C_{14}H_{29}$, $C_{16}H_{33}$ or $C_{18}H_{37}$, 2709
Geometry calculation
Concerted and stepwise mechanisms in cycloaddition reactions: Potential surfaces and isotope effects, 1599
Theoretical kinetic isotope effects for the hydride-transfer step in lactate dehydrogenase, 1703
Delft molecular mechanics: A new approach to hydrocarbon force fields. Inclusion of a geometry-dependent charge calculation, 2881
Gibbs energy
Cyclodextrin–monosaccharide interactions in water, 845
Transfer Gibbs Energies for ClO_3^-, BrO_3^-, IO_3^-, ClO_4^- and IO_4^- anions for water–acetonitrile and water–*tert*-butyl alcohol mixtures, 855
Effect of preferential solvation on Gibbs energies of ionic transfer, 2037
Thermodynamic studies on the interaction of *n*-alkyltrimethylammonium bromides with anionic polypeptides in aqueous solution, 2511
Glass-transition temperature
Glass transition of liquid-crystalline 4-alkoxyphenyl and 4-cyanophenyl 4-(2,4-dialkoxybenzoyloxy) benzoates, 1537
Glucose
Direct observation of native and unfolded glucose oxidase structures by scanning tunnelling microscopy, 2057
Mean activity coefficients of NaCl in glucose–water and sucrose–water mixtures at 298.15 K, 3281
Graphite
Investigation of the nature of the active oxygen intermediate at graphite-supported $SmCl_3$ and $FeCl_3$ working as a cathode for the partial oxidation of alkanes and aromatics, 451
Scanning tunnelling microscopy of various alkanols and an alkanethiol adsorbed onto graphite, 2551
Aromatic character of graphite intercalation compounds, 3513
Graph theory
Fractal properties of homologous series of structures, 2201
Leapfrog transformations and polyhedra of Clar type, 2865
Group 6 metal hexacarbonyl
Vibrational spectroscopic analysis of Group 6 metal hexacarbonyls in the solid state, 1265
Group additivity analysis
Some thermodynamic properties of aqueous amino acid systems at 288.15, 298.15, 313.15 and 328.15 K; group additivity analyses of standard-state volumes and heat capacities, 2027
Guest ion
Direct observation of aluminium guest ions in the silicate phases of cement minerals by ^{27}Al MAS NMR spectroscopy, 2095
H_2CO
Configuration interaction studies on the S_2 surface of H_2CO: $2\,^1A'(\sigma, \pi^*/\pi, \pi^*)$ as perturber of $1\,^1B_2(n, 3s)$, 683
Haemoglobin
Proton ENDOR from randomly oriented NO-ligated haemoglobin: Approaching the structural basis for the R–T transition, 3077
EPR spectroscopic studies of haemoglobin breakdown in malarial parasite-infected erythrocytes, 3409
Halogenated aromatic compound
Pulse radiolysis study of the reactions of $SO_4^{\cdot-}$ with some substituted benzenes in aqueous solution, 597
Carbon–halogen second-order quadrupolar and indirect spin–spin coupling effects in high-resolution ^{13}C NMR spectra of halobenzenes, 3729
1-Halogeno-4-propoxythioxanthones
Photochemistry and photocuring activity of novel 1-halogeno-4-propoxythioxanthones, 83
2-Halogenoethanethiol
Molecular conformations and rotation barriers of 2-halogenoethanethiols and 2-halogenoethanols: An *ab initio* study, 1211
2-Halogenoethanol
Molecular conformations and rotation barriers of 2-halogenoethanethiols and 2-halogenoethanols: An *ab initio* study, 1211
Hammett equations
Redox properties of ubiquinone (UQ_{10}) adsorbed on a mercury electrode, 1913
Harmonic force field
Microwave spectrum of sulfuryl chloride fluoride, SO_2ClF: Structure, hyperfine constants and harmonic force field, 2601
Hartree–Fock theory
Further studies on the polarizabilities and hyperpolarizabilities of the substituted polyenes and polyphenyls, 2617
Ionization radii of compressed atoms, 3377
H–D exchange
Study of the structure-breaking effect in aqueous CsCl solutions based on H_2O/D_2O isotope effects on transport coefficients and microdynamical properties, 849
Reactivity of zeolite hydroxy groups toward σ-donor bases. H–D exchange with 3-methylpentane, 2297
Corrigendum to Reactivity of zeolite hydroxy groups toward σ-donor bases. H–D exchange with 3-methylpentane, 3733
Heat capacity
Some thermodynamic properties of aqueous amino acid systems at 288.15, 298.15, 313.15 and 328.15 K; group additivity analyses of standard-state volumes and heat capacities, 2027
Heat–mass effect
Irreversible thermodynamic coupling between heat and matter fluxes across a gas/liquid interface, 1865
Hessian eigenvector
Gradient-line reaction paths for 1,2 H shift reactions in phosphinonitrene and formaldehyde, and H_2 elimination from formaldehyde, 1839
Hetero-association
Graphic method for the determination of the complex NMR shift and equilibrium constant for a hetero-association accompanying a self-association, 429
Heterocoagulation
Kinetics of heterocoagulation. Part 4.—Evaluation of absolute coagulation rate constants using a classical light scattering technique, 167
Heterogeneous catalysis
Superbase character of alumina loaded with potassium by impregnation from ammoniacal solution, 187
IR spectra and the structures of the chemisorbed species resulting from the adsorption of the linear butenes on a Pt/SiO_2 catalyst. Part 1.—Temperature dependence of the spectra, 507
IR spectra and the structures of the chemisorbed species resulting from the adsorption of the linear butenes on a Pt/SiO_2 catalyst. Part 2.—Spectra of the hydrogenated surface species as a function of temperature, 513
DRIFT and mass spectrometric experiments on the chemistry and catalytic properties of small Ir clusters at the surfaces of polycrystalline α-Al_2O_3, 787
Adsorption and decomposition of methanol on TiO_2, $SrTiO_3$ and SrO, 1015
Heterogeneous catalysis in solution. Part 27.—Reaction between titanium(III) and triiodide ions catalysed by platinum, 1983
Hydrogenation behaviour over SiO_2-supported lanthanide–palladium bimetallic catalysts with considerable hydrogen uptake, 2119
Heteropolyacid
Physiochochemical and catalytic properties of polyaniline protonated with 12-molybdophosphoric acid, 2099
Hexacyanoferrate(III)
Kinetics of reduction of hexacyanoferrate(III) by thiosulfate ions mediated by ruthenium dioxide hydrate, 1429
High-energy electron tracks
Singlet and triplet excited-state formation in high-energy electron tracks in liquid *cis*- and *trans*-decalin as studied by product formation in radiolysis and photolysis, 2459
Higher harmonic frequency response
Study of fast diffusion in zeolites using a higher harmonic frequency response method, 3011
High-pressure thermodynamics
Application of simple expressions for the high-pressure volumetric behaviour of liquid mesitylene, 553
High-resolution electron microscopy
High-resolution electron microscopy studies of a microporous carbon produced by arc-evaporation, 2799
Characterization of carbon-supported ruthenium–tin catalysts by high-resolution electron microscopy, 2803
High temperature
High surface area alumina aerogel at elevated temperatures, 2573
HOBr
Photolysis of HOBr and DOBr at 266 nm: OH

and OD product-state distributions, 817
Host–guest complex
Host–guest complexes of cucurbituril with the 4-methylbenzylammonium ion; alkali-metal cations and NH_4^+, 1507
Hydrated electron
Temperature dependence of the rate constant for the reaction e_{aq}^- + OH in water up to 150 °C, 837
Electron processes in AOT reverse micelles. Part 1.—Absorption spectra and lifetimes of hydrated electrons as studied by pulse radiolysis, 3411
Hydrated fused salts
Conductivity and dielectric relaxation in hydrated fused salts, 2065
Hydration model
Hydration of polar interfaces. A generalised mean-field model, 1941
Hydride-transfer reaction
Theoretical kinetic isotope effects for the hydride-transfer step in lactate dehydrogenase, 1703
Hydrocarbon force field
Delft molecular mechanics: A new approach to hydrocarbon force fields. Inclusion of a geometry-dependent charge calculation, 2881
Hydrogel
Enzyme catalysis at hydrogel-modified electrodes with soluble redox mediator, 987
Relaxation and crystallisation of water in a hydrogel, 1143
Hydrogen
High-temperature diffusion of hydrogen and deuterium in palladium, 899
Solubility of hydrogen and deuterium in Ti_3Al, 1355
Effects of hydrogen and deuterium concentration on measurements of the solubility and diffusivity of hydrogen isotopes in yttrium, 1979
Diffusion of hydrogen in Ti_3Al, 2423
Hydrogenation
Mechanism of branched carbon-chain formation from CO and H_2 over oxide catalysts. Part 1.—Adsorbed species on ZrO_2 and CeO_2 during CO hydrogenation, 911
Characterization of several γ-alumina-supported nickel catalysts and activity for selective hydrogenation of hexanedinitrile, 1455
Hydrogenation behaviour over SiO_2-supported lanthanide–palladium bimetallic catalysts with considerable hydrogen uptake, 2119
Applications of EPR to a study of the hydrogenation of ethene and benzene over a supported Pd catalyst: Detection of free radicals on a catalyst surface, 3341
Hydrogen-atom transfer
Laser flash photolysis studies on hydrogen-atom transfer from the triplet hydroxynaphthylammonium ion to benzophenone *via* a triplet exciplex. Which group is more reactive for hydrogen atom transfer, —OH or —NH_3^+?, 533
Hydrogen bond
Intramolecular hydrogen bond and molecular conformation. Part 2.—Effect of pressure and temperature on the IR spectra of some hydroxy ketones, 103
IR and NMR studies of hydrogen bonding in hexan-1-ol–tetrabutylammonium iodide solutions in the temperature range 28–145 °C and in tetrachloromethane, 297
Structures and vibrational spectra of $CH_3OCH_2CH_2OH$: The hydrogen-bonded conformers, 689
Far-IR study of the hydrogen-bond vibration of intramolecular bonds in substituted 2-diethylaminomethylphenol *N*-oxides, as a function of the pK_a of the phenolic group, 843
Active site of bacteriorhodopsin. FTIR and ^1H NMR studies using a model molecule, 1095
Nature of hydrogen bonds formed by phenol derivatives and *N*,*N*-dimethylaniline in aprotic solvents: Low-temperature NMR studies, 1411
Spectrochemistry of solutions. Part 27.—Formation of $[Mg(NCS)]^+$ in solutions of $Mg(NCS)_2$ in methanol, 2351
Ab initio study of the molecular structure, polarizability and first hyperpolarizability of 6-hydroxy-1-formylfulvene, 2873
Intramolecular hydrogen bond and molecular conformation. Part 3.—Effect of temperature and pressure on the IR spectra of *o*-halophenols in dilute solutions, 3065
Hydrogen peroxide
Mechanism of bleaching by peroxides. Part 3.—Kinetics of the bleaching of phenolphthalein by transition-metal salts in high pH peroxide solutions, 1105
Hydrogen shift
Introductory Lecture: Electrostatic acceleration of the 1,5-H shifts in cyclopentadiene and in penta-1,3-diene by Li^+ complexation: Aromaticity of the transition structures, 1559
Ring–chain rearrangements of phosphirane, 1771
Gradient-line reaction paths for 1,2 H shift reactions in phosphinonitrene and formaldehyde, and H_2 elimination from formaldehyde, 1839
Corrigendum to Introductory Lecture: Electrostatic acceleration of the 1,5-H shifts in cyclopentadiene and in penta-1,3-diene by Li^+ complexation: Aromaticity of the transition structures, 3471
Hydrolysis
Enzymatic reaction in water-in-oil microemulsions. Part 2.—Rate of hydrolysis in a hydrophobic substrate, 2-naphthyl acetate, 979
Solid-state hydrolysis of aspirin, 997
Phosphate ester hydrolysis: Calculation of gas-phase reaction paths and solvation effects, 1763
Hydroperoxy radical
Ab initio quantum chemistry study of the gas-phase reaction of ClO with HO_2, 1811
Hydrophobicity
General thermodynamic analysis of the dissolution of non-polar molecules into water. Origin of hydrophobicity, 1513
Hydroxyapatite
^{31}P and ^1H powder ENDOR and molecular orbital study of a CO_3^{3-} ion in X-irradiated carbonate containing hydroxyapatites, 2653
Rotating-disc electrode voltammetry as a probe of adsorption rates on solid particles in liquids. Application to Zn^{II} adsorption at the hydroxyapatite/aqueous interface, 3109
Dissolution of synthetic hydroxyapatite in the presence of lanthanum ions, 3405
Hydroxy group
Hydroxy groups in ferrisilicates studied by IR spectroscopy, 2417
Hydroxyl radical
Temperature dependence of the rate constant for the reaction e_{aq}^- + OH in water up to 150 °C, 837
Hyperfine coupling constant
NMR determination of EPR hyperfine coupling constants of some 5-(*n*-alkyl)-1,1,3,3-tetrakis(trideuteriomethyl)-isoindolin-2-yloxyls, 2345
Hyperpolarizability
Non-linear optical properties of organic molecules. Part 13.—Calculation of the structure and frequency-dependent hyperpolarisability of a blue azothiophene dye, 1849
Non-linear optical properties of organic molecules. Part 14.—Calculations of the structure, electronic properties and hyperpolarisabilities of cyclopentadienylpyridines, 1853
Theoretical studies of the electronic structure, conformations, spectra and hyperpolarisabilities of squarates and related molecules, 2319
Further studies on the polarizabilities and hyperpolarizabilities of the substituted polyenes and polyphenyls, 2617
Ab initio study of the molecular structure, polarizability and first hyperpolarizability of 6-hydroxy-1-formylfulvene, 2873
Hypoiodous acid
Kinetics of disproportionation of hypoiodous acid, 3639
Iminophosphane
Spectroscopic investigations on iminophosphanes and methylenephosphanes, 2611
Immersion
Water adsorption in carbons described by the Dubinin–Astakhov and Dubinin–Serpinski equations, 3689
Impedance
Adsorption of dialkyl derivatives of thiourea from an ethanol solution at a mercury electrode, 3545
Impedance spectroscopy
Distribution of electrolytes between membraneous and bulk phases, and the dielectric properties of membraneous water, studied by impedance spectroscopy measurements on dense cellulose acetate membranes, 2381
Determination of some electrical parameters for $UO_2(O_3PC_6H_5)$ films deposited on a porous support, 3103
Inclusion
Conformational and vibrational properties of α,ω-dihalogenoalkane/urea inclusion compounds: A Raman scattering investigation, 1313
Light stability of β-cyclodextrin inclusion complex of a cyanine dye, 3517
Indigo Carmine
Two-step reduction of Indigo Carmine by dithionite: A stopped-flow study, 2525
Indole-5-carboxylic acid
Electropolymerisation of indole-5-carboxylic acid, 1121
Inelastic scattering
Rotational excitations of NH_4^+ ions in dilute solutions in alkali-metal halide lattices, 1149
Inelastic neutron scattering study of NH_4Y zeolites, 1191
A multiple hard-ellipsoid model for rotationally inelastic collisions, 2857
Neutron scattering study of protonic species in ammonium pentamolybdate, $(NH_4)MO_{5.33}H_3O_{18}$, 3579
Inertia
Forces of inertia acting on the aqueous pore fluid of anionic polyelectrolyte gels. 875
Insertion
Characterization of the intermediates formed in the reaction of Al atoms with H_2O, H_2S and H_2Se by EPR spectroscopy, 3145
Integral equation
Integral equation theory for associating liquids: Highly asymmetric electrolytes, 1245
Interatomic potential
Derivation of interatomic potentials for microporous aluminophosphates from the structure and properties of berlinite, 3175
Intercalation
Stepwise growth of size-confined CdS in the two-dimensional hydrophilic interlayers of Langmuir–Blodgett films by the repeated sulfidation–intercalation technique, 349
Aromatic character of graphite intercalation compounds, 3513
Interface
Hydration of polar interfaces. A generalised mean-field model, 1941
Surface chemistry and microemulsion formation in systems containing dialkylphthalate esters as oils, 2743
Entropy change in the two-dimensional phase transition of adenine adsorbed at the Hg electrode/aqueous solution interface, 2925
Interfacing electronic structure theory
Variational transition-state theory and semiclassical tunnelling calculations with interpolated corrections: A new approach to interfacing electronic structure theory and dynamics for organic reactions, 1715
Interhalogen
Transition vector symmetry and the internal pseudo-rotation and inversion paths of ClF_4^+, 1831
Intermetallic compound
Solubility of hydrogen and deuterium in Ti_3Al, 1355
Intermolecular potential
A multiple hard-ellipsoid model for rotationally inelastic collisions, 2857
Internal rotation

Internal rotation in Auramine O, 697

Intervalence adduct

Solid-state conductivities of CPQ [1,1'-bis(*p*-cyanophenyl)-4,4'-bipyridilium] salts, redox-state mixtures and a new intervalence adduct, 1127

Intracrystalline diffusion

Intracrystalline diffusion of benzene in microporous gallosilicate with MFI structure, 2585

Iodate

Pulse radiolysis of iodate in aqueous solution, 831

Iodine

Heterogeneous catalysis in solution. Part 27.—Reaction between titanium(III) and triiodide ions catalysed by platinum, 1983

Kinetics of disproportionation of hypoiodous acid, 3639

Iodine-laser temperature jump

Application of iodine-laser temperature jump to an irreversible enzyme reaction. Reaction of ascorbic acid with hydrogen peroxide catalysed by peroxidase, 3201

Ion

Transition-state theory treatment of capture collisions between ions and symmetric top dipolar molecules, 3061

Ion exchange

FTIR study of the interaction of hydrogen cyanide with alkali-metal ion, silver(I) and nickel(II) ion-exchanged near-faujasite zeolites, 931

Solid-state ion exchange in zeolites. Part 5.—NH_4-Y-iron(II) chloride, 1329

Adsorption of benzene on the acidic and basic sites of KH β zeolite studied by *in situ* spectroscopy, 1351

Selective oxidative coupling of methane catalysed over hydroxyapatite ion-exchanged with lead, 2133

Preparation and characterization of multiple ion-exchanged Pt/TiO_2 catalysts, 2277

Ionic solid

Normal and anomalous positronium states in ionic and molecular solids investigated *via* magnetic field effects, 1501

Ion–ion interaction

ATR-FTIR studies of ion–solvent and ion–ion interactions in divalent-metal perchlorate–acetonitrile solutions, 2697

Ionization constant

Influence of the cetyltrimethylammonium chloride micellar pseudophase on the protolytic equilibria of oxyxanthene dyes at high bulk phase ionic strength, 629

Ionization radius

Ionization radii of compressed atoms, 3377

Ion–molecule reactions

EPR studies of the formation of alkene cations due to ion–molecule reactions in the 77 K radiolysis of pentane and hexane containing additives, 2901

Ion pair formation

Spectrochemistry of solutions. Part 26.—Alkali-metal and alkaline-earth-metal thiocyanates in dimethylformamide and acetonitrile solutions: Hot bands, stability constants and thermicity for the formation of inner- and outer-sphere ion pairs, 315

Ion partial molar volume

Ionic partial molar volumes in non-aqueous solvents, 1899

Ion transfer

Effect of preferential solvation on Gibbs energies of ionic transfer, 2037

Ion yield

Marcus inverted region: Nature of donor–acceptor pairs and free ion yields, 2481

IR

Superbase character of alumina loaded with potassium by impregnation from ammoniacal solution, 187

IR and NMR studies of hydrogen bonding in hexan-1-ol–tetrabutylammonium iodide solutions in the temperature range 28–145 °C and in tetrachloromethane, 297

Spectrochemistry of solutions. Part 26.—Alkali-metal and alkaline-earth-metal thiocyanates in dimethylformamide and acetonitrile solutions: Hot bands, stability constants and thermicity for the formation of inner- and outer-sphere ion pairs, 315

Reaction of molecular oxygen with C_{60}: Spectroscopic studies, 403

IR spectra and the structures of the chemisorbed species resulting from the adsorption of the linear butenes on a Pt/SiO_2 catalyst. Part 1.—Temperature dependence of the spectra, 507

IR spectra and the structures of the chemisorbed species resulting from the adsorption of the linear butenes on a Pt/SiO_2 catalyst. Part 2.—Spectra of the hydrogenated surface species as a function of temperature, 513

IR studies of cerium dioxide: Influence of impurities and defects, 653

Al-Pillared saponites. Part 1.—IR studies, 667

IR and submillimetre-wave spectra of doped poly(*p*-phenylene vinylene), 879

CoAPO molecular sieve acidity investigated by adsorption calorimetry and IR spectroscopy, 1033

Spectroscopic characterization of magnesium vanadate catalysts. Part 1.—Vibrational characterization of $Mg_3(VO_4)_2$, $Mg_2V_2O_7$ and MgV_2O_6 powders, 1161

Reactivity of zeolite hydroxy groups toward σ-donor bases. H–D exchange with 3-methylpentane, 2297

Vibrational relaxation of the ν(C=O) mode of ethyl trichloroacetate in solution, 2325

Hydroxy groups in ferrisilicates studied by IR spectroscopy, 2417

Acid properties of a ZSM-20-type zeolite, 2837

Oxotungsten(V) and (VI) complexes of 1,3-dimethyllumazine as models for the tungstopterin cofactor, 2909

Microwave spectrum of tetrolyl fluoride, 3023

Intramolecular hydrogen bond and molecular conformation. Part 3.—Effect of temperature and pressure on the IR spectra of *o*-halophenols in dilute solutions, 3065

Effects of dry-air calcination on the physico-chemical and catalytic properties of HZSM-5 zeolite, 3191

Gas-phase IR spectrum of 7-azaindole. Scaled quantum mechanical force field and complete spectrum assignment, 3213

IR spectroscopic study of CD_3CN adsorbed on ALPO-18 molecular sieve and the solid acid catalysts SAPO-18 and MeAPO-18, 3455

Chemistry of NO_2^+ in association with water clusters, 3469

Molecular structures of *cis*- and *trans*-*S*-ethyl thiocrotonate. A combined vibrational spectroscopic and *ab initio* SCF-MO study, 3491

Equilibrium geometry and vibrational frequencies of the 1:2 van der Waals complexes between methyl chloride and hydrogen chloride, 3601

Samarium oxide catalyst: Formation, characterization and activity towards propan-2-ol decomposition. An IR spectroscopic study, 3693

Corrigendum to Reactivity of zeolite hydroxy groups toward σ-donor bases. H–D exchange with 3-methylpentane, 3733

Iron

Characterisation of iron/titanium oxide photocatalysts. Part 2.—Surface studies, 2257

Iron(II)–imidazole complex

One-electron oxidation of iron(II)–imidaxole and iron(II)–bis[imidazol-2-yl]methane complexes: A pulse radiolysis study, 2467

Iron hydroxyphosphate

Thermal behaviour and physico-chemical characterization of synthetic and natural iron hydroxyphosphates, 3335

Iron recombination reaction

Experimental and theoretical study of the reaction $Fe + O_2 + N_2 \rightarrow FeO_2 + N_2$, 395

Isomerization

Photoinduced and thermal isomerization processes for bis-oxonols: Rotor volume, stereochemical and viscosity effects, 2627

Isopolymolybdate

Neutron scattering study of protonic species in ammonium pentamolybdate, $(NH_4)MO_{5.33}H_3O_{18}$, 3579

Isotherm

Influence of framework substitution of Al^{3+} by Fe^{3+} on the sorption characteristics of β zeolite, 387

Isothermal compressibility

Thermophysical properties of liquid *m*-xylene at high pressures, 1217

Isotope effect

Concerted and stepwise mechanisms in cycloaddition reactions: Potential surfaces and isotope effects, 1599

Dynamics calculations and isotopic effect in $O + OH(D) \rightarrow O_2 + H(D)$ at low energies, 2189

Isotope exchange

^{18}O tracer studies of CO oxidation with O_2 on MoO_3. Part 3.—Reaction mechanism of oxygen isotope exchange between CO_2 and MoO_3, 3449

Isotopomer

Non-reactive interaction of ammonia and molecular chlorine: Rotational spectrum of the 'charge-transfer' complex $H_3N\cdots Cl_2$, 3205

Isotropic rotational diffusion model

Neutron scattering study of protonic species in ammonium pentamolybdate, $(NH_4)MO_{5.33}H_3O_{18}$, 3579

Kinetics

Kinetic study of the reaction between Fe and O_3 under mesospheric conditions, 31

Kinetics of heterocoagulation. Part 4.—Evaluation of absolute coagulation rate constants using a classical light scattering technique, 167

Reactivity of some square-planar palladium(II) complexes in aqueous solution and in heptane–AOT–water microemulsions, 311

Rate constants of the positronium oxidation reaction promoted by several caged and open Co^{III} complexes, 423

Kinetics of thermal decomposition of the diazines: Shock-tube pyrolysis of pyrimidine, 541

Temperature dependence of the rate constant for the reaction e^-_{aq} + OH in water up to 150 °C, 837

Cationic micellar effect on the kinetics of the protolysis of aromatic carboxylic acids studied by the ultrasonic absorption method, 869

Investigation into the kinetics and mechanism of the reaction of NO_3 with CH_3 and CH_3O at 298 K between 0.6 and 8.5 Torr: Is there a chain decomposition mechanism in operation?, 1197

Investigation into the kinetics and mechanism of the reaction of NO_3 with CH_3O_2 at 298 K and 2.5 Torr: A potential source of OH in the night-time troposphere?, 1205

Mechanism of atmospheric oxidation of 1,1,1,2-tetrafluoroethane (HFC 134a), 1819

Kinetics of self-replicating micelles, 1953

Heterogeneous catalysis in solution. Part 27.—Reaction between titanium(III) and triiodide ions catalysed by platinum, 1983

Kinetic study of double-helix formation and double-helix dissociation of polyadenylic acid, 2359

Kinetics of reductive dissolution of sodium bismuthate by Ce^{III} and Mn^{II} ions, 2939

Non-isothermal crystallization from liquid solutions: Effect of heat of crystallization on growth rate, 2945

Reaction of H_2S with OH and a study of the HSO and SOH isomers. High-level *ab initio* calculations, 3051

Low-temperature kinetics of reactions between neutral free radicals. Rate constants for the reactions of OH radicals with N atoms ($103 \leqslant T/K \leqslant 294$) and with O atoms ($158 \leqslant T/K \leqslant 294$), 3221

Kinetics of disproportionation of hypoiodous acid, 3639

Relation between the surface states of oxide films at Rh electrodes and kinetics of the oxygen evolution reaction, 3669

Dissolution of amorphous aluminosilicate zeolite precursors in alkaline solutions. Part 3.—Influence of temperature on the dissolution process, 3725

Lamellar phase

Bilayer phases in aqueous mixtures of

dodecylpentaoxyethylene glycol monoether ($C_{12}E_5$) and sodium decyl sulfonate ($C_{10}SO_3Na$), 471
Langmuir–Blodgett film
Stepwise growth of size-confined CdS in the two-dimensional hydrophilic interlayers of Langmuir–Blodgett films by the repeated sulfidation–intercalation technique, 349
Theoretical and experimental study of the flow of condensed molecular monolayers on a Langmuir trough, 493
Formation and structure of Langmuir–Blodgett films of C_{60} and arachidic acid, 969
Structure and linear dichroism of Langmuir–Blodgett films of uracilic amphiphiles, 3129
Lanthanide oxide
EXAFS data analysis for lanthanide sesquioxides, 2783
Oxidative coupling of methane over La_2O_3. Influence of catalyst preparation on surface properties and steady and oscillating reaction behaviour, 3357
Laser flash photolysis
Laser flash photolysis studies on hydrogen-atom transfer from the triplet hydroxynaphthylammonium ion to benzophenone *via* a triplet exciplex. Which group is more reactive for hydrogen atom transfer, $-OH$ or $-NH_3^+$?, 533
Photophysical studies of substituted porphyrins, 1073
Ultra-low temperature kinetics of neutral–neutral reactions: Rate constants for the reactions of OH radicals with butenes between 295 and 23 K, 1473
Laser-induced fluorescence
Experimental and theoretical study of the reaction $Fe + O_2 + N_2 \rightarrow FeO_2 + N_2$, 395
Production of $CH(X\,^2\Pi)$ from the multiphoton dissociation of CH_2CO at wavelengths of 279.3 and 308 nm, 523
Photolysis of HOBr and DOBr at 266 nm: OH and OD product-state distributions, 817
Investigation into the kinetics and mechanism of the reaction of NO_3 with CH_3 and CH_3O at 298 K between 0.6 and 8.5 Torr: Is there a chain decomposition mechanism in operation?, 1197
Investigation into the kinetics and mechanism of the reaction of NO_3 with CH_3O_2 at 298 K and 2.5 Torr: A potential source of OH in the night-time troposphere?, 1205
Laser-induced fluorescence spectroscopy of ethyl and methyl *p*-aminobenzoate van der Waals complexes with non-polar solvents (CH_4, C_2H_6 and CF_4), 2443
Laser-induced grating spectroscopy
Laser-induced grating spectroscopy, 1
Laser-induced Kerr effect
Optically induced Kerr constants for a homologous series of alk-1-enes and three alkadienes, 55
Laser photolysis
Excimer-laser photofragmentation of boron trichloride and its implications for laser vapour deposition and doping processes, 3633
Latex
Formation of two-dimensional structures from colloidal particles on fluorinated oil substrate, 2077
Lattice dynamics
Rotational excitations of NH_4^+ ions in dilute solutions in alkali-metal halide lattices, 1149
Leapfrog transformation
Leapfrog transformations and polyhedra of Clar type, 2865
Lewis-acid
Acid properties of a ZSM-20-type zeolite, 2837
IR spectroscopic study of CD_3CN adsorbed on ALPO-18 molecular sieve and the solid acid catalysts SAPO-18 and MeAPO-18, 3455
Li_3
Virial theorem decomposition as a tool for comparing and improving potential-energy surfaces: Ground-state Li_3, 1381
Li^+ complexation
Introductory Lecture: Electrostatic acceleration of the 1,5-H shifts in cyclopentadiene and in penta-1,3-diene by Li^+ complexation: Aromaticity of the transition structures, 1559
Corrigendum to Introductory Lecture: Electrostatic acceleration of the 1,5-H shifts in cyclopentadiene and in penta-1,3-diene by Li^+ complexation: Aromaticity of the transition structures, 3471
Ligand
Ligand exchanges between ethanol and some amines in excited mercury complexes in the gas phase, 2021
Ligand-controlled oxidation state ambivalence in copper–quinone complexes. Replacement of N-donor by S-donor ligands favours the copper(I)–semiquinone over the copper(II)–catecholate form, 2905
Light irradiation
Studies of light-induced nickel EPR signals in *desulfovibrio gigas* hydrogenase, 2921
Light scattering
Kinetics of heterocoagulation. Part 4.—Evaluation of absolute coagulation rate constants using a classical light scattering technique, 167
Determination of aggregate structures by combined light-scattering and rheological studies, 2085
Linear dichroism
Structure and linear dichroism of Langmuir–Blodgett films of uracilic amphiphiles, 3129
Lipid bilayer
Effect of glycerol on the translational and rotational motions in lipid bilayers studied by pulsed-field gradient ^1H NMR, EPR and time-resolved fluorescence spectroscopy, 305
Liquid crystal
Investigation of the structure of the columnar liquid-crystalline phase of copper(II) carboxylates. An FTIR spectroscopic study, 2953
X-Ray investigations on liquid-crystalline copolysiloxanes for second-harmonic generation, 3331
Description of cubic liquid-crystalline structures using simple surface foliations, 3423
Determination of orientational order parameters in liquid crystals from temperature-dependent ^{13}C NMR experiments, 3433
Liquid/liquid interface
Differential capacitance of liquid/liquid interfaces: Effect of electrolytes present in each phase, 143
Redox electrocatalysis by tetracyanoquinodimethane in phospholipid monolayers adsorbed at a liquid/liquid interface, 2517
Liquid lithium
Solutions of aluminium in liquid lithium: Electrical resistivity of liquid alloys, 2753
Liquid region
Excess molar enthalpies of nitrous oxide–toluene in the liquid and supercritical regions, 2677
Liquid water
Rotational dynamics in liquid water: A simulation study of librational motions, 1405
Low-energy electron diffraction
Growth and structure of ZnO_x overlayers on Cu(100), 3443
Lubricant
Application of matched spin probes to the investigation of the overall motion of model lubricant molecules, 2547
Luminescence
Luminescence from irradiated butadiene solutions: Fluorescence of allyl radicals?, 2897
Magnesium oxide
Oxygen exchange between magnesium oxide surface and carbon dioxide, 803
Photoluminescence spectra resulting from hydroxy groups on magnesium oxide supported on silica, 2107
Surface colour centres on magnesium oxide generated by magnesium and alkali-metal doping, 3167
Magnesium vanadate
Spectroscopic characterization of magnesium vanadate catalysts. Part 1.—Vibrational characterization of $Mg_3(VO_4)_2$, $Mg_2V_2O_7$ and MgV_2O_6 powders, 1161
Spectroscopic characterization of magnesium vanadate catalysts. Part 2.—FTIR study of the surface properties of pure and mixed-phase powders, 1293
Magnetic field effect
Normal and anomalous positronium states in ionic and molecular solids investigated *via* magnetic field effects, 1501
Malarial parasite
EPR spectroscopic studies of haemoglobin breakdown in malarial parasite-infected erythrocytes, 3409
Manganese(II) ions
Kinetics of reductive dissolution of sodium bismuthate by Ce^{III} and Mn^{II} ions, 2939
Marcus theory
Photoelectrochemistry using quinone radical anions, 2249
Marcus inverted region: Nature of donor–acceptor pairs and free ion yields, 2481
MAS NMR
Synthesis of SAPO-34: High silicon incorporation in the presence of morpholine as template, 2291
Mass action law
Does mass action law breakdown occur in small thermodynamic systems?, 2353
Mass spectrometry
DRIFT and mass spectrometric experiments on the chemistry and catalytic properties of small Ir clusters at the surfaces of polycrystalline α-Al_2O_3, 787
Protonated carbamic acid. Collisional activation and unimolecular dissociation of $CH_4NO_2^+$, 941
Matrix isolation
Characterization of the intermediates formed in the reaction of Al atoms with H_2O, H_2S and H_2Se by EPR spectroscopy, 3145
EPR study of $NaCl:CO_2^-$ and $NaCl:SO_2^-$, 3261
Matrix method
Directional symmetry of the time lag for downstream absorptive permeation studied by the matrix method, 2765
McMillan theory
Glass transition of liquid-crystalline 4-alkoxyphenyl and 4-cyanophenyl 4-(2,4-dialkoxybenzoyloxy) benzoates, 1537
Mechanistic study
^{18}O tracer studies of CO oxidation with O_2 on MoO_3. Part 3.—Reaction mechanism of oxygen isotope exchange between CO_2 and MoO_3, 3449
Membrane
Corrigendum to Sorption of organic solvents into dense silicone membranes. Part 1.—Validity and limitations of Flory–Huggins and related theories, 2001
Water distillation through poly(tetrafluoroethylene) hydrophobic membranes in a stirred cell, 2043
Distribution of electrolytes between membraneous and bulk phases, and the dielectric properties of membraneous water, studied by impedance spectroscopy measurements on dense cellulose acetate membranes, 2381
Directional symmetry of the time lag for downstream absorptive permeation studied by the matrix method, 2765
Mercury electrode
Adsorption of dialkyl derivatives of thiourea from an ethanol solution at a mercury electrode, 3545
Merocyanine dye
Photophysical properties of Merocyanine 540 derivatives, 953
Mesitylene
Application of simple expressions for the high-pressure volumetric behaviour of liquid mesitylene, 553
Mesopore
Adsorption of MCM-14 mesoporous molecular sieves. Part 1.—Nitrogen isotherms and parameters of the porous structure, 2821
Metal(II) complex
Conductometric study of association phenomena of some metal(II) complexes in water at

different temperatures, 3401
Metal atom–gas reaction
Kinetic study in a microwave-induced plasma afterglow of the Cu(4 ^{2}S) atom reaction with N_2O from 458 to 980 K and with NO_2 from 303 to 762 K, 2003
Metal film
Catalytic reactions of *o*-xylene and *m*-xylene with deuterium on metal films, 659
Metal–insulator transition
Electronic states and the metal–insulator transition in caesium–ammonia solutions, 2009
Metal-ion complex
Speciation, structural characteristics and proton dynamics in the systems $NH_4NO_3 \cdot 1.5H_2O$ and $NH_4NO_3 \cdot 1.5H_2O$–(NHO_3, NH_4F, NH_3)–H_2O at 50 °C, 559
Metallacyclopropane
[(η^2-C_2H_4)Os($CO)_4$] as a vibrational model for type I′ ethene chemisorbed as a metallacyclopropane on metal surfaces, 1449
Metallocenes
Electronic transitions in metallocenes by resonance Raman scattering. Part 1.—Analysis of the ferrocene spectrum in the visible region, 1397
Metalloporphyrin
EXAFS studies of molecular geometries of some Co^{II} and Co^{III} porphyrins, 2775
Metal oxide
FTIR studies on the selective oxidation and combustion of light hydrocarbons at metal oxide surfaces. Propane and propene oxidation on $MgCr_2O_4$, 3347
Metatitanate
FT Raman and FTIR studies of titanias and metatitanate powders, 3181
Methacrylates
EPR/ENDOR characterization of radicals produced in the photopolymerization of a dimethacrylate monomer, 1967
Methane oxidation
Reaction mechanism of methane oxidation to synthesis gas over an activated PdY zeolite, 3001
Methane oxidative coupling
Oxidative coupling of methane over La_2O_3. Influence of catalyst preparation on surface properties and steady and oscillating reaction behaviour, 3357
2-Methoxyethanol
Structures and vibrational spectra of $CH_3OCH_2CH_2OH$: The hydrogen-bonded conformers, 689
Methylenephosphane
Spectroscopic investigations on iminophosphanes and methylenephosphanes, 2611
Methylmercury hydride
Electron-loss centres from methylmercury hydride, dimethylcadmium and diethylcadmium: An EPR study, 3153
2-Methyltetrahydrofuran
Fluorescence anisotropy decays and viscous behaviour of 2-methyltetrahydrofuran, 271
Corrigendum to Sorption of organic solvents into dense silicone membranes. Part 1.—Validity and limitations of Flory–Huggins and related theories, 2001
MFI Structure
Intracrystalline diffusion of benzene in microporous gallosilicate with MFI structure, 2585
[Mg(NCS)]$^+$ complex
Spectrochemistry of solutions. Part 27.—Formation of [Mg(NCS)]$^+$ in solutions of $Mg(NCS)_2$ in methanol, 2351
MgO
Exchange of strong carbon dioxide O=C bonds on an MgO surface, 2561
Micellar aggregate
Micellar aggregates of sodium glycocholate and sodium taurocholate and their interaction complexes with bilirubin-1Xα. Structural models and crystal structure, 1523
Micellar kinetics
Effects of alkyl-substituted ureas on the binding of the chloropentaamminecobalt(III) cation to sodium dodecyl sulfate micelles: A kinetic investigation, 2505
Micelle
Aggregation, hydrogen bonding and thermodynamic studies on tetrapeptide micelles, 161
Bilayer phases in aqueous mixtures of dodecylpentaoxyethylene glycol monoether ($C_{12}E_5$) and sodium decyl sulfonate ($C_{10}SO_3Na$), 471
Volume constraint effect on solute partitioning to Triton X-100 micelles in water, 479
Water-induced structural changes within the L_2 phase of didodecyldimethylammonium bromide–cyclohexane–water systems, 487
Influence of the cetyltrimethylammonium chloride micellar pseudophase on the protolytic equilibria of oxyxanthene dyes at high bulk phase ionic strength, 629
Cationic micellar effect on the kinetics of the protolysis of aromatic carboxylic acids studied by the ultrasonic absorption method, 869
Kinetics of self-replicating micelles, 1953
Structure and transport in concentrated micellar solutions with a lower consolute boundary, 2071
Effects of alkyl-substituted ureas on the binding of the chloropentaamminecobalt(III) cation to sodium dodecyl sulfate micelles: A kinetic investigation, 2505
Aggregation, hydrogen bonding and thermodynamic studies on Boc-Val-Val-Ile-OMe tripeptide micelles in chloroform, 2725
Micellisation
Micellisation and gelation of triblock copolymer of ethylene oxide and ε-caprolactone, $CL_nE_mCL_n$, in aqueous solution, 1961
Microcalorimetry
Microcalorimetric titration of α-cyclodextrin with some straight-chain α,ω-dicarboxylates in aqueous solution at different temperatures, 3397
Microelectrode
Dual-cylinder microelectrodes. Part 2.—Steady-state generator and collector electrode currents, 605
Microemulsion
Reactivity of some square-planar palladium(II) complexes in aqueous solution and in heptane–AOT–water microemulsions, 311
Water-induced structural changes within the L_2 phase of didodecyldimethylammonium bromide–cyclohexane–water systems, 487
Enzymatic reaction in water-in-oil microemulsions. Part 2.—Rate of hydrolysis in a hydrophobic substrate, 2-naphthyl acetate, 979
Enzymatic reaction in water-in-oil microemulsions. Part 2.—Rate of hydrolysis in a hydrophobic substrate, 2-naphthyl acetate, 979
Surface chemistry and microemulsion formation in systems containing dialkylphthalate esters as oils, 2743
Pressure-induced structural changes in water-in-propane microemulsions, 3121
Microgel
Microwave synthesis of the colloidal poly(*N*-isopropylacrylamide) microgel system, 1999
Micropore
Simulation study of nitrogen adsorption in parallel-sided micropores with corrugated potential functions, 181
Water adsorption in carbons described by the Dubinin–Astakhov and Dubinin–Serpinski equations, 3689
Microporous carbon
High-resolution electron microscopy studies of a microporous carbon produced by arc-evaporation, 2799
Microporous solid
Derivation of interatomic potentials for microporous aluminophosphates from the structure and properties of berlinite, 3175
Microwave conductivity
Time-resolved microwave conductivity. Part 1.—TiO_2 photoreactivity and size quantization, 3315
Time-resolved microwave conductivity. Part 2.—Quantum-sized TiO_2 and the effect of adsorbates and light intensity on charge-carrier dynamics, 3323
Microwave-induced plasma afterglow
Kinetic study in a microwave-induced plasma afterglow of the Cu(4 ^{2}S) atom reaction with N_2O from 458 to 980 K and with NO_2 from 303 to 762 K, 2003
Microwave spectroscopy
Microwave spectrum and rotational isomerism of gaseous nitrosoethane, CH_3CH_2NO, 2171
Study of the conformational equilibrium of 1-chlorobutane by free-jets and conventional microwave spectroscopy, 2183
Microwave spectrum of sulfuryl chloride fluoride, SO_2ClF: Structure, hyperfine constants and harmonic force field, 2601
Microwave spectrum and conformation of 5,6-dihydro-2*H*-thiopyran, 2849
Microwave spectrum of tetrolyl fluoride, 3023
Non-reactive interaction of ammonia and molecular chlorine: Rotational spectrum of the 'charge-transfer' complex $H_3N\cdots Cl_2$, 3205
Microwave spectroscopic investigation of thionyl chloride, $SOCl_2$: Hyperfine constants and harmonic force field, 3473
Microwave synthesis
Microwave synthesis of the colloidal poly(*N*-isopropylacrylamide) microgel system, 1999
Mixed-metal oxide
One-electron donor sites and their strength distribution on some hydrotalcite and MgO surfaces as studied by EPR spectroscopy, 213
Mixed oxide catalyst
Oxidation of carbon monoxide on $LaMn_{1-x}Cu_xO_3$ perovskite-type mixed oxides, 1183
X-Ray photoelectron spectroscopy, temperature-programmed desorption and temperature-programmed reduction study of $LaNiO_3$ and $La_2NiO_{4+\delta}$ catalysts for methanol oxidation, 1987
EPR studies of caesium-doped V_2O_5–Fe_2O_3 catalysts: New evidence for active centres, 3159
MNDO calculation
Protonated carbamic acid. Collisional activation and unimolecular dissociation of $CH_4NO_2^+$, 941
MO calculation
Theoretical kinetic isotope effects for the hydride-transfer step in lactate dehydrogenase, 1703
Modelling
Kinetics of self-replicating micelles, 1953
Modified electrode
Hydrogen evolution reaction on electrodes coated with conducting-polymer films, 745
Molecular conformation
Intramolecular hydrogen bond and molecular conformation. Part 2.—Effect of pressure and temperature on the IR spectra of some hydroxy ketones, 103
Intramolecular hydrogen bond and molecular conformation. Part 3.—Effect of temperature and pressure on the IR spectra of *o*-halophenols in dilute solutions, 3065
Molecular dynamics
Orientational ordering in the solid fullerene oxide: $C_{60}O$, 253
Influence of structure on the optical spectra of Eu^{3+} in $Pb(PO_3)_2$ glass: Molecular dynamics simulation and crystal-field theory, 755
Clusters of C_{60} molecules, 1061
Comparison of DNA duplexes with and without O^4-methylthymine: Nanosecond molecular dynamics simulations, 1415
Interaction of water with α,α-trehalose in solution: Molecular dynamics simulation approach, 2731
Physical properties of liquid water by molecular dynamics simulations, 3039
Molecular mechanics
Comparison of complete conformational searching and the energy-optimized tree branch method in molecular mechanics calculations, 47
Molecular modelling
Comparison of complete conformational searching and the energy-optimized tree branch method in molecular mechanics calculations, 47

Application of matched spin probes to the investigation of the overall motion of model lubricant molecules, 2547

Molecular orbital

Single-ion enthalpies of transfer for conjugate-base anions of imides in acetonitrile–methanol mixtures. Empirical correlation with semi-empirical molecular orbital calculations, 121

Collisional behaviour with Ar of the Λ doublets of $CH(X\ ^2\Pi)$ $N'' = 15$ produced in the two-photon dissociation of CH_2CO at 279.3 nm, 1467

Introductory Lecture: Electrostatic acceleration of the 1,5-H shifts in cyclopentadiene and in penta-1,3-diene by Li^+ complexation: Aromaticity of the transition structures, 1559

Inverted potential-energy surfaces in the radical–cation Cope rearrangements of hexa-1,5-diene and semibullvalene, 1681

Transition-state structural variation and mechanistic change, 1709

Importance of water in aldol condensation reactions of acetaldehyde, 1745

Ring–chain rearrangements of phosphirane, 1771

Molecular orbital studies of electron-transfer reactions, 1783

Non-linear optical properties of organic molecules. Part 14.—Calculations of the structure, electronic properties and hyperpolarisabilities of cyclopentadienylpyridines, 1853

Mechanistic aspects of biological redox reactions involving NADH Part 5.—AM1 transition-state studies for the pyruvate–L-lactate interconversion in L-lactate dehydrogenase, 2047

^{31}P and ^1H powder ENDOR and molecular orbital study of a CO_3^{3-} ion in X-irradiated carbonate containing hydroxyapatites, 2653

Corrigendum to Introductory Lecture: Electrostatic acceleration of the 1,5-H shifts in cyclopentadiene and in penta-1,3-diene by Li^+ complexation: Aromaticity of the transition structures, 3471

Molecular sieve

CoAPO molecular sieve acidity investigated by adsorption calorimetry and IR spectroscopy, 1033

Group behaviour of SAPO-11 molecular sieves containing various metals (Mg, Zn, Mn or Cd, Ni, Cr), 2141

Pd^I location and absorbate interactions in PdH-SAPO-34 studied by EPR and electron spin–echo modulation spectroscopies, 2283

Synthesis of SAPO-34: High silicon incorporation in the presence of morpholine as template, 2291

Adsorption of MCM-14 mesoporous molecular sieves. Part 1.—Nitrogen isotherms and parameters of the porous structure, 2821

IR spectroscopic study of CD_3CN adsorbed on ALPO-18 molecular sieve and the solid acid catalysts SAPO-18 and MeAPO-18, 3455

Molecular solid

Normal and anomalous positronium states in ionic and molecular solids investigated *via* magnetic field effects, 1501

Molecular structure

Ab initio study of the molecular structure, polarizability and first hyperpolarizability of 6-hydroxy-1-formylfulvene, 2873

Molecular structures of *cis*- and *trans*-*S*-ethyl thiocrotonate. A combined vibrational spectroscopic and *ab initio* SCF-MO study, 3491

Classical and non-classical silicon radical cations: $H_nSiX^{\cdot+}$ species (X = N, O, F, P, S and Cl), 3505

Molecular vibration

Electronic transitions in metallocenes by resonance Raman scattering. Part 1.—Analysis of the ferrocene spectrum in the visible region, 1397

Molybdena

Influence of preparation method on the acidity of $MoO_3(WO_3)/ZrO_2$ catalysts, 193

^{18}O tracer studies of CO oxidation with O_2 on MoO_3. Part 1.—Diffusion of ^{18}O atoms from active sites during the catalysis and the determination of the number of active sites, 1301

^{18}O tracer studies of CO oxidation with O_2 on MoO_3. Part 2.—Active sites for CO oxidation with O_2 and for oxygen isotope exchange between CO_2 and MoO_2, 1307

Monolayer

Theoretical and experimental study of the flow of condensed molecular monolayers on a Langmuir trough, 493

Theory of monolayers of non-Gaussian polymer chains grafted on to a surface. Part 1.—General theory, 889

Monte Carlo calculation

Adsorption in energetically heterogeneous slit-like pores: Comparison of density functional theory and computer simulations, 1153

Grand canonical Monte Carlo study of Lennard-Jones mixtures in slit pores. Part 3.—Mixtures of two molecular fluids: Ethane and propane, 1487

Investigation of solvent effects on pericyclic reactions by computer simulations, 1727

Hydroxylamine–water: Intermolecular potential function and simulation of hydrated NH_2OH, 2337

Monte Carlo simulations of a single poly(oxyethylene) $C_{12}E_2$ chain headgroup fixed on a bilayer surface in water, 2375

Montmorillonite

Characterization of acidity of pillared clays by proton affinity distribution and DRIFT spectroscopy, 3573

Mordenite

Identification of isolated Pt atoms in H-mordenite, 233

^{27}Al and ^{29}Si solid-state NMR studies of dealuminated mordenite, 3719

Morphology

Morphology and polymorphism in molecular crystals: Terephthalic acid, 1003

Group behaviour of SAPO-11 molecular sieves containing various metals (Mg, Zn, Mn or Cd, Ni, Cr), 2141

Characterisation of iron/titanium oxide photocatalysts. Part 2.—Surface studies, 2257

Controlling the morphology of electrochemically deposited poly(3-methylthiophene) films by electrode rotation, 3097

Mössbauer spectroscopy

Mössbauer study of oxygen-deficient Zn^{II}-bearing ferrites ($Zn_xFe_{3-x}O_{4-\delta}$, $0 \leqslant x \leqslant 1$) and their reactivity toward CO_2 decomposition to carbon, 1171

Addition of manganese to iron catalysts supported on silicalite-1 and its effect on CO hydrogenation, 1993

Multiphoton dissociation

Production of $CH(X\ ^2\Pi)$ from the multiphoton dissociation of CH_2CO at wavelengths of 279.3 and 308 nm, 523

Multiple hard-ellipsoid model

A multiple hard-ellipsoid model for rotationally inelastic collisions, 2857

Nafion

Influence of polymer structure on the electrochemistry of phenothiazine dyes incorporated into Nafion films, 1241

Naphthalene

Complex formation between naphthalene and dimethyl-β-cyclodextrin by heating in a sealed ampoule, 3117

2-Naphthoate

Intramolecular photodimerization of 2-naphthoates: Successful application of hydrophobic forces in the preparation of large-ring compounds, 947

Neural network

Use of a neural network to determine the boiling point of alkanes, 97

Use of a neural network to determine the normal boiling points of acyclic ethers, peroxides, acetals and their sulfur analogues, 2015

Neutron scattering

Neutron scattering study of protonic species in ammonium pentamolybdate, $(NH_4)MO_{5.33}H_3O_{18}$, 3579

Nickel oxide

Enhancement in the optical CO sensitivity of NiO film by the deposition of ultrafine gold particles, 1011

Nitrate radical

Investigation into the kinetics and mechanism of the reaction of NO_3 with CH_3 and CH_3O at 298 K between 0.6 and 8.5 Torr: Is there a chain decomposition mechanism in operation?, 1197

Investigation into the kinetics and mechanism of the reaction of NO_3 with CH_3O_2 at 298 K and 2.5 Torr: A potential source of OH in the night-time troposphere?, 1205

Nitric acid

γ-Radiolysis study of concentrated nitric acid solutions, 93

Primary yields of water radiolysis in concentrated nitric acid solutions, 591

Nitroethane

Microwave spectrum and rotational isomerism of gaseous nitrosoethane, CH_3CH_2NO, 2171

Nitrogen

Reactions of $N(2\ ^2D)$ and $N(2\ ^2P)$ with O_2, 549

Nitrosyl ligand

Proton ENDOR from randomly oriented NO-ligated haemoglobin: Approaching the structural basis for the R–T transition, 3077

NMR

IR and NMR studies of hydrogen bonding in hexan-1-ol–tetrabutylammonium iodide solutions in the temperature range 28–145 °C and in tetrachloromethane, 297

Effect of glycerol on the translational and rotational motions in lipid bilayers studied by pulsed-field gradient ^1H NMR, EPR and time-resolved fluorescence spectroscopy, 305

Graphic method for the determination of the complex NMR shift and equilibrium constant for a hetero-association accompanying a self-association, 429

Speciation, structural characteristics and proton dynamics in the systems $NH_4NO_3 \cdot 1.5H_2O$ and $NH_4NO_3 \cdot 1.5H_2O$–(NHO_3, NH_4F, NH_3)–H_2O at 50 °C, 559

Al-Pillared saponites. Part 2.—NMR studies, 675

NMR study of ε-caprolactam in various solvents. Graphical determination of monomer shift, dimer shift and dimerization constant from the dilution shift data, 717

Photophysical properties of Merocyanine 540 derivatives, 953

^1H NMR relaxation time studies of the hydration of the barley protein C-hordein, 1099

Characterization of supported-palladium catalysts by deuterium NMR spectroscopy, 1157

Nature of hydrogen bonds formed by phenol derivatives and *N*,*N*-dimethylaniline in aprotic solvents: Low-temperature NMR studies, 1411

NMR determination of EPR hyperfine coupling constants of some 5-(*n*-alkyl)-1,1,3,3-tetrakis(trideuteriomethyl)-isoindolin-2-yloxyls, 2345

Oxotungsten(v) and (vi) complexes of 1,3-dimethyllumazine as models for the tungstopterin cofactor, 2909

Determination of orientational order parameters in liquid crystals from temperature-dependent ^{13}C NMR experiments, 3433

Determination of the NMR monomer shift and dimerization constant in a self-associating system by direct application of the least-squares method, 3521

Alkaline-earth-metal(ii) complexes with hydroxide and fluoride in molten $NH_4NO_3 \cdot 1.5H_2O$ at 50 °C, 3539

NO_2^+

Chemistry of NO_2^+ in association with water clusters, 3469

Non-ionic surfactant

Time-resolved fluorescence probing of oil-in-water microemulsions stabilised by non-ionic surfactants, 3567

Non-linear optical property

Optically induced Kerr constants for a homologous series of alk-1-enes and three alkadienes, 55

Non-linear optical properties of organic

molecules. Part 13.—Calculation of the structure and frequency-dependent hyperpolarisability of a blue azothiophene dye, 1849
Non-linear optical properties of organic molecules. Part 14.—Calculations of the structure, electronic properties and hyperpolarisabilities of cyclopentadienylpyridines, 1853
Optical Kerr effect in a series of *n*-alcohols, 2455
Non-polar solvents
Laser-induced fluorescence spectroscopy of ethyl and methyl *p*-aminobenzoate van der Waals complexes with non-polar solvents (CH_4, C_2H_6 and CF_4), 2443
***N*-Phenyl-1,2-naphthalimide**
Spectroscopic properties of aromatic dicarboximides. Part 2.—Substituent effect on the photophysical properties of *N*-phenyl-1,2-naphthalimide, 2635
OC···BrCl dimer
Rotational spectrum of the gas-phase dimer OC···BrCl, 1365
Oligomerization
Photophysics and potential-energy hypersurfaces of permethylated oligosilanes, 1653
IR study of ethene and propene oligomerization on H-ZSM-5: Hydrogen-bonded precursor formation, initiation and propagation mechanisms and structure of the entrapped oligomers, 2827
Optical gas sensor
Enhancement in the optical CO sensitivity of NiO film by the deposition of ultrafine gold particles, 1011
Optical Kerr effect
Optical Kerr effect in a series of *n*-alcohols, 2455
Optical spectroscopy
Influence of structure on the optical spectra of Eu^{3+} in $Pb(PO_3)_2$ glass: Molecular dynamics simulation and crystal-field theory, 755
Organobromine compound
Spin trapping of radicals formed upon irradiation of organobromine compounds with low-energy X-rays, 721
Organometallic compound
Theoretical studies of nucleophilic additions of monomeric and dimeric organometallics, 1789
Electron-loss centres from methylmercury hydride, dimethylcadmium and diethylcadmium: An EPR study, 3153
Organosulfur compound
Chemiluminescent reaction of oxygen atoms with dimethyl disulfide and dimethyl sulfide, 825
Orientational order
Determination of orientational order parameters in liquid crystals from temperature-dependent ^{13}C NMR experiments, 3433
Overlayer
Growth and structure of ZnO_x overlayers on Cu(100), 3443
Oxidation
Physicochemical characterization of the 1,2-bis(cyanimido)cyclobutene-3,4-dione dianion and its twin radical anions, 137
One-electron oxidation of iron(II)–imidaxole and iron(II)–bis[imidazol-2-yl]methane complexes: A pulse radiolysis study, 2467
X-Ray photoelectron spectroscopy characterization of the reduction and oxidation behaviour of Ni-containing HZSM-5 zeolites, 2591
FTIR studies on the selective oxidation and combustion of light hydrocarbons at metal oxide surfaces. Propane and propene oxidation on $MgCr_2O_4$, 3347
^{18}O tracer studies of CO oxidation with O_2 on MoO_3. Part 3.—Reaction mechanism of oxygen isotope exchange between CO_2 and MoO_3, 3449
Hydrogen adsorption–desorption and oxide formation–reduction on polycrystalline platinum in unbuffered aqueous solutions, 3663
Oxidation catalyst
Spectroscopic characterization of magnesium vanadate catalysts. Part 2.—FTIR study of the surface properties of pure and mixed-phase powders, 1293
Electrical properties of pure vanadium phosphate phases and of VPO catalysts used in the partial oxidation of *n*-butane to maleic anhydride, 1441
Oxidation kinetics
Thermodynamics and kinetics of the reaction of copper(II) and iron(III) with ultra-small colloidal chalcopyrite ($CuFeS_2$), 3301
Oxidative coupling of methane
Selective oxidative coupling of methane catalysed over hydroxyapatite ion-exchanged with lead, 2133
Oxidative dehydrogenation
Nature of vanadium species on SnO_2–V_2O_5-based catalysts. Chemistry of preparation, characterization, thermal stability and reactivity in ethane oxidative dehydrogenation over V–Sn mixed oxides, 2981
Oxide catalyst support
Structure of Cr^V species on the surface of various oxides: Reactivity with NH_3 and H_2O, as investigated by EPR spectroscopy, 207
Mechanism of branched carbon-chain formation from CO and H_2 over oxide catalysts. Part 1.—Adsorbed species on ZrO_2 and CeO_2 during CO hydrogenation, 911
Samarium oxide catalyst: Formation, characterization and activity towards propan-2-ol decomposition. An IR spectroscopic study, 3693
Oxide film
Relation between the surface states of oxide films at Rh electrodes and kinetics of the oxygen evolution reaction, 3669
Oxide surface
One-electron donor sites and their strength distribution on some hydrotalcite and MgO surfaces as studied by EPR spectroscopy, 213
Oxotungsten complex
Oxotungsten(v) and (vi) complexes of 1,3-dimethyllumazine as models for the tungstopterin cofactor, 2909
Oxygen
Experimental and theoretical study of the reaction $Fe + O_2 + N_2 \rightarrow FeO_2 + N_2$, 395
Oxygen exchange
Oxygen exchange between magnesium oxide surface and carbon dioxide, 803
^{18}O tracer studies of CO oxidation with O_2 on MoO_3. Part 1.—Diffusion of ^{18}O atoms from active sites during the catalysis and the determination of the number of active sites, 1301
^{18}O tracer studies of CO oxidation with O_2 on MoO_3. Part 2.—Active sites for CO oxidation with O_2 and for oxygen isotope exchange between CO_2 and MoO_3, 1307
Pair-potential function
Hydroxylamine–water: Intermolecular potential function and simulation of hydrated NH_2OH, 2337
Palladium
High-temperature diffusion of hydrogen and deuterium in palladium, 899
Modification of the electronic structure of Pd by U films: Chemisorption of CO, 1285
Pd^I location and absorbate interactions in PdH-SAPO-34 studied by EPR and electron spin–echo modulation spectroscopies, 2283
Palladium(II) complex
Reactivity of some square-planar palladium(II) complexes in aqueous solution and in heptane–AOT–water microemulsions, 311
Paracyanogen
Structural studies on paracyanogen and paraisocyanogen, 327
Corrigendum to Structural studies on paracyanogen and paraisocyanogen, 1363
Paraisocyanogen
Structural studies on paracyanogen and paraisocyanogen, 327
Corrigendum to Structural studies on paracyanogen and paraisocyanogen, 1363
Partial molar volume
Limiting partial molar volumes of electrolytes in dimethylformamide–water mixtures at 298.15 K, 575
Partial oxidation
Investigation of the nature of the active oxygen intermediate at graphite-supported $SmCl_3$ and $FeCl_3$ working as a cathode for the partial oxidation of alkanes and aromatics, 451
Partition coefficient
Volume constraint effect on solute partitioning to Triton X-100 micelles in water, 479
Peptide
Aggregation, hydrogen bonding and thermodynamic studies on tetrapeptide micelles, 161
Aggregation, hydrogen bonding and thermodynamic studies on Boc-Val-Val-Ile-OMe tripeptide micelles in chloroform, 2725
Pericyclic reaction
Investigation of solvent effects on pericyclic reactions by computer simulations, 1727
Permeation
Directional symmetry of the time lag for downstream absorptive permeation studied by the matrix method, 2765
Perovskite
Oxidation of carbon monoxide on $LaMn_{1-x}Cu_xO_3$ perovskite-type mixed oxides, 1183
Perturbation theory
Stereoselectivity and regioselectivity in Diels–Alder reactions studied by intermolecular perturbation theory, 1663
Phase transition
High surface area alumina aerogel at elevated temperatures, 2573
Phase transitions in the bilayers in vesicles formed from binary mixtures of symmetric di-*n*-alkylphosphates in aqueous solutions, 2703
Entropy change in the two-dimensional phase transition of adenine adsorbed at the Hg electrode/aqueous solution interface, 2925
X-Ray investigations on liquid-crystalline copolysiloxanes for second-harmonic generation, 3331
Phenol
Nature of hydrogen bonds formed by phenol derivatives and *N*,*N*-dimethylaniline in aprotic solvents: Low-temperature NMR studies, 1411
Phenolphthalein
Mechanism of bleaching by peroxides. Part 3.—Kinetics of the bleaching of phenolphthalein by transition-metal salts in high pH peroxide solutions, 1105
Phenothiazine dye
Influence of polymer structure on the electrochemistry of phenothiazine dyes incorporated into Nafion films, 1241
Phosphate
Computer modelling of phosphate biominerals. Transfer of parameters for interatomic potentials for different polymorphs of divalent metal diphosphates, 641
EPR data do not support the P=O representation for triakyl phosphates and phosphine oxides or sulfides, 2649
Phosphate ester
Phosphate ester hydrolysis: Calculation of gas-phase reaction paths and solvation effects, 1763
Phosphirane
Ring–chain rearrangements of phosphirane, 1771
Phospholipid monolayer
Redox electrocatalysis by tetracyanoquinodimethane in phospholipid monolayers adsorbed at a liquid/liquid interface, 2517
Photoacoustic IR spectroscopy
Spectroscopic investigation of the polymerisation of pyrrole and thiophene within zeolite channels, 2579
Photocatalysis
Photocatalytic decomposition of dinitrogen oxide on Cu-containing ZSM-5 catalyst, 377
Photocatalysts with tunnel structures for decomposition of water. Part 1.—$BaTi_4O_9$ and its combination with various promoters, 797
Characterisation of iron/titanium oxide photocatalysts. Part 2.—Surface studies, 2257

Photochemistry
Photochemistry and photocuring activity of novel 1-Halogeno-4-propoxythioxanthones, 83
Spectroscopic properties of aromatic dicarboximides. Part 1.—N—H and *N*-methyl-substituted naphthalimides, 411
Production of CH(X $^2\Pi$) from the multiphoton dissociation of CH_2CO at wavelengths of 279.3 and 308 nm, 523
Configuration interaction studies on the S_2 surface of H_2CO: $2\,^1A'(\sigma, \pi^*/\pi, \pi^*)$ as perturber of $1\,^1B_2(n, 3s)$, 683
Triplet of cyclooctatetraene: Reactivity and properties, 963
Collisional behaviour with Ar of the Λ doublets of CH(X $^2\Pi$) $N'' = 15$ produced in the two-photon dissociation of CH_2CO at 279.3 nm, 1467
Photoinduced electron transfer in α-helical poly(L-lysine) carrying randomly distributed donor–acceptor pairs. A kinetic and conformational statistics investigation, 1857
Effects of complexation by cyclodextrins on the photoreactivity of Rose Bengal and Erythrosin B. A laser flash photolysis investigation, 2331
Complexing effects on the excited state of uranyl β-diketonato complexes: Application of the energy gap law, 3253
Photochromism
Photochromism, thermochromism and solvatochromism of some spiro[indolinoxazine]-photomerocyanine systems: Effects of structure and solvent, 333
Photodimerization
Intramolecular photodimerization of 2-naphthoates: Successful application of hydrophobic forces in the preparation of large-ring compounds, 947
Photodissociation dynamics
Photolysis of HOBr and DOBr at 266 nm: OH and OD product-state distributions, 817
Photoelectrochemistry
Photoelectrochemistry using quinone radical anions, 2249
Photoelectron spectroscopy
Spectroscopic investigations on iminophosphanes and methylenephosphanes, 2611
Conformation properties of buta-1,3-diene-1,4-diones (bisketenes): Computational and photoelectron spectroscopic studies, 3383
Resonance-enhanced multiphoton ionisation spectroscopy of thiirane, 3591
Photoemission
Valence and core photoemission of the films formed electrochemically on nickel in sulfuric acid, 1271
Photofragmentation
Configuration interaction studies on the S_2 surface of H_2CO: $2\,^1A'(\sigma, \pi^*/\pi, \pi^*)$ as perturber of $1\,^1B_2(n, 3s)$, 683
Excimer-laser photofragmentation of boron trichloride and its implications for laser vapour deposition and doping processes, 3633
Photoinduced electron transfer
Photoinduced electron transfer in α-helical poly(L-lysine) carrying randomly distributed donor–acceptor pairs. A kinetic and conformational statistics investigation, 1857
Marcus inverted region: Nature of donor–acceptor pairs and free ion yields, 2481
Photoionisation
State-to-state photoionisation dynamics probed by zero kinetic energy (ZEKE) photoelectron spectroscopy, 2425
Photoisomerism
Fluorescence anisotropy decays and viscous behaviour of 2-methyltetrahydrofuran, 271
Corrigendum to Sorption of organic solvents into dense silicone membranes. Part 1.—Validity and limitations of Flory–Huggins and related theories, 2001
Photoluminescence spectroscopy
Photoluminescsence spectra resulting from hydroxy groups on magnesium oxide supported on silica, 2107
Photolysis
Photolysis of HOBr and DOBr at 266 nm: OH and OD product-state distributions, 817
Singlet and triplet excited-state formation in high-energy electron tracks in liquid *cis*- and *trans*-decalin as studied by product formation in radiolysis and photolysis, 2459
Photophysics
Role of twisted intramolecular charge-transfer states in the decay of 2-(2′-hydroxyphenyl) benzothiazole following excited-state intramolecular proton transfer, 59
Effects of protolytic interactions on the photophysics of phenyl pyridyl ketones, 279
Photophysical properties of Merocyanine 540 derivatives, 953
Photophysical studies of substituted porphyrins, 1073
Photophysics and potential-energy hypersurfaces of permethylated oligosilanes, 1653
Photoinduced and thermal isomerization processes for bis-oxonols: Rotor volume, stereochemical and viscosity effects, 2627
Spectroscopic properties of aromatic dicarboximides. Part 2.—Substituent effect on the photophysical properties of *N*-phenyl-1,2-naphthalimide, 2635
Photopolymerization
Photochemistry and photocuring activity of novel 1-Halogeno-4-propoxythioxanthones, 83
Configuration interaction studies on the S_2 surface of H_2CO: $2\,^1A'(\sigma, \pi^*/\pi, \pi^*)$ as perturber of $1\,^1B_2(n, 3s)$, 683
EPR/ENDOR characterization of radicals produced in the photopolymerization of a dimethacrylate monomer, 1967
Photosensitized luminescence
Ligand exchanges between ethanol and some amines in excited mercury complexes in the gas phase, 2021
Photostability
Light stability of β-cyclodextrin inclusion complex of a cyanine dye, 3517
Photothermal imaging
Photothermal imaging of electrochemical reaction dynamics, 345
pH titration
Metallocyclodextrins of 6^A^-(3-aminopropylamino) -6^A^-deoxy-β-cyclodextrin: Their formation and enantioselective complexation of (*R*)- and (*S*)-tryptophan anions in aqueous solution, 739
Physisorption
Physisorption of argon, nitrogen and oxygen by MCM-41, a model mesoporous adsorbent, 2965
Piezoelectric substrate
Acoustic effects on catalytic activities of Cu and Pd thin films combined with piezoelectric lead strontium zirconium titanate activated by low-frequency voltage, 815
Pillared clay
Al-Pillared saponites. Part 1.—IR studies, 667
Al-Pillared saponites. Part 2.—NMR studies, 675
Characterization of acidity of pillared clays by proton affinity distribution and DRIFT spectroscopy, 3573
Pitzer equation
Pitzer model parameters for sparingly soluble salts from solubility measurements: Thallium(I) chloride in aqueous solutions of ammonium chloride, rubidium chloride and caesium chloride at 298.15 K, 1895
Mean activity coefficients of NaCl in glucose–water and sucrose–water mixtures at 298.15 K, 3281
Pivalic acid
Pivalic acid as combined buffer and scavenger for studies of cloud water chemistry with pulse radiolysis, 3651
Platinum
Raman spectroscopic study of the Pt–CeO_2 interaction in the Pt/Al_2O_3–CeO_2 catalyst, 1461
Heterogeneous catalysis in solution. Part 27.—Reaction between titanium(III) and triiodide ions catalysed by platinum, 1983
Hydrogen adsorption–desorption and oxide formation–reduction on polycrystalline platinum in unbuffered aqueous solutions, 3663
Platinum catalyst
Preparation and characterization of multiple ion-exchanged Pt/TiO_2 catalysts, 2277
Platinum catalyst
IR spectra and the structures of the chemisorbed species resulting from the adsorption of the linear butenes on a Pt/SiO_2 catalyst. Part 1.—Temperature dependence of the spectra, 507
IR spectra and the structures of the chemisorbed species resulting from the adsorption of the linear butenes on a Pt/SiO_2 catalyst. Part 2.—Spectra of the hydrogenated surface species as a function of temperature, 513
Hydrogenation of carbon monoxide and ethene over Ni-doped supported Pt catalysts, 2977
Poisson–Boltzmann
Corrigendum to Primitive model electrolytes in the modified Poisson–Boltzmann theory, 2002
Polarizability
Further studies on the polarizabilities and hyperpolarizabilities of the substituted polyenes and polyphenyls, 2617
Ab initio study of the molecular structure, polarizability and first hyperpolarizability of 6-hydroxy-1-formylfulvene, 2873
Polarized absorption
Growth of a well oriented layer of *p*-nitroaniline on the (100) plane of a *p*-cyanoaniline single crystal, studied by polarized absorption and second-harmonic generation, 3685
Polar surface
Hydration of polar interfaces. A generalised mean-field model, 1941
Polymer
IR and submillimetre-wave spectra of doped poly(*p*-phenylene vinylene), 879
Microwave synthesis of the colloidal poly(*N*-isopropylacrylamide) microgel system, 1999
Monte Carlo simulations of a single poly(oxyethylene) $C_{12}E_2$ chain headgroup fixed on a bilayer surface in water, 2375
Polyadenylic acid
Kinetic study of double-helix formation and double-helix dissociation of polyadenylic acid, 2359
Polyaniline
Wide pH range microelectrode study of the electrochemical behaviour of polyaniline films in buffered solutions, 149
Influence of immobilising anions on the redox switching of polyaniline, 2061
Polycyclic hydrocarbon
Singlet quenching of polycyclic aromatic hydrocarbons by polychlorobenzenes in acetonitrile, 69
Aromatic character of graphite intercalation compounds, 3513
Polydispersity
Time-resolved fluorescence probing of oil-in-water microemulsions stabilised by non-ionic surfactants, 3567
Polyelectrolyte
Forces of inertia acting on the aqueous pore fluid of anionic polyelectrolyte gels, 875
Polyene
Further studies on the polarizabilities and hyperpolarizabilities of the substituted polyenes and polyphenyls, 2617
Polymer
Electrochemical synthesis of soluble poly(9-hexylfluorene) and poly(1-hexylindene), 321
Modified interpenetration function accounting for the excluded-volume effects in ternary polymer systems, 339
Comparison of the cation environment in polymer electrolytes based on poly(ethylene oxide) and transition-metal bromides, 3549
Self-diffusion, thermal effects and viscosity of a monodisperse associative polymer: Self-association and interaction with surfactants, 3555
Polymer chain
Theory of monolayers of non-Gaussian polymer chains grafted on to a surface. Part 1.—General theory, 889
Polymer electrolyte
Comparison of the cation environment in

polymer electrolytes based on poly(ethylene oxide) and transition-metal bromides, 3549
Polymer film
Influence of polymer structure on the electrochemistry of phenothiazine dyes incorporated into Nafion films, 1241
Controlling the morphology of electrochemically deposited poly(3-methylthiophene) films by electrode rotation, 3097
Polymerization
Dielectric and steric hindrance effects on step-polymerization of a diepoxide with monoamines, 883
Spectroscopic investigation of the polymerisation of pyrrole and thiophene within zeolite channels, 2579
Polymer ligand
Characterisation behaviour of the complexation of copper(II) with polymer-bound vinylimidazole ligands, 3563
Polymer solution
Modified interpenetration function accounting for the excluded-volume effects in ternary polymer systems, 339
Polymer-supported catalyst
Physiochochemical and catalytic properties of polyaniline protonated with 12-molybdophosphoric acid, 2099
Polypeptide
Chiral discrimination in the formation of diastereomeric pairs. A thermodynamic and conformational investigation, 435
Thermodynamic studies on the interaction of *n*-alkyltrimethylammonium bromides with anionic polypeptides in aqueous solution, 2511
Polyphenyl
Further studies on the polarizabilities and hyperpolarizabilities of the substituted polyenes and polyphenyls, 2617
Poly(vinyl alcohol)
Configuration interaction studies on the S_2 surface of H_2CO: $2\,^1A'(\sigma, \pi^*/\pi, \pi^*)$ as perturber of $1\,^1B_2(n, 3s)$, 683
Pore
Adsorption in energetically heterogeneous slit-like pores: Comparison of density functional theory and computer simulations, 1153
Porous anodic film
Nickel incorporated into anodic porous alumina formed on an aluminium wire, 1279
Porous structure
Adsorption of MCM-14 mesoporous molecular sieves. Part 1.—Nitrogen isotherms and parameters of the porous structure, 2821
Porphyrin
Photophysical studies of substituted porphyrins, 1073
Fourier-transform detection of singlet oxygen and fluorescence from cell membrane bound porphyrins, 2453
EXAFS studies of molecular geometries of some Co^{II} and Co^{III} porphyrins, 2775
Proton ENDOR from randomly oriented NO-ligated haemoglobin: Approaching the structural basis for the R–T transition, 3077
Positronium
Rate constants of the positronium oxidation reaction promoted by several caged and open Co^{III} complexes, 423
Normal and anomalous positronium states in ionic and molecular solids investigated *via* magnetic field effects, 1501
Potential-energy function
Power-series expansions as fitting functions of potential-energy curves, 23
Dynamical studies of the reaction Be + HF(v, J) → BeF(v', J') + H on a new *ab initio* potential-energy surface, 249
Theoretical potential-energy functions and the rovibronic spectrum of the SiH_2^+ ion, 517
Virial theorem decomposition as a tool for comparing and improving potential-energy surfaces: Ground-state Li_3, 1381
Micellar aggregates of sodium glycocholate and sodium taurocholate and their interaction complexes with bilirubin-1Xα. Structural models and crystal structure, 1523
Some thoughts on reaction-path following, 1569
Prediction of whole reaction paths for large molecular systems, 1575
What Woodward and Hoffmann didn't tell us: The failure of the Born–Oppenheimer approximation in competing reaction pathways, 1581
Concerted and stepwise mechanisms in cycloaddition reactions: Potential surfaces and isotope effects, 1599
Ab initio MC-SCF study of thermal and photochemical [2 + 2] cycloadditions, 1617
Transition states, avoided crossing states and valence-bond mixing: Fundamental reactivity paradigms, 1631
Spin-coupled description of organic reaction pathways: The cycloaddition reaction of two ethene molecules, 1643
Photophysics and potential-energy hypersurfaces of permethylated oligosilanes, 1653
Stereoselectivity and regioselectivity in Diels–Alder reactions studied by intermolecular perturbation theory, 1663
Inverted potential-energy surfaces in the radical–cation Cope rearrangements of hexa-1,5-diene and semibullvalene, 1681
Potential surfaces for cyclopropane stereomutations: What a difference geminal fluorines make, 1689
Transition-state structural variation and mechanistic change, 1709
Investigation of solvent effects on pericyclic reactions by computer simulations, 1727
Transition structures of the Friedel–Crafts reaction in solution, 1757
Molecular orbital studies of electron-transfer reactions, 1783
Theoretical studies of nucleophilic additions of monomeric and dimeric organometallics, 1789
Calculation of the adsorption potential energy of water vapour on α-cristobalite, 2555
Interaction potentials and fragmentation dynamics of the $Ne\cdots Br_2$ complex in the ground and electronically excited states, 3229
Classical and non-classical silicon radical cations: $H_nSiX^{\cdot+}$ species (X = N, O, F, P, S and Cl), 3505
Potentiometric titration
Alkaline-earth-metal(II) complexes with hydroxide and fluoride in molten $NH_4NO_3 \cdot 1.5H_2O$ at 50 °C, 3539
Characterization of acidity of pillared clays by proton affinity distribution and DRIFT spectroscopy, 3573
Potentiometry
Complexation and precipitation equilibria in the system Ni^{II}—Cr^{VI}—H_2O, 1227
Power-series expansion
Power-series expansions as fitting functions of potential-energy curves, 23
Power spectra
Rotational dynamics in liquid water: A simulation study of librational motions, 1405
Pressure-induced structural change
Pressure-induced structural changes in water-in-propane microemulsions, 3121
Prigonine–Flory–Patterson theory
Thermodynamics of liquid binary (alkanenitrile–alkane) mixtures. Part 1.—Experimental excess molar volume at 298.15 K and its interpretation with the Prigogine–Flory–Patterson theory, 113
Primitive model electrolyte
Corrigendum to Primitive model electrolytes in the modified Poisson–Boltzmann theory, 2002
Propan-2-ol
Conversion of isopropyl alcohol to acetone catalysed by Cr_2O_3 at 473 K: Role of molecular oxygen, 2413
Samarium oxide catalyst: Formation, characterization and activity towards propan-2-ol decomposition. An IR spectroscopic study, 3693
Protein
^1H NMR relaxation time studies of the hydration of the barley protein C-hordein, 1099
Formation of two-dimensional structures from colloidal particles on fluorinated oil substrate, 2077
EPR spin-labelling and spin-trapping study of proteins in reverse micelles, 2643
Protolysis
Cationic micellar effect on the kinetics of the protolysis of aromatic carboxylic acids studied by the ultrasonic absorption method, 869
Protolytic photodissociation
Effects of surfactant charge and structure on excited-state protolytic dissociation of 1-naphthol in vesicles, 2717
Proton transfer
Role of twisted intramolecular charge-transfer states in the decay of 2-(2′-hydroxyphenyl) benzothiazole following excited-state intramolecular proton transfer, 59
Proton transfer to the fluorine atom in fluorobenzene. Temperature and pressure dependence, 1373
Effects of surfactant charge and structure on excited-state protolytic dissociation of 1-naphthol in vesicles, 2717
Pt dispersion
Identification of isolated Pt atoms in H-mordenite, 233
Pt–WO_3 electrode
Co-deposited Pt–WO_3 electrodes. Part 1.—Methanol oxidation and *in situ* FTIR studies, 3089
Pulsed-field-gradient NMR
Structure and transport in concentrated micellar solutions with a lower consolute boundary, 2071
Pulsed laser photolysis
Pressure and temperature dependence of the rate constants for the association reaction of OH radicals with NO between 301 and 23 K, 3609
Pulse radiolysis
Dissociative electron transfer between arene radical anions and halogenoalkanes: A pulse radiolysis study, 75
Reactions of N(2 ^{2}D) and N(2 ^{2}P) with O_2, 549
Pulse radiolysis study of the reactions of $SO_4^{\cdot-}$ with some substituted benzenes in aqueous solution, 597
Characterization of transients formed in aqueous solutions of substituted alkyl sulfides: A pulse radiolysis study, 703
Pulse radiolytic one-electron reduction of 2-hydroxy- and 2,6-dihydroxy-9,10-anthraquinones, 711
Pulse radiolysis of iodate in aqueous solution, 831
Pulse radiolytically induced redox and alkylation processes of C_{70}, 1391
One-electron oxidation of iron(II)–imidaxole and iron(II)–bis[imidazol-2-yl]methane complexes: A pulse radiolysis study, 2467
Reaction of peroxomonosulfate radical with manganese(II) in acidic aqueous solution. A pulse radiolysis study, 3309
Electron processes in AOT reverse micelles. Part 1.—Absorption spectra and lifetimes of hydrated electrons as studied by pulse radiolysis, 3411
Pivalic acid as combined buffer and scavenger for studies of cloud water chemistry with pulse radiolysis, 3651
Pyrimidine
Kinetics of thermal decomposition of the diazines: Shock-tube pyrolysis of pyrimidine, 541
Quantum mechanics
Importance of water in aldol condensation reactions of acetaldehyde, 1745
Quartz crystal microbalance
Profiles of adsorption during the oxidation of small organic molecules: Oxidation of formic acid at polycrystalline Pt in acid solutions, 1233
Quartz crystal microbalance study of the adsorption of ions onto gold from non-aqueous solvents, 1533
Apparently viscoelastic responses in a quartz crystal microbalance study of an electrodeposited non-aqueous colloid film, 3657
Quasi-aromaticity
Ab initio studies of electronic structures and quasi-aromaticity in $M_3S_{4-n}O_n^{4+}$ (M = Mo,

W; n = 0–4) clusters, 39
Quasiclassical trajectory calculation
Reactions of N(2 ^{2}D) and N(2 ^{2}P) with O_2, 549
Quasielastic neutron scattering
Neutron scattering study of protonic species in ammonium pentamolybdate, $(NH_4)MO_{5.33}H_3O_{18}$, 3579
Quinone
Redox properties of ubiquinone (UQ_{10}) adsorbed on a mercury electrode, 1913
Photoelectrochemistry using quinone radical anions, 2249
Radical cation
Tunnelling mode of superoxide radical anion decay on palladium-promoted yttria, 227
Electron transfer from aromatic compounds to phenyliodinium and diphenylsulfinium radical cations, 287
Inverted potential-energy surfaces in the radical–cation Cope rearrangements of hexa-1,5-diene and semibullvalene, 1681
EPR studies of the formation of alkene cations due to ion–molecule reactions in the 77 K radiolysis of pentane and hexane containing additives, 2901
Reaction of H_2S with OH and a study of the HSO and SOH isomers. High-level *ab initio* calculations, 3051
Pressure and temperature dependence of the rate constants for the association reaction of OH radicals with NO between 301 and 23 K, 3609
Reaction of atomic oxygen with some simple alkenes. Part 2.—Reaction pathways involving ethene, propene and (*E*)-but-2-ene at atmospheric pressure, 3625
Radiofrequency EPR
Effects encountered in EPR spectroscopy and imaging at small magnetic fields, 2671
Radiolysis
γ-Radiolysis study of concentrated nitric acid solutions, 93
Primary yields of water radiolysis in concentrated nitric acid solutions, 591
Spin trapping of radicals formed upon irradiation of organobromine compounds with low-energy X-rays, 721
Singlet and triplet excited-state formation in high-energy electron tracks in liquid *cis*- and *trans*-decalin as studied by product formation in radiolysis and photolysis, 2459
EPR studies of the formation of alkene cations due to ion–molecule reactions in the 77 K radiolysis of pentane and hexane containing additives, 2901
Raman spectroscopy
Raman spectroscopic monitoring of oxygen clathrate hydrate formation from microporous amorphous solid water, 293
Effect of potassium on the surface potential of titania, 895
Spectroscopic characterization of magnesium vanadate catalysts. Part 1.—Vibrational characterization of $Mg_3(VO_4)_2$, $Mg_2V_2O_7$ and MgV_2O_6 powders, 1161
Conformational and vibrational properties of α,ω-dihalogenoalkane/urea inclusion compounds: A Raman scattering investigation, 1313
[(η^2-C_2H_4)Os(CO)$_4$] as a vibrational model for type I′ ethene chemisorbed as a metallacyclopropane on metal surfaces, 1449
Raman spectroscopic study of the Pt–CeO_2 interaction in the Pt/Al_2O_3–CeO_2 catalyst, 1461
Raman band shifts of γ-Bi_2MoO_6 and α-$Bi_2Mo_3O_{12}$ exchanged with ^{18}O tracer at active sites for reoxidation, 2113
Vibrational relaxation of the ν(C=O) mode of ethyl trichloroacetate in solution, 2325
Molecular conformation of *n*-alkyloligo(oxyethylene)s in the solid state studied by Raman spectroscopy. Effect of the end group, 2769
Vibrational spectroscopic study of *N*-acylglycine monomeric and dimeric salts: The long acyl chain effect on the NH (ND) stretch, amide I, amide II and CH_2-Wag modes, 3483
Alkaline-earth-metal(II) complexes with hydroxide and fluoride in molten $NH_4NO_3 \cdot 1.5H_2O$ at 50 °C, 3539
Rare-earth-metal doped glass
Influence of structure on the optical spectra of Eu^{3+} in $Pb(PO_3)_2$ glass: Molecular dynamics simulation and crystal-field theory, 755
Rate constant
Rate constants of the positronium oxidation reaction promoted by several caged and open Co^{III} complexes, 423
Temperature dependence of the rate constant for the reaction e^-_{aq} + OH in water up to 150 °C, 837
Pressure and temperature dependence of the rate constants for the association reaction of OH radicals with NO between 301 and 23 K, 3609
RbCl: S_2^-
ENDOR study of RbCl: S_2^-, 2541
Reaction cross-section
High sensitivity in reaction cross-section measurements by optical methods: The $Ca(^1D_2) + C_2H_5OH \rightarrow CaOH^* + C_2H_5$ reaction, 3731
Reaction dynamics
Dynamical studies of the reaction Be + HF(v, J) → BeF(v', J') + H on a new *ab initio* potential-energy surface, 249
Variational transition-state theory and semiclassical tunnelling calculations with interpolated corrections: A new approach to interfacing electronic structure theory and dynamics for organic reactions, 1715
Reaction mechanism
Some thoughts on reaction-path following, 1569
Prediction of whole reaction paths for large molecular systems, 1575
Spin-coupled description of organic reaction pathways: The cycloaddition reaction of two ethene molecules, 1643
Theoretical studies of nucleophilic additions of monomeric and dimeric organometallics, 1789
Gradient-line reaction paths for 1,2 H shift reactions in phosphinonitrene and formaldehyde, and H_2 elimination from formaldehyde, 1839
Mechanistic aspects of biological redox reactions involving NADH Part 5.—AM1 transition-state studies for the pyruvate–L-lactate interconversion in L-lactate dehydrogenase, 2047
Reaction of atomic oxygen with some simple alkenes. Part 2.—Reaction pathways involving ethene, propene and (*E*)-but-2-ene at atmospheric pressure, 3625
Reactive intermediate
Investigation of the nature of the active oxygen intermediate at graphite-supported $SmCl_3$ and $FeCl_3$ working as a cathode for the partial oxidation of alkanes and aromatics, 451
Redox behaviour
Reduction of cerias with different textures by hydrogen and their reoxidation by oxygen, 773
Redox properties of ubiquinone (UQ_{10}) adsorbed on a mercury electrode, 1913
Influence of immobilising anions on the redox switching of polyaniline, 2061
Redox enzyme electrode
Enzyme catalysis at hydrogel-modified electrodes with soluble redox mediator, 987
Reduction
Kinetics of reduction of hexacyanoferrate(III) by thiosulfate ions mediated by ruthenium dioxide hydrate, 1429
Two-step reduction of Indigo Carmine by dithionite: A stopped-flow study, 2525
X-Ray photoelectron spectroscopy characterization of the reduction and oxidation behaviour of Ni-containing HZSM-5 zeolites, 2591
Kinetics of reductive dissolution of sodium bismuthate by Ce^{III} and Mn^{II} ions, 2939
Hydrogen adsorption–desorption and oxide formation–reduction on polycrystalline platinum in unbuffered aqueous solutions, 3663
Ternary V–Ti–Si catalysts and their behaviour in the CO + NO reaction, 3711
Regioselectivity
Model calculations of chemical interactions. Part 7.—Role of vicinal delocalization in the regiochemical control of the cycloaddition of diazomethane and formonitrile oxide to methyl vinyl ether, 1077
Stereoselectivity and regioselectivity in Diels–Alder reactions studied by intermolecular perturbation theory, 1663
Relative permittivity
2-Methoxyethanol–water solvent system: Static relative permittivity from −10 to +80 °C, 859
Dielectric and steric hindrance effects on step-polymerization of a diepoxide with monoamines, 883
Dielectric behaviour of the *N*,*N*-dimethylformamide–2-methoxyethanol–1,2-dimethoxyethane ternary solvent system from −10 to +20 °C, 1089
REMPI
Ultraviolet photolysis of HOCl: REMPI measurement of the relative population of chlorine atom (^{2}P) spin–orbit states, 17
State-to-state photoionisation dynamics probed by zero kinetic energy (ZEKE) photoelectron spectroscopy, 2425
Resonance-enhanced multiphoton ionisation spectroscopy of thiirane, 3591
Resistivity
Synthesis, structures and electrical properties of the charge-transfer salts of 4,5-ethylenedithio-4′-5′-(2-oxatrimethylenedithio)diselena-dithiafulvalene (EOST) with linear anions [I_3^-, IBr_2^-, ICl_2^-, I_2Br^-, $AuBr_2^-$, $Au(CN)_2^-$], 763
Resonance Raman scattering
Electronic transitions in metallocenes by resonance Raman scattering. Part 1.—Analysis of the ferrocene spectrum in the visible region, 1397
Response kinetics
Response kinetics of polymer-coated bulk acoustic wave devices on exposure to gases and vapours, 751
Reversed micelle
Water-induced structural changes within the L_2 phase of didodecyldimethylammonium bromide–cyclohexane–water systems, 487
Structure of cobalt Aerosol-OT reversed micelles studied by small-angle scattering methods, 2497
EPR spin-labelling and spin-trapping study of proteins in reverse micelles, 2643
Electron processes in AOT reverse micelles. Part 1.—Absorption spectra and lifetimes of hydrated electrons as studied by pulse radiolysis, 3411
Rh electrode
Relation between the surface states of oxide films at Rh electrodes and kinetics of the oxygen evolution reaction, 3669
Rheology
Determination of aggregate structures by combined light-scattering and rheological studies, 2085
Self-diffusion, thermal effects and viscosity of a monodisperse associative polymer: Self-association and interaction with surfactants, 3555
Rh/TiO_2
In situ FTIR study of CO–H_2 reactions over Rh/TiO_2 catalysts at high pressure and temperature, 3699
Ring–chain rearrangement
Ring–chain rearrangements of phosphirane, 1771
Rose Bengal
Effects of complexation by cyclodextrins on the photoreactivity of Rose Bengal and Erythrosin B. A laser flash photolysis investigation, 2331
Rotating-disc electrode
Controlling the morphology of electrochemically deposited poly(3-methylthiophene) films by electrode rotation, 3097
Rotating-disc electrode voltammetry as a probe of adsorption rates on solid particles in liquids. Application to Zn^{II} adsorption at the hydroxyapatite/aqueous interface, 3109
Rotational dynamics
Rotational dynamics in liquid water: A simulation study of librational motions, 1405

Rotational excitation
Rotational excitations of NH_4^+ ions in dilute solutions in alkali-metal halide lattices, 1149
Rotational isomerism
Microwave spectrum and rotational isomerism of gaseous nitrosoethane, CH_3CH_2NO, 2171
Rotationally inelastic collision
A multiple hard-ellipsoid model for rotationally inelastic collisions, 2857
Rotational motion
Effect of glycerol on the translational and rotational motions in lipid bilayers studied by pulsed-field gradient ^1H NMR, EPR and time-resolved fluorescence spectroscopy, 305
Rotational spectroscopy
Rotational spectrum of the gas-phase dimer OC···BrCl, 1365
Non-reactive interaction of ammonia and molecular chlorine: Rotational spectrum of the 'charge-transfer' complex $H_3N\cdots Cl_2$, 3205
Rovibronic spectrum
Theoretical potential-energy functions and the rovibronic spectrum of the SiH_2^+ ion, 517
Rubisco
Enzyme catalysis and transition structures *in vacuo*. Transition structures for the enolization, carboxylation and oxygenation reactions in ribulose-1,5-bisphosphate carboxylase/oxygenase enzyme (Rubisco), 2365
Ruthenium–tin catalyst
Characterization of carbon-supported ruthenium–tin catalysts by high-resolution electron microscopy, 2803
Samarium oxide
Samarium oxide catalyst: Formation, characterization and activity towards propan-2-ol decomposition. An IR spectroscopic study, 3693
Saponite
Al-Pillared saponites. Part 1.—IR studies, 667
Al-Pillared saponites. Part 2.—NMR studies, 675
Scanning laser photothermal electrochemical microscopy
Photothermal imaging of electrochemical reaction dynamics, 345
Scanning tunnelling microscopy
Direct observation of native and unfolded glucose oxidase structures by scanning tunnelling microscopy, 2057
Scanning tunnelling microscopy of various alkanols and an alkanethiol adsorbed onto graphite, 2551
Schiff base complex
Effects of fluorine substitution on the solvatochromic behaviour of an iron(II)–cyanide Schiff base complex, 3071
Schrödinger equation
Ionization radii of compressed atoms, 3377
Sealed-heating
Complex formation between naphthalene and dimethyl-β-cyclodextrin by heating in a sealed ampoule, 3117
Second-harmonic generation
X-Ray investigations on liquid-crystalline copolysiloxanes for second-harmonic generation, 3331
Growth of a well oriented layer of *p*-nitroaniline on the (100) plane of a *p*-cyanoaniline single crystal, studied by polarized absorption and second-harmonic generation, 3685
Selectivity isotherm
Grand canonical Monte Carlo study of Lennard-Jones mixtures in slit pores. Part 3.—Mixtures of two molecular fluids: Ethane and propane, 1487
Self-association
Graphic method for the determination of the complex NMR shift and equilibrium constant for a hetero-association accompanying a self-association, 429
Determination of the NMR monomer shift and dimerization constant in a self-associating system by direct application of the least-squares method, 3521
Self-diffusion
Self-diffusion and viscoelasticity of dense hard-sphere colloids, 1931
Structure and transport in concentrated micellar solutions with a lower consolute boundary, 2071
Self-diffusion, thermal effects and viscosity of a monodisperse associative polymer: Self-association and interaction with surfactants, 3555
SEM
Textures of tetradecahedron δ-FeOOH particles and their thermal decomposition products, 2567
Semiconductor oxide catalyst
Electrical properties of pure vanadium phosphate phases and of VPO catalysts used in the partial oxidation of *n*-butane to maleic anhydride, 1441
Semi-topological method
Aromatic character of graphite intercalation compounds, 3513
Sensitivity analysis
New approach to sensitivity analysis of multiple equilibria in solutions, 3245
Sensor
Response kinetics of polymer-coated bulk acoustic wave devices on exposure to gases and vapours, 751
Serum
Kinetic model for serum albumin adsorption: Experimental verification, 587
***S*-ethyl thiocrotonate**
Molecular structures of *cis*- and *trans*-*S*-ethyl thiocrotonate. A combined vibrational spectroscopic and *ab initio* SCF-MO study, 3491
Shear
Crossover behaviour and critical amplitude of the viscosity of binary liquid mixtures of critical composition, 2215
Brownian dynamics simulation of a multi-subunit deformable particle in simple shear flow, 2737
Shock-tube pyrolysis
Kinetics of thermal decomposition of the diazines: Shock-tube pyrolysis of pyrimidine, 541
SiH_2^+ ion
Theoretical potential-energy functions and the rovibronic spectrum of the SiH_2^+ ion, 517
Silica
Activation of surface lattice oxygen in the oxidation of carbon monoxide on silica, 1177
Evanescent wave spectroscopy: Application to the study of the spatial distribution of charged groups on an adsorbed polyelectrolyte at the silica/water interface, 1251
Comparison of the electrokinetic properties of the silica surface, 1261
Photoluminescence spectra resulting from hydroxy groups on magnesium oxide supported on silica, 2107
Silicon
Classical and non-classical silicon radical cations: $H_nSiX^{\cdot+}$ species (X = N, O, F, P, S and Cl), 3505
Silver
Studies of silver electronucleation onto carbon microelectrodes, 1923
Single-crystal structure
Single-crystal structure of C_{60} at 300 K. Evidence for the presence of oxygen in a statically disordered model, 2791
Singlet excited state
Fourier-transform luminescence spectroscopy of solvated singlet oxygen, 1065
Singlet and triplet excited-state formation in high-energy electron tracks in liquid *cis*- and *trans*-decalin as studied by product formation in radiolysis and photolysis, 2459
^{29}Si NMR
^{29}Si Solid-state NMR study of the surface structure of aerosil silica, 2961
^{27}Al and ^{29}Si solid-state NMR studies of dealuminated mordenite, 3719
Small-angle scattering
Corrigendum to Sorption of organic solvents into dense silicone membranes. Part 1.—Validity and limitations of Flory–Huggins and related theories, 2001
Structure of cobalt Aerosol-OT reversed micelles studied by small-angle scattering methods, 2497
$SmCl_3$
Investigation of the nature of the active oxygen intermediate at graphite-supported $SmCl_3$ and $FeCl_3$ working as a cathode for the partial oxidation of alkanes and aromatics, 451
SO_2^-
EPR study of NaCl:CO_2^- and NaCl:SO_2^-, 3261
Sodium bismuthate
Kinetics of reductive dissolution of sodium bismuthate by Ce^{III} and Mn^{II} ions, 2939
Sodium di-*n*-dodecylphosphate
Differential scanning microcalorimetric study of sodium di-*n*-dodecylphosphate vesicles in aqueous solution, 1905
Solid-state conductivity
Solid-state conductivities of CPQ [1,1′-bis(*p*-cyanophenyl)-4,4′-bipyridilium] salts, redox-state mixtures and a new intervalence adduct, 1127
Solid-state hydrolysis
Solid-state hydrolysis of aspirin, 997
Solid-state NMR
^{29}Si Solid-state NMR study of the surface structure of aerosil silica, 2961
^{27}Al and ^{29}Si solid-state NMR studies of dealuminated mordenite, 3719
Carbon–halogen second-order quadrupolar and indirect spin–spin coupling effects in high-resolution ^{13}C NMR spectra of halobenzenes, 3729
Solid-state potential
Carbon cluster structures and stabilities predicted from solid-state potentials, 3029
Solid-state spectroscopy
Vibrational spectroscopic analysis of Group 6 metal hexacarbonyls in the solid state, 1265
Solubility
Pitzer model parameters for sparingly soluble salts from solubility measurements: Thallium(I) chloride in aqueous solutions of ammonium chloride, rubidium chloride and caesium chloride at 298.15 K, 1895
Effects of hydrogen and deuterium concentration on measurements of the solubility and diffusivity of hydrogen isotopes in yttrium, 1979
Time-resolved fluorescence probing of oil-in-water microemulsions stabilised by non-ionic surfactants, 3567
Solution reaction
Conductance studies of acid–base equilibria between 4-methoxy-2, 6-dimethylpyridine *N*-oxide and trifluoroacetic acid in nitrobenzene, 2489
Solution kinetics
Reaction of peroxomonosulfate radical with manganese(II) in acidic aqueous solution. A pulse radiolysis study, 3309
Solution reaction
Thermodynamics of complexation of 18-Crown-6 with sodium, potassium, rubidium, caesium and ammonium ions in *N*,*N*-dimethylformamide, 127
Excess volumes of the ternary mixtures butylamine–cyclohexane–benzene and tributylamine–cyclohexane–benzene, 1083
Transition structures of the Friedel–Crafts reaction in solution, 1757
Very large thermal separations for polyelectrolytes in salt solutions, 1909
New approach to sensitivity analysis of multiple equilibria in solutions, 3245
Solution thermodynamics
Complexation and precipitation equilibria in the system Ni^{II}—Cr^{VI}—H_2O, 1227
Thermodynamic properties of 0–6 mol kg^{-1} aqueous sulfuric acid from 273.15 to 328.15 K, 1875
Determination of the transfer thermodynamic functions for some monovalent ions from water to *N*,*N*-dimethylformamide, and for some anions from water to methanol, dimethyl sulfoxide, acetonitrile and pyridine, and standard electrode potentials of some $M^+/M(s)$ couples in *N*,*N*-dimethylthioformamide, 2223
Determination of the transfer themodynamic functions for the zinc(II), cadmium(II),

mercury(II) and mercury(I) ions from water to methanol, dimethyl sulfoxide, acetonitrile, pyridine and *N*,*N*-dimethylthioformamide and of standard electrode potentials of the $M^{2+}/M(s)$ couples in these solvents, 2235
Transfer thermodynamic study on the copper(II) ion from water to methanol, acetonitrile, dimethyl sulfoxide and pyridine, 2243
Thermodynamic study of the transfer of the tin(II), lead(II) and alkaline-earth-metal ions from water to methanol, dimethyl sulfoxide, acetonitrile, pyridine and *N*,*N*-dimethylthioformamide, 2683
Thermodynamics of liquid binary (alkanenitrile–alkane) mixtures. Part 2.—Experimental excess molar heat capacity at 298.15 K and structure in solution, 2913
Solvation
Study of preferential solvation in binary solvent mixtures by the fluorescence-detected magnetic field effect, 109
Effect of preferential solvation on reactivity of a free radical in binary solvent mixtures, 571
Preferential solvation of a β-sensitive dye in binary mixtures of a non-protic and a hydroxylic solvent, 865
Phosphate ester hydrolysis: Calculation of gas-phase reaction paths and solvation effects, 1763
Effect of preferential solvation on Gibbs energies of ionic transfer, 2037
Dielectric relaxation of aqueous NaF and KF solutions, 2475
Thermodynamic study of the transfer of the tin(II), lead(II) and alkaline-earth-metal ions from water to methanol, dimethyl sulfoxide, acetonitrile, pyridine and *N*,*N*-dimethylthioformamide, 2683
Enthalpies of transfer of tetrabutylammonium bromide from water to highly aqueous water–methanol, –ethanol, –propan-1-ol and –acetonitrile mixtures at 298 K: Consideration of the extended coordination model solvation parameters, 2691
ATR-FTIR studies of ion–solvent and ion–ion interactions in divalent-metal perchlorate–acetonitrile solutions, 2697
Intramolecular hydrogen bond and molecular conformation. Part 3.—Effect of temperature and pressure on the IR spectra of *o*-halophenols in dilute solutions, 3065
Solvatochromism
Photochromism, thermochromism and solvatochromism of some spiro[indolinoxazine]-photomerocyanine systems: Effects of structure and solvent, 333
Preferential solvation of a β-sensitive dye in binary mixtures of a non-protic and a hydroxylic solvent, 865
Effects of fluorine substitution on the solvatochromic behaviour of an iron(II)–cyanide Schiff base complex, 3071
Preferential solvation in acetonitrile–water mixtures. Relationship between solvatochromic parameters and standard pH values, 3287
Solvent effect
Ionic partial molar volumes in non-aqueous solvents, 1899
Effect of solvent on the reaction of coordination complexes. Part 19.—Base hydrolysis of ($\alpha\beta S$)-(*o*-methoxybenzoato)-(tetraethylene-pentamine)cobalt(III) in aquo-organic solvent media, 3293
Soret coefficient
Heats of transport of aqueous tetraalkylammonium hydroxides and the electrophoretic effect, 1223
Very large thermal separations for polyelectrolytes in salt solutions, 1909
Sorption
Influence of framework substitution of Al^{3+} by Fe^{3+} on the sorption characteristics of β zeolite, 387
Corrigendum to Sorption of organic solvents into dense silicone membranes. Part 1.—Validity and limitations of Flory–Huggins and related theories, 2001
Space group
Description of cubic liquid-crystalline structures using simple surface foliations, 3423
Spectrochemistry
Spectrochemistry of solutions. Part 27.—Formation of $[Mg(NCS)]^+$ in solutions of $Mg(NCS)_2$ in methanol, 2351
Spectrophotometry
Complexation and precipitation equilibria in the system Ni^{II}—Cr^{VI}—H_2O, 1227
Effects of fluorine substitution on the solvatochromic behaviour of an iron(II)–cyanide Schiff base complex, 3071
Spin-coupled theory
Spin-coupled description of organic reaction pathways: The cycloaddition reaction of two ethene molecules, 1643
Spin density
EPR study of $NaCl:CO_2^-$ and $NaCl:SO_2^-$, 3261
Spinel
Surface characterization and catalytic activity of $Co_xMg_{1-x}Al_2O_4$ solid solutions. Oxidation of carbon monoxide by oxygen, 905
Catalytic combustion of methane: Copper oxide supported on high-specific-area spinels synthesized by a sol–gel process, 1541
Spin labelling
EPR spin-labelling and spin-trapping study of proteins in reverse micelles, 2643
Spin polarization
Time-resolved EPR study of spin polarization and dynamics of F^+ centres in additively coloured CaO crystals, 3267
Spin trapping
Spin trapping of radicals formed upon irradiation of organobromine compounds with low-energy X-rays, 721
Spiro[indolinoxazine]-photomerocyanine system
Photochromism, thermochromism and solvatochromism of some spiro[indolinoxazine]-photomerocyanine systems: Effects of structure and solvent, 333
Squarate
Theoretical studies of the electronic structure, conformations, spectra and hyperpolarisabilities of squarates and related molecules, 2319
Stability constant
Spectrochemistry of solutions. Part 26.—Alkali-metal and alkaline-earth-metal thiocyanates in dimethylformamide and acetonitrile solutions: Hot bands, stability constants and thermicity for the formation of inner- and outer-sphere ion pairs, 315
Host–guest complexes of cucurbituril with the 4-methylbenzylammonium ion; alkali-metal cations and NH_4^+, 1507
Formation and structure of mono- and di-lead hydroxide and fluoride complexes in molten $NH_4NO_3 \cdot 1.5H_2O$ at 50 °C, 2531
Standard-state volume
Some thermodynamic properties of aqueous amino acid systems at 288.15, 298.15, 313.15 and 328.15 K; group additivity analyses of standard-state volumes and heat capacities, 2027
Statistical thermodynamics
Statistical thermodynamics of hard spheres in a narrow cylindrical pore, 973
Stereomutation
Potential surfaces for cyclopropane stereomutations: What a difference geminal fluorins make, 1689
Stereoselectivity
Chiral discrimination in the formation of diastereomeric pairs. A thermodynamic and conformational investigation, 435
Stereoselectivity and regioselectivity in Diels–Alder reactions studied by intermolecular perturbation theory, 1663
Steroid
Theoretical investigation of steroidal inhibitors of glucose-6-phosphate dehydrogenase, 3533
Stopped-flow technique
Two-step reduction of Indigo Carmine by dithionite: A stopped-flow study, 2525
Stratospheric chemistry
Chemistry of NO_2^+ in association with water clusters, 3469
Structural change
Pressure-induced structural changes in water-in-propane microemulsions, 3121
Structure-breaking effect
Study of the structure-breaking effect in aqueous CsCl solutions based on H_2O/D_2O isotope effects on transport coefficients and microdynamical properties, 849
Structure determination
Structure of the diamminecopper(I) ion in solution. An X-ray absorption spectroscopic study, 2211
Structure–property relationship
Use of a neural network to determine the boiling point of alkanes, 97
Structure–reactivity relationship
Pulse radiolysis study of the reactions of $SO_4^{\bullet-}$ with some substituted benzenes in aqueous solution, 597
Submillimetre-wave spectroscopy
IR and submillimetre-wave spectra of doped poly(*p*-phenylene vinylene), 879
Sucrose
Mean activity coefficients of NaCl in glucose–water and sucrose–water mixtures at 298.15 K, 3281
Sulfidation
Stepwise growth of size-confined CdS in the two-dimensional hydrophilic interlayers of Langmuir–Blodgett films by the repeated sulfidation–intercalation technique, 349
Sulfuric acid
Thermodynamic properties of 0–6 mol kg^{-1} aqueous sulfuric acid from 273.15 to 328.15 K, 1875
Sulfur poison
FTIR spectroscopic study of the effects of the sulfur poisons on CO adsorption on Cu/SiO_2 catalysts, 203
Sulfuryl chloride fluoride
Microwave spectrum of sulfuryl chloride fluoride, SO_2ClF: Structure, hyperfine constants and harmonic force field, 2601
Superbase
Superbase character of alumina loaded with potassium by impregnation from ammoniacal solution, 187
Supercritical region
Excess molar enthalpies of nitrous oxide–toluene in the liquid and supercritical regions, 2677
Supported catalyst
Structure of Cr^V species on the surface of various oxides: Reactivity with NH_3 and H_2O, as investigated by EPR spectroscopy, 207
EPR investigation of paramagnetic species on palladium-promoted yttria and lanthana, 219
Tunnelling mode of superoxide radical anion decay on palladium-promoted yttria, 227
Formation of C_2 oxygenates on rhodium-containing catalysts during CO + H_2 reactions. FTIR study of acetaldehyde adsorption, 501
Characterization of supported-palladium catalysts by deuterium NMR spectroscopy, 1157
Nickel incorporated into anodic porous alumina formed on an aluminium wire, 1279
Characterization of several γ-alumina-supported nickel catalysts and activity for selective hydrogenation of hexanedinitrile, 1455
Catalytic combustion of methane: Copper oxide supported on high-specific-area spinels synthesized by a sol–gel process, 1541
Addition of manganese to iron catalysts supported on silicalite-1 and its effect on CO hydrogenation, 1993
Photoluminescsence spectra resulting from hydroxy groups on magnesium oxide supported on silica, 2107
Raman band shifts of γ-Bi_2MoO_6 and α-$Bi_2Mo_3O_{12}$ exchanged with ^{18}O tracer at active sites for reoxidation, 2113
Hydrogenation behaviour over SiO_2-supported lanthanide–palladium bimetallic catalysts with considerable hydrogen uptake, 2119
Surface distribution and heteroatom removal activity of equilibrium adsorption prepared, doubly promoted (Zn,CO) Mo/Al_2O_3 catalysts, 2125
Characterization of carbon-supported ruthenium–tin catalysts by high-resolution electron microscopy, 2803
Ru–Cu/SiO_2 catalysts: Characterization by FTIR spectroscopy, 2809
Hydrogenation of carbon monoxide and ethene

over Ni-doped supported Pt catalysts, 2977
Corrigendum to Surface distribution and heteroatom removal activity of equilibrium adsorption prepared, doubly promoted (Zn, CO) Mo/Al_2O_3 catalysts, 3203
Applications of EPR to a study of the hydrogenation of ethene and benzene over a supported Pd catalyst: Detection of free radicals on a catalyst surface, 3341
In situ FTIR study of CO–H_2 reactions over Rh/TiO_2 catalysts at high pressure and temperature, 3699
Ternary V–Ti–Si catalysts and their behaviour in the CO + NO reaction, 3711

Surface
Electrochemical reduction of CO_2 on hydrogen-enriched and hydrogen-depleted surfaces, 155
Exchange of strong carbon dioxide O=C bonds on an MgO surface, 2561

Surface area
High surface area alumina aerogel at elevated temperatures, 2573

Surface foliation
Description of cubic liquid-crystalline structures using simple surface foliations, 3423

Surface potential
Effect of potassium on the surface potential of titania, 895

Surface pressure
Structure and linear dichroism of Langmuir–Blodgett films of uracilic amphiphiles, 3129

Surface structure
^{29}Si Solid-state NMR study of the surface structure of aerosil silica, 2961

Surface/subsurface acidity
Surface and subsurface acidity of faujasite-type zeolites in relation to their composition: XPS and TPD of ammonia study, 3461

Surfactant
Enthalpies of mixing a non-ionic surfactant with water at 303.15 K studied by calorimetry, 733
Monte Carlo simulations of a single poly(oxyethylene) $C_{12}E_2$ chain headgroup fixed on a bilayer surface in water, 2375
Structure of cobalt Aerosol-OT reversed micelles studied by small-angle scattering methods, 2497
Effects of alkyl-substituted ureas on the binding of the chloropentaamminecobalt(III) cation to sodium dodecyl sulfate micelles: A kinetic investigation, 2505
Phase transitions in the bilayers in vesicles formed from binary mixtures of symmetric di-*n*-alkylphosphates in aqueous solutions, 2703
Gel to liquid crystal transitions for vesicles in aqueous solutions prepared using mixtures of sodium dialkylphosphates $(R^1O)(R^2O)PO_2^-Na^+$ and $(R^2O)_2PO_2^-Na^+$, where $R^1 = C_{10}H_{21}$, $R^2 = C_{14}H_{29}$ or $C_{16}H_{33}$ and $R^2 = C_{12}H_{25}$, $C_{14}H_{29}$, $C_{16}H_{33}$ or $C_{18}H_{37}$, 2709
Effects of surfactant charge and structure on excited-state protolytic dissociation of 1-naphthol in vesicles, 2717
Surface chemistry and microemulsion formation in systems containing dialkylphthalate esters as oils, 2743
Surface chemistry and microemulsion formation in systems containing dialkylphthalate esters as oils, 2743
Pressure-induced structural changes in water-in-propane microemulsions, 3121
Self-diffusion, thermal effects and viscosity of a monodisperse associative polymer: Self-association and interaction with surfactants, 3555

Symmetric top dipolar molecule
Transition-state theory treatment of capture collisions between ions and symmetric top dipolar molecules, 3061

Symmetry
New families of triply periodic minimal surfaces, 263
What Woodward and Hoffmann didn't tell us: The failure of the Born–Oppenheimer approximation in competing reaction pathways, 1581
Transition vector symmetry and the internal pseudo-rotation and inversion paths of ClF_4^+, 1831

Symposium Corrigendum
Corrigendum to comment by Prof. Cramer, Mr. Hawkins and Prof. Truhlar in Faraday Symposium 29 on Potential-energy surfaces and organic reaction paths, 3202

Synthesis
Configuration interaction studies on the S_2 surface of H_2CO: $2\,^1A'(\sigma, \pi^*/\pi, \pi^*)$ as perturber of $1\,^1B_2(n, 3s)$, 683

Taylor dispersion
Tracer diffusion of some metal ions and metal–EDTA complexes in aqueous sodium chloride solutions, 133

TCNQ
Redox electrocatalysis by tetracyanoquinodimethane in phospholipid monolayers adsorbed at a liquid/liquid interface, 2517

TEM
Textures of tetradecahedron δ-FeOOH particles and their thermal decomposition products, 2567

Temperature-programmed analysis
Superbase character of alumina loaded with potassium by impregnation from ammoniacal solution, 187
Reduction of cerias with different textures by hydrogen and their reoxidation by oxygen, 773
Oxygen exchange between magnesium oxide surface and carbon dioxide, 803
Adsorption and decomposition of methanol on TiO_2, $SrTiO_3$ and SrO, 1015
X-Ray photoelectron spectroscopy, temperature-programmed desorption and temperature-programmed reduction study of $LaNiO_3$ and $La_2NiO_{4+\delta}$ catalysts for methanol oxidation, 1987
Exchange of strong carbon dioxide O=C bonds on an MgO surface, 2561
Acid properties of a ZSM-20-type zeolite, 2837
Growth and structure of ZnO_x overlayers on Cu(100), 3443
Surface and subsurface acidity of faujasite-type zeolites in relation to their composition: XPS and TPD of ammonia study, 3461

Terephthalic acid
Morphology and polymorphism in molecular crystals: Terephthalic acid, 1003

Ternary system
Excess volumes of the ternary mixtures butylamine–cyclohexane–benzene and tributylamine–cyclohexane–benzene, 1083
Dielectric behaviour of the *N*,*N*-dimethylformamide–2-methoxyethanol–1,2-dimethoxyethane ternary solvent system from −10 to +20 °C, 1089
Mean activity coefficients of NaCl in glucose–water and sucrose–water mixtures at 298.15 K, 3281
Ternary V–Ti–Si catalysts and their behaviour in the CO + NO reaction, 3711

1,1,1,2-tetrafluoroethane
Mechanism of atmospheric oxidation of 1,1,1,2-tetrafluoroethane (HFC 134a), 1819

Tetra-oxo complex
Theoretical vibrational energies of $[CrO_4]^{2-}$, $[MnO_4]^{2-}$ and $[FeO_4]^{2-}$, 3237

Tetrolyl fluoride
Microwave spectrum of tetrolyl fluoride, 3023

Thallium(I) chloride
Pitzer model parameters for sparingly soluble salts from solubility measurements: Thallium(I) chloride in aqueous solutions of ammonium chloride, rubidium chloride and caesium chloride at 298.15 K, 1895

Theoretical kinetic isotope effect
Theoretical kinetic isotope effects for the hydride-transfer step in lactate dehydrogenase, 1703

Thermal decomposition
Kinetics of thermal decomposition of the diazines: Shock-tube pyrolysis of pyrimidine, 541
Explosive decomposition of gaseous chlorine dioxide, 3391

Thermal expansion coefficient
Equation of state of liquid *o*-xylene at low temperatures and high pressures, 3527

Thermal separation
Very large thermal separations for polyelectrolytes in salt solutions, 1909

Thermochromism
Photochromism, thermochromism and solvatochromism of some spiro[indolinoxazine]-photomerocyanine systems: Effects of structure and solvent, 323

Thermodynamics
Intramolecular hydrogen bond and molecular conformation. Part 2.—Effect of pressure and temperature on the IR spectra of some hydroxy ketones, 103
Thermodynamics of liquid binary (alkanenitrile–alkane) mixtures. Part 1.—Experimental excess molar volume at 298.15 K and its interpretation with the Prigogine–Flory–Patterson theory, 113
Single-ion enthalpies of transfer for conjugate-base anions of imides in acetonitrile–methanol mixtures. Empirical correlation with semi-empirical molecular orbital calculations, 121
Thermodynamics of complexation of 18-Crown-6 with sodium, potassium, rubidium, caesium and ammonium ions in *N*,*N*-dimethylformamide, 127
Aggregation, hydrogen bonding and thermodynamic studies on tetrapeptide micelles, 161
Heat of water chemisorption on α-Al_2O_3 at 200–400 °C, 363
Chiral discrimination in the formation of diastereomeric pairs. A thermodynamic and conformational investigation, 435
Volumetric properties of steam–carbon dioxide mixtures derived from excess molar enthalpy measurements, 445
Speciation, structural characteristics and proton dynamics in the systems $NH_4NO_3 \cdot 1.5H_2O$ and $NH_4NO_3 \cdot 1.5H_2O$–(NHO_3, NH_4F, NH_3)–H_2O at 50 °C, 559
Effect of preferential solvation on reactivity of a free radical in binary solvent mixtures, 571
Ultrasonic velocities and isentropic compressibilities of some tetraalkylammonium and copper(I) salts in acetonitrile and benzonitrile, 579
Enthalpies of interaction between dimethyldioctadecylammonium bromide vesicles in aqueous solution and either dipicolinate or sulfate anions, 727
Enthalpies of mixing a non-ionic surfactant with water at 303.15 K studied by calorimetry, 733
Far-IR study of the hydrogen-bond vibration of intramolecular bonds in substituted 2-diethylaminomethylphenol *N*-oxides, as a function of the pK_a of the phenolic group, 843
Cyclodextrin–monosaccharide interactions in water, 845
Transfer Gibbs Energies for ClO_3^-, BrO_3^-, IO_3^-, ClO_4^- and IO_4^- anions for water–acetonitrile and water–*tert*-butyl alcohol mixtures, 855
2-Methoxyethanol–water solvent system: Static relative permittivity from −10 to +80 °C, 859
Thermophysical properties of liquid *m*-xylene at high pressures, 1217
Heats of transport of aqueous tetraalkylammonium hydroxides and the electrophoretic effect, 1223
General thermodynamic analysis of the dissolution of non-polar molecules into water. Origin of hydrophobicity, 1513
Glass transition of liquid-crystalline 4-alkoxyphenyl and 4-cyanophenyl 4-(2,4-dialkoxybenzoyloxy) benzoates, 1537
Irreversible thermodynamic coupling between heat and matter fluxes across a gas/liquid interface, 1865
Differential scanning microcalorimetric study of sodium di-*n*-dodecylphosphate vesicles in aqueous solution, 1905
Corrigendum to Sorption of organic solvents into dense silicone membranes. Part 1.—Validity and limitations of Flory–Huggins and related theories, 2001
Corrigendum to Primitive model electrolytes in the modified Poisson–Boltzmann theory, 2002

Some thermodynamic properties of aqueous amino acid systems at 288.15, 298.15, 313.15 and 328.15 K; group additivity analyses of standard-state volumes and heat capacities, 2027
Determination of the transfer thermodynamic functions for some monovalent ions from water to *N*,*N*-dimethylformamide, and for some anions from water to methanol, dimethyl sulfoxide, acetonitrile and pyridine, and standard electrode potentials of some $M^+/M(s)$ couples in *N*,*N*-dimethylthioformamide, 2223
Determination of the transfer themodynamic functions for the zinc(II), cadmium(II), mercury(II) and mercury(I) ions from water to methanol, dimethyl sulfoxide, acetonitrile, pyridine and *N*,*N*-dimethylthioformamide and of standard electrode potentials of the $M^{2+}/M(s)$ couples in these solvents, 2235
Transfer thermodynamic study on the copper(II) ion from water to methanol, acetonitrile, dimethyl sulfoxide and pyridine, 2243
Does mass action law breakdown occur in small thermodynamic systems?, 2353
Formation and structure of mono- and di-bismuth hydroxide and fluoride complexes in molten $NH_4NO_3 \cdot 1.5H_2O$ at 50 °C, 2401
Thermodynamic studies on the interaction of *n*-alkyltrimethylammonium bromides with anionic polypeptides in aqueous solution, 2511
Reaction of H_2S with OH and a study of the HSO and SOH isomers. High-level *ab initio* calculations, 3051
Effect of solvent on the reaction of coordination complexes. Part 19.—Base hydrolysis of (αβS)-(*o*-methoxybenzoato)-(tetraethylene-pentamine)cobalt(III) in aquo-organic solvent media, 3293
Thermodynamics and kinetics of the reaction of copper(II) and iron(III) with ultra-small colloidal chalcopyrite ($CuFeS_2$), 3301
Microcalorimetric titration of α-cyclodextrin with some straight-chain α,ω-dicarboxylates in aqueous solution at different temperatures, 3397
Equation of state of liquid *o*-xylene at low temperatures and high pressures, 3527
Thermodynamic behaviour of liquid *p*-xylene near freezing, 3645

Thermogravimetry
Thermogravimetry–FTIR study of the surface formate decomposition on Cu, CuCl, Cu_2O and CuO. Correlations between reaction selectivity and structural properties, 355
Thermal behaviour and physico-chemical characterization of synthetic and natural iron hydroxyphosphates, 3335

Theta-1
Frequency response study of single-file diffusion in theta-1, 3017

Thiirane
Resonance-enhanced multiphoton ionisation spectroscopy of thiirane, 3591

Thiocyanate
Spectrochemistry of solutions. Part 26.—Alkali-metal and alkaline-earth-metal thiocyanates in dimethylformamide and acetonitrile solutions: Hot bands, stability constants and thermicity for the formation of inner- and outer-sphere ion pairs, 315

Thionyl chloride
Microwave spectroscopic investigation of thionyl chloride, $SOCl_2$: Hyperfine constants and harmonic force field, 3473

Thiourea
Adsorption of dialkyl derivatives of thiourea from an ethanol solution at a mercury electrode, 3545

Ti_3Al
Solubility of hydrogen and deuterium in Ti_3Al, 1355

Time-resolved technique
Intramolecular excimer formation in 1,5-di(9-anthryl)-*n*-pentane, 2845
Low-temperature kinetics of reactions between neutral free radicals. Rate constants for the reactions of OH radicals with N atoms ($103 \leqslant T/K \leqslant 294$) and with O atoms ($158 \leqslant T/K \leqslant 294$), 3221
Time-resolved fluorescence probing of oil-in-water microemulsions stabilised by non-ionic surfactants, 3567

Titania
Effect of potassium on the surface potential of titania, 895
Characterisation of iron/titanium oxide photocatalysts. Part 2.—Surface studies, 2257
FT Raman and FTIR studies of titanias and metatitanate powders, 3181
Time-resolved microwave conductivity. Part 1.—TiO_2 photoreactivity and size quantization, 3315
Time-resolved microwave conductivity. Part 2.—Quantum-sized TiO_2 and the effect of adsorbates and light intensity on charge-carrier dynamics, 3323

Titanium
Heterogeneous catalysis in solution. Part 27.—Reaction between titanium(III) and triiodide ions catalysed by platinum, 1983

Toluene
Catalytic studies with dealuminated Y zeolite. Part 2.—Disproportionation of toluene, 809

Tracer study
^{18}O tracer studies of CO oxidation with O_2 on MoO_3. Part 3.—Reaction mechanism of oxygen isotope exchange between CO_2 and MoO_3, 3449

Trajectory calculation
Dynamical studies of the reaction Be + HF(*v*, *J*) → BeF(*v'*, *J'*) + H on a new *ab initio* potential-energy surface, 249

Transfer parameter
Transfer Gibbs Energies for ClO_3^-, BrO_3^-, IO_3^-, ClO_4^- and IO_4^- anions for water–acetonitrile and water–*tert*-butyl alcohol mixtures, 855
Determination of the transfer thermodynamic functions for some monovalent ions from water to *N*,*N*-dimethylformamide, and for some anions from water to methanol, dimethyl sulfoxide, acetonitrile and pyridine, and standard electrode potentials of some $M^+/M(s)$ couples in *N*,*N*-dimethylthioformamide, 2223
Determination of the transfer themodynamic functions for the zinc(II), cadmium(II), mercury(II) and mercury(I) ions from water to methanol, dimethyl sulfoxide, acetonitrile, pyridine and *N*,*N*-dimethylthioformamide and of standard electrode potentials of the $M^{2+}/M(s)$ couples in these solvents, 2235
Transfer thermodynamic study on the copper(II) ion from water to methanol, acetonitrile, dimethyl sulfoxide and pyridine, 2243
Thermodynamic study of the transfer of the tin(II), lead(II) and alkaline-earth-metal ions from water to methanol, dimethyl sulfoxide, acetonitrile, pyridine and *N*,*N*-dimethylthioformamide, 2683

Transition state
Transition states, avoided crossing states and valence-bond mixing: Fundamental reactivity paradigms, 1631
Theoretical kinetic isotope effects for the hydride-transfer step in lactate dehydrogenase, 1703
Transition-state structural variation and mechanistic change, 1709
Transition structures of the Friedel–Crafts reaction in solution, 1757
Transition vector symmetry and the internal pseudo-rotation and inversion paths of ClF_4^+, 1831
Gradient-line reaction paths for 1,2 H shift reactions in phosphinonitrene and formaldehyde, and H_2 elimination from formaldehyde, 1839
Enzyme catalysis and transition structures *in vacuo*. Transition structures for the enolization, carboxylation and oxygenation reactions in ribulose-1,5-bisphosphate carboxylase/oxygenase enzyme (Rubisco), 2365
Transition-state theory treatment of capture collisions between ions and symmetric top dipolar molecules, 3061

Transition vector symmetry
Transition vector symmetry and the internal pseudo-rotation and inversion paths of ClF_4^+, 1831

Translational energies
Dynamics calculations and isotopic effect in O + OH(D) → O_2 + H(D) at low energies, 2189

Transmission line
Dual transmission line with charge-transfer resistance for conducting polymers, 1115

Transport
Study of the structure-breaking effect in aqueous CsCl solutions based on H_2O/D_2O isotope effects on transport coefficients and microdynamical properties, 849
Heats of transport of aqueous tetraalkylammonium hydroxides and the electrophoretic effect, 1223
Water distillation through poly(tetrafluoroethylene) hydrophobic membranes in a stirred cell, 2043

Trimer
Equilibrium geometry and vibrational frequencies of the 1:2 van der Waals complexes between methyl chloride and hydrogen chloride, 3601

TRIPLE resonance
EPR, ENDOR and TRIPLE resonance characterization of three paramagnetic redox stages of 5-methyl-5*H*-dibenzo[*a*,*d*]cycloheptene, 3273

Triplet
Laser flash photolysis studies on hydrogen-atom transfer from the triplet hydroxynaphthylammonium ion to benzophenone *via* a triplet exciplex. Which group is more reactive for hydrogen atom transfer, −OH or $-NH_3^+$?, 533
Triplet of cyclooctatetraene: Reactivity and properties, 963
Singlet and triplet excited-state formation in high-energy electron tracks in liquid *cis*- and *trans*-decalin as studied by product formation in radiolysis and photolysis, 2459

Triply periodic minimal surface
New families of triply periodic minimal surfaces, 263

Tropospheric chemistry
Pivalic acid as combined buffer and scavenger for studies of cloud water chemistry with pulse radiolysis, 3651

Tungsta
Influence of preparation method on the acidity of $MoO_3(WO_3)/ZrO_2$ catalysts, 193

Tunnelling calculation
Variational transition-state theory and semiclassical tunnelling calculations with interpolated corrections: A new approach to interfacing electronic structure theory and dynamics for organic reactions, 1715

Ultrasonic absorption
Cationic micellar effect on the kinetics of the protolysis of aromatic carboxylic acids studied by the ultrasonic absorption method, 869

Ultrasonic velocity
Ultrasonic velocities and isentropic compressibilities of some tetraalkylammonium and copper(I) salts in acetonitrile and benzonitrile, 579

Ultraviolet photolysis
Ultraviolet photolysis of HOCl: REMPI measurement of the relative population of chlorine atom (^2P) spin–orbit states, 17

Underpotential deposition
Underpotential deposition and dielectric electronegativity scale, 2395

Unsteady state
Unsteady state, non-isothermal dissolution of a solid particle in liquid, 1435

Upper-critical solution point
Electrical properties of an ethanol–dodecane mixture near the upper critical solution point, 2757

Uracilic amphiphile
Structure and linear dichroism of Langmuir–Blodgett films of uracilic amphiphiles, 3129

Uranium film
Modification of the electronic structure of Pd by U films: Chemisorption of CO, 1285

Uranyl complexes
Complexing effects on the excited state of uranyl β-diketonato complexes: Application of the

energy gap law, 3253
Uranyl phenylphosphonate film
Determination of some electrical parameters for $UO_2(O_3PC_6H_5)$ films deposited on a porous support, 3103
Urea
Conformational and vibrational properties of α,ω-dihalogenoalkane/urea inclusion compounds: A Raman scattering investigation, 1313
UV–VIS spectroscopy
Oxotungsten(v) and (vi) complexes of 1,3-dimethyllumazine as models for the tungstopterin cofactor, 2909
Vanadium catalyst
Nature of vanadium species on SnO_2–V_2O_5-based catalysts. Chemistry of preparation, characterization, thermal stability and reactivity in ethane oxidative dehydrogenation over V–Sn mixed oxides, 2981
Ternary V–Ti–Si catalysts and their behaviour in the CO + NO reaction, 3711
van der Waals molecule
Laser-induced fluorescence spectroscopy of ethyl and methyl *p*-aminobenzoate van der Waals complexes with non-polar solvents (CH_4, C_2H_6 and CF_4), 2443
Interaction potentials and fragmentation dynamics of the Ne···Br_2 complex in the ground and electronically excited states, 3229
Equilibrium geometry and vibrational frequencies of the 1:2 van der Waals complexes between methyl chloride and hydrogen chloride, 3601
Variational transition-state theory
Variational transition-state theory and semiclassical tunnelling calculations with interpolated corrections: A new approach to interfacing electronic structure theory and dynamics for organic reactions, 1715
Vesicle
Enthalpies of interaction between dimethyldioctadecylammonium bromide vesicles in aqueous solution and either dipicolinate or sulfate anions, 727
Differential scanning microcalorimetric study of sodium di-*n*-dodecylphosphate vesicles in aqueous solution, 1905
Phase transitions in the bilayers in vesicles formed from binary mixtures of symmetric di-*n*-alkylphosphates in aqueous solutions, 2703
Gel to liquid crystal transitions for vesicles in aqueous solutions prepared using mixtures of sodium dialkylphosphates $(R^1O)(R^2O)PO_2^-Na^+$ and $(R^3O)_2PO_2^-Na^+$, where $R^1 = C_{10}H_{21}$, $R^2 = C_{14}H_{29}$ or $C_{18}H_{37}$ and $R^3 = C_{12}H_{25}$, $C_{14}H_{29}$, $C_{16}H_{33}$ or $C_{18}H_{37}$, 2709
Effects of surfactant charge and structure on excited-state protolytic dissociation of 1-naphthol in vesicles, 2717
Vibrational energy
Theoretical vibrational energies of $[CrO_4]^{2-}$, $[MnO_4]^{2-}$ and $[FeO_4]^{2-}$, 3237
Vibrational relaxation
Vibrational relaxation of the ν(C=O) mode of ethyl trichloroacetate in solution, 2325
Vibrational spectroscopy
Vibrational spectroscopic analysis of Group 6 metal hexacarbonyls in the solid state, 1265
Preparation, structure and vibrational spectrum of the dimethylmethyleniminium ion, including the role of cationic polymers in its formation, 3139
Gas-phase IR spectrum of 7-azaindole. Scaled quantum mechanical force field and complete spectrum assignment, 3213
Vinylimidazole ligand
Characterisation behaviour of the complexation of copper(II) with polymer-bound vinylimidazole ligands, 3563
Virial theorem
Virial theorem decomposition as a tool for comparing and improving potential-energy surfaces: Ground-state Li_3, 1381
Viscoelasticity
Brownian dynamics simulations of concentrated dispersions: Viscoelasticity and near-Newtonian behaviour, 1133
Self-diffusion and viscoelasticity of dense hard-sphere colloids, 1931
Apparently viscoelastic responses in a quartz crystal microbalance study of an electrodeposited non-aqueous colloid film, 3657
Viscosity
Fluorescence anisotropy decays and viscous behaviour of 2-methyltetrahydrofuran, 271
Corrigendum to Sorption of organic solvents into dense silicone membranes. Part 1.—Validity and limitations of Flory–Huggins and related theories, 2001
Structure and transport in concentrated micellar solutions with a lower consolute boundary, 2071
Self-diffusion, thermal effects and viscosity of a monodisperse associative polymer: Self-association and interaction with surfactants, 3555
Voltammetry
Effect of preferential solvation on Gibbs energies of ionic transfer, 2037
Electrochemical studies of the conformational and sodium cation complexation properties of calix[4]arenediquinones, 2931
Rotating-disc electrode voltammetry as a probe of adsorption rates on solid particles in liquids. Application to Zn^{II} adsorption at the hydroxyapatite/aqueous interface, 3109
Volume constraint effect
Volume constraint effect on solute partitioning to Triton X-100 micelles in water, 479
Volumetric property
Volumetric properties of steam–carbon dioxide mixtures derived from excess molar enthalpy measurements, 445
Water
Raman spectroscopic monitoring of oxygen clathrate hydrate formation from microporous amorphous solid water, 293
Water adsorption in active carbons described by the Dubinin–Astakhov equation, 783
Photocatalysts with tunnel structures for decomposition of water. Part 1.—$BaTi_4O_9$ and its combination with various promoters, 797
Relaxation and crystallisation of water in a hydrogel, 1143
Water distillation through poly(tetrafluoroethylene) hydrophobic membranes in a stirred cell, 2043
Interaction of water with α,α-trehalose in solution: Molecular dynamics simulation approach, 2731
Physical properties of liquid water by molecular dynamics simulations, 3039
Pivalic acid as combined buffer and scavenger for studies of cloud water chemistry with pulse radiolysis, 3651
Wavefunction
Ionization radii of compressed atoms, 3377
Wetting
Stability of thin polar films on non-wettable substrates, 625
^{129}Xe NMR
Zinc-exchanged Y zeolites studied with carbon monoxide and xenon as probes, 1345
X-Ray absorption spectroscopy
Reaction of molecular oxygen with C_{60}: Spectroscopic studies, 403
Structure of the diamminecopper(I) ion in solution. An X-ray absorption spectroscopic study, 2211
X-Ray diffraction
Reaction of molecular oxygen with C_{60}: Spectroscopic studies, 403
Micellar aggregates of sodium glycocholate and sodium taurocholate and their interaction complexes with bilirubin-1Xα. Structural models and crystal structure, 1523
Two members of the ABC-D6R family of zeolites: Zeolite phi and Linde D, 1547
Single-crystal structure of C_{60} at 300 K. Evidence for the presence of oxygen in a statically disordered model, 2791
X-Ray investigations on liquid-crystalline copolysiloxanes for second-harmonic generation, 3331
Growth of a well oriented layer of *p*-nitroaniline on the (100) plane of a *p*-cyanoaniline single crystal, studied by polarized absorption and second-harmonic generation, 3685
X-Ray photoelectron spectroscopy
Reaction of molecular oxygen with C_{60}: Spectroscopic studies, 403
Effect of potassium on the surface potential of titania, 895
Adsorption and decomposition of methanol on TiO_2, $SrTiO_3$ and SrO, 1015
Modification of the electronic structure of Pd by U films: Chemisorption of CO, 1285
Electroanalytical/X-ray photoelectron spectroscopy investigation on glucose oxidase adsorbed on platinum, 1495
X-Ray photoelectron spectroscopy, temperature-programmed desorption and temperature-programmed reduction study of $LaNiO_3$ and $La_2NiO_{4+\delta}$ catalysts for methanol oxidation, 1987
Spectroscopic investigation of the polymerisation of pyrrole and thiophene within zeolite channels, 2579
X-Ray photoelectron spectroscopy characterization of the reduction and oxidation behaviour of Ni-containing HZSM-5 zeolites, 2591
Surface and subsurface acidity of faujasite-type zeolites in relation to their composition: XPS and TPD of ammonia study, 3461
X-Ray scattering
Formation and structure of mono- and di-lead hydroxide and fluoride complexes in molten $NH_4NO_3 \cdot 1.5H_2O$ at 50 °C, 2531
Xylene
Catalytic reactions of *o*-xylene and *m*-xylene with deuterium on metal films, 659
Thermophysical properties of liquid *m*-xylene at high pressures, 1217
Equation of state of liquid *o*-xylene at low temperatures and high pressures, 3527
Thermodynamic behaviour of liquid *p*-xylene near freezing, 3645
Yttrium
Effects of hydrogen and deuterium concentration on measurements of the solubility and diffusivity of hydrogen isotopes in yttrium, 1979
ZEKE
State-to-state photoionisation dynamics probed by zero kinetic energy (ZEKE) photoelectron spectroscopy, 2425
Zeolite
Identification of isolated Pt atoms in H-mordenite, 233
Frequency response analysis for multicomponent diffusion in adsorbents, 369
Photocatalytic decomposition of dinitrogen oxide on Cu-containing ZSM-5 catalyst, 377
Brønsted acid strength in US-Y: FTIR study of CO adsorption, 383
Influence of framework substitution of Al^{3+} by Fe^{3+} on the sorption characteristics of β zeolite, 387
Catalytic studies with dealuminated Y zeolite. Part 2.—Disproportionation of toluene, 809
FTIR spectroscopic study of the zeolitic adsorption of hydrogen cyanide on acidic sites, 919
FTIR study of the interaction of hydrogen cyanide with alkali-metal ion, silver(I) and nickel(II) ion-exchanged near-faujasite zeolites, 931
Brønsted acid sites in zeolites. FTIR study of molecular hydrogen as a probe for acidity testing, 1047
Inelastic neutron scattering study of NH_4Y zeolites, 1191
Conformational properties of monosubstituted cyclohexane guest molecules constrained within zeolitic host materials. A solid-state NMR investigation, 1323
Solid-state ion exchange in zeolites. Part 5.—NH_4-Y–iron(II) chloride, 1329
Manganese-promoted rhodium/NaY zeolite catalysts. An IR spectroscopic study, 1335
Zinc-exchanged Y zeolites studied with carbon monoxide and xenon as probes, 1345
Adsorption of benzene on the acidic and basic sites of KH β zeolite studied by *in situ* spectroscopy, 1351

Two members of the ABC-D6R family of zeolites: Zeolite phi and Linde D, 1547
Mechanistic study of *sec*-butyl alcohol dehydration on zeolite H-ZSM-5 and amorphous aluminosilicate, 2147
Reactivity of zeolite hydroxy groups toward σ-donor bases. H–D exchange with 3-methylpentane, 2297
Spectroscopic investigation of the polymerisation of pyrrole and thiophene within zeolite channels, 2579
X-Ray photoelectron spectroscopy characterization of the reduction and oxidation behaviour of Ni-containing HZSM-5 zeolites, 2591
Coordination sequences of zeolites revisited: Asymptotic behaviour for large distances, 2597
IR study of ethene and propene oligomerization on H-ZSM-5: Hydrogen-bonded precursor formation, initiation and propagation mechanisms and structure of the entrapped oligomers, 2827
Acid properties of a ZSM-20-type zeolite, 2837
Reaction mechanism of methane oxidation to synthesis gas over an activated PdY zeolite, 3001
Evaluation of concentration-dependent diffusivity with uptake curve, 3007
Study of fast diffusion in zeolites using a higher harmonic frequency response method, 3011
Frequency response study of single-file diffusion in theta-1, 3017
Effects of dry-air calcination on the physico-chemical and catalytic properties of HZSM-5 zeolite, 3191
Comparative IR spectroscopic study of low-temperature H_2 and CO adsorption on Na zeolites, 3367
Surface and subsurface acidity of faujasite-type zeolites in relation to their composition: XPS and TPD of ammonia study, 3461
Dissolution of amorphous aluminosilicate zeolite precursors in alkaline solutions. Part 3.—Influence of temperature on the dissolution process, 3725
Corrigendum to Reactivity of zeolite hydroxy groups toward σ-donor bases. H–D exchange with 3-methylpentane, 3733

Zinc oxide film
Growth and structure of ZnO_x overlayers on Cu(100), 3443

Zirconia
Influence of preparation method on the acidity of $MoO_3(WO_3)/ZrO_2$ catalysts, 193
FTIR study of adsorption and transformation of methanethiol and dimethyl sulfide on zirconia, 1029
Chemisorption of H_2 and H_2–O_2 on polymorphic zirconia, 2969
